

THE HAMILTON TIMES

WEDNESDAY, OCT. 16, 1907.

LIGHTING PLANT ESTIMATES.

Last night Mr. Sothman, one of the Hydro-Electric Commission's engineers, gave the Board of works some more estimates of the cost of providing an electric light distribution system for the city. The figures are printed elsewhere in this issue, and while they are not accompanied with the details of cost of each part of the work, they will still prove interesting.

The former estimate furnished by the commission's engineers placed the cost of such a system at about \$120,000, a figure which we regarded as too low by at least half. Mr. Sothman has raised the estimate to \$175,580, and his conduit system figures closely approximate \$200,000. That is probably a good deal nearer the probable cost than the first estimate, which was so confidently put forward as ample; but it is still open to doubt if it would cover the actual cost by many thousands. If, for instance, it is hoped to keep the cost of erected poles with the necessary iron work for placing the lamps within \$40, the estimate may have to be increased. And in these matters it is well to know what is before us.

Mr. Sothman put the cost of operation of this 500 arc lamp system at \$25,517 a year, made up as follows:

Fixed charges	\$18,247
Power	3,470
Renewals	1,600
Wages	1,900
Oil and waste	500
		\$25,517

A good many people will be inclined to see in the allowance of \$1,600 for wages an evidence of the insufficiency of the estimate. It would hardly pay the salary of a capable electrical engineer for the system, to say nothing of the management and the wages which must be paid for its operation. The power cost estimate seems to be inadequate also, representing a transformed and distributed current of only 231 horse-power at \$12; or, about 290 horse-power at \$12. The fixed charges on capital, assuming his estimate to be near the mark, are low, but might be realized, could the securities be sold to advantage. Renewals are merely guessed at, and the chances are that the progress of the science and the accidents of operation would largely increase them.

To some of Mr. Sothman's items from 25 to 50 per cent. may be safely added, without unduly loading the estimate. Wages may be trebled or quadrupled. Nothing is allowed for management. No provision is made for damages. The entire estimate looks like a promoter's proposition, the promoter having no risks to run.

The Board of Works will hold a meeting at an early date to consider the figures. Meanwhile it might be well to go into the work in detail and ascertain whether the various portions of the contract are likely to be undertaken as contracts by practical contractors without largely exceeding the estimates; and whether proper operating cost allowances have been provided for. As it stands at present it will bear a great deal of elucidation. It is not as if it were an undertaking by a responsible contractor to do a given work for a given price.

LICENSE LAW ABUSES.

The Ottawa Free Press says: "We here in Ottawa have been convinced from the developments of the past few days that the claim of the Whittneys that the license law is being administered without fear or political favor is pure moonshine." It cites the case of Mr. Vincent as significant of what happens to a commissioner who is unsophisticated enough to accept Whitney's platform promises of honest license law enforcement as a direction to the administration of the Act, and says he "has learned what Messrs. Flavell, Davidson and Murray learned in Toronto, namely, that the commissioner who endeavors to administer the law without regard for the political consequences has to be disciplined, or, if unwilling to be placed under the ban of party contumely, must in self-respect resign his position."

In Hamilton nobody is deluded by the Premier's cheap talk. People have taken his size. Mr. Henry New's experience as a license commissioner was enlightening. Mr. New got the idea that the Premier wanted a square deal, and, relying upon his support, he proceeded to try to give it. He was not long on the commission, however, till his position was made very uncomfortable, and not proving amenable enough to the influences which the Government intended the Commissioners to be subservient to he was cast into outer darkness and another was put in his place.

At Hensall the other day, Mr. M. Y. McLean illustrated by specific instances how the license law was enforced in South Huron where a proper administration was promised by Mr. Harry Eilber, M. P., and other Conservative speakers. The commission thought that in the village of Khiva there was no need of a hotel and therefore it decided to cut the license off. Mr. Barney Cunningham went to see Harry Eilber, the member, and after an interview that is said to have been somewhat sulphurous the license commission saw new light on the matter, and as a result, the license was not cut off. There is no danger that the license will be cut off. Mr. Cunningham is an active Conservative worker.

In Exeter, Whitney's commission decided that there was not enough popula-

tion in the town for so many hotels, and it was decided to cut off a certain hotel, owned by a Liberal, of course. The hotel then passed into the hands of a staunch Conservative and then immediately the commission saw a new light. It was suddenly found that the population had increased greatly, and there was sufficient to support the extra hotel.

That sort of thing is going on all over the Province. A hint of the reality that is kept from the public was given in Commissioner Starr's report in which the deals in \$1,000 cheques and notes were condemned. If an inspector or commissioner resists the evil influences which are brought to bear on him, and tries to do his duty, he is made to walk the plank. Rotteness rules. Never in the history of the Province has the licence system been so partisan or so corruptly administered. And those responsible for that state of things are the men who pledged themselves to secure honesty, efficiency and purity in the administration of the license act; yet they were hardly well seated in office before they were making personal appeals in the interest of notorious violators of the law.

EDITORIAL NOTES.

Whiskey prices have gone up in London, and in the face of a water shortage, too.

Dr. Amoyt, of the Provincial Health Department, still tells Toronto people to boil the water.

Londoners have chosen Major Beattie as their candidate for the by-election, thus turning down Wm. Gray hard.

Hanna is, it is rumored, on the trail of the big moose. At least, he is carefully keeping out of Dr. Beattie Nesbitt's reach.

Those Vancouverites who call themselves the Asiatic Exclusion League probably have their headquarters in some Tooley Street tailor shop.

Somebody who said the Street Railway Company had not moved to obey the Board's order to repair its cars and tracks must have been fibbing recklessly.

Hon. Dr. Pyne has been tacking the Sault Ste. Marie people with the technical school feather. What is he going to do for Hamilton? Does Hon. Mr. Hendrie know?

"Goggin" who is Goggin? We are told that he is an "educationalist of note" and that he is to prepare new school readers. Do you know Goggin? Ever hear of Goggin?

Nova Scotia is true to Fielding. The reception they gave him last night was a hearty one, and Sir Wilfrid Laurier, Hon. Mr. Pugsley and Sir Frederick Borden were warmly greeted.

The first Philippine Assembly is meeting this week, and the caucus has decided that it shall not be opened with prayer. The vote is regarded as a sort of test of church and state power, and was carried by a majority of one.

Dr. Sheard, Toronto's Medical Health Officer, wants the Legislature to do away with the bread label and make it compulsory to have a standard weight for bread. He must be sighing for the days of the four pound loaf.

Now Germany will seek to get the Canadian airtax removed, and is willing to treat Canada as an equal commercial partner. That is better. Canada wants to be neighborly, but she will take no kicks and cuffs.

We hope now that there is an armed truce in the aldermanic "wah" with the street railway, and the Parks Board is once more complete and ready for business, that there will be a conference on the city, and that it will be thankfully accepted. That acquisition would fit in well with the scheme to buy the face of the mountain and preserve it for the city. No more neglect, please. The time for action has arrived.

Rev. Mr. Farmer, of Brantford, in his sermon on Sunday last, said that city was the most drunken he ever found in any of his travels. Some years ago a Hamilton clergyman said Hamilton held a similar unenviable position. At the time we objected to the statement, believing it not to be true. Bad as Brantford may be, we hope the language of the reverend gentleman was exaggerated, to say the least. We have our own bottle brigade.

The other day before he went moose-hunting Hon. Mr. Hanna fired his parting shot at Dr. Beattie Nesbitt: "A handful of rich men want to secure the whole organization (electric power) and then make it a political game. They have evidently secured Dr. Beattie Nesbitt as a sort of advance agent, and his first notice was the speech at Gravenhurst." Will Doc Nesbitt allow "Rookefeller's boy" to tread on the tail of his coat with impunity?

The United States Government has engaged a Greek with the celestial-sounding name of Aleibiades Seraphie, to help to break up the padrone system in the States, whereby young Greeks are brought there under what is said to be practical slavery. His reports, it is said, reveal a startling state of affairs in New York, Boston, Philadelphia, New Orleans and other cities. This sort of slavery, it has been asserted, also exists in Canada. Is that at all probable?

Chicago women are having quite a trying time of it just now. The clergymen have been denouncing them from the pulpit for their alleged drinking hab-

its, and now the discovery has been made public that the cigarette habit is growing in popularity among them. This is said to be vouchered for by tobacco dealers, beauty doctors, hair dressers and certain physicians. The doctors say that they know their lady patients smoke by the condition of their hearts when they come seeking advice. The Anti-cigarette Ladies' League have spent most of their time up to now chasing after boy victims. But if this story from Chicago is true, they will have to begin a campaign for the reformation of their own sex.

Prince Albert City has rejected Hon. A. E. Turgeon, Attorney-General of the Saskatchewan, by a majority on the face of the returns.

A judicial decision may deprive Hon. F. W. G. Haultain of the full political effect of the Prince Albert victory in the lifetime of the present Legislature. Put the vote in Prince Albert proves that the cause of Provincial rights still lives.—Toronto Telegram.

Perhaps the Telegram might be prevailed on to wait till it knows what is the result of the vote before proceeding with its cant. About 300 votes were challenged, many more by the Tories than by the Grits. Until these votes are disposed of and those eligible are taken into the count it will not be known who has a majority. The Telegram is suspiciously precipitate.

Speaking of the difficulty with the C. P. R. Telegraph Co. as to press service, the Winnipeg Free Press says: "The incident is closed. But closed incident though it is, it stands as a convincing proof of the necessity of a tribunal charged by the people of Canada with the duty of adjudicating upon such matters. With the Railway Commission vested with the function, the recent trouble between the newspapers and the corporation in question, which is chartered as a common carrier, could have been adjusted speedily and without friction or heat. With the principle of public regulation in operation, the matter would have been set to rights equitably, the balance being held justly between the newspapers and the public service corporation in question." And that is coming in question." And that is coming in question. The regulatory powers of the Government must be extended to all those franchise-holding companies that serve the public. And nobody needs fear being wronged by such a move.

Toronto Star: The crack in the foundation of the City Hall tower will bear watching, but the general opinion is that the split in the Whitney Cabinet will get there sooner.

Winnipeg Tribune: The man who deplores the tendency to reduce house rent in Winnipeg is wasting his sympathy on a city that should be congratulated on its ability to point to such a tendency.

Toronto Telegram: Toronto should either go in thoroughly for the medical examination of school children or continue the present policy of neglect.

HERE AND THERE.

Ottawa Free Press: No indications of a shrinkage in the Conservative Association.

Brantford Expositor: Dr. Beattie Nesbitt practically defies the Whitney Government to "discipline" him, and if it be not done folks will be asking themselves the reason why.

Denver News: "The next time anyone tells you that 'the tariff must be revised by its friends,' ask him if he doesn't think it would be a good scheme to have the tariff revised by the friends of the people."

Ottawa Journal: These days are big with trouble for the corporation which deliberately sets out to irritate the people and the means of redress in the hands of the people are growing every day.

Brantford Courier: The question now arises as to whether Nesbitt off too much.

Toronto Star: While Beattie Nesbitt can't recall that's his wife's name, he's waiting for the axe to fall, and the suspense is awful.

New York Herald: "It is the 'duffer' at the game that is always talking golf," says the Chicago Record-Herald. Why confine it to golf?

Kingston Whig: The Provincial Secretary says Dr. Beattie Nesbitt has "gone over to the Opposition." He has not yet, however, reported to Mr. MacKay.

Toronto News: The leaders of the Canadian banking world take a high view of their responsibilities, and assume obligations to the general community, as well as to their individual customers. It is owing greatly to the conservative policy of Canadian banks that financial conditions in Canada seldom become acute, that the area of disturbance is always restricted, and public opinion steadies in times of emergency.

Our Exchanges

Good Grit Times. (Toronto Globe.)
Peterboro's population has increased by over a thousand in a year. This is the growing time.
Wants It Repeated. (Toronto Star.)

A British fleet, twice as big as any two European nations can get together, is assembled for manoeuvres in the North Sea. Say that over again, slowly, please, so Germany can catch it.

Patronage in Toronto. (Toronto News.)
The Whitney Government has reaped the full consequences of its surrender to the patronage element in the administration of the license system in Toronto.

Is It a Gold Brick? (Toronto Globe.)
Will an offer of Niagara power in a 10,000 horsepower block at \$17.75 per horsepower per annum enable Toronto to compete on even terms with the Electric Light Co. for a market totalling at the present time some 15,000 horsepower used for both light and power? Mr. J. J.

Wright, Manager of the Electric Light Co., does not mince words in discussing the matter. He says the purchase of power at a flat rate per year for the sort of business done by his company, and that must be done by a civic plant, would be an absurdity and an unpardonable extravagance. The company buys its power from the Electrical Development Co. on a meter basis, paying \$35 per horsepower per year on the maximum hourly flow of current. The actual power curves of the company work out at a flat rate of \$8.75, he says, as compared with a flat rate of \$17.75, the Commission's figures. Mr. Wright adds that "the average payment received by the Toronto Electric Light Company from their customers for power is \$16 per horsepower per year. How, then, can the municipality pay the Hydro-Electric Commission \$17.75, and add to that the losses in transmission and the heavy costs in transmission and operation?" He states that it can easily be demonstrated to a commission of experts that a civic plant taking power at the Commission's price starts with a handicap of \$9 per horsepower per year. That is a very grave statement and one that Mr. Whitney cannot afford to ignore. It is equivalent to saying that the Commission's offer is a gold brick not meant to be taken seriously, and that if taken seriously would greatly handicap the municipality in a competitive fight.

ABOUT INSURANCE.

Commission Broke the Ontario Insurance Law.

Toronto, Oct. 16.—It is claimed by Toronto insurance men that the Ontario Government has violated its own laws by placing \$2,000,000 of insurance with American and English companies. The amount in question covers the property of the Temiskaming & Northern Ontario Railway, and the rate obtained is about 45 cents on the dollar. Lloyds, of England, get about 40 per cent. of the total. The remaining goes to American companies, and Ontario agents are wrathful against what they claim is a policy of Ontario for the Americans.

The firm currently mentioned as getting the American end of the business is Johnston & Higgins, of New York. It is admitted that the rate is a cheap one, but it is asserted that at least a portion of the insurance could have been placed as cheaply with Ontario companies which have to keep a deposit with the Ontario Government, but which apparently do not get that Government's business.

DETROIT UNITED.

Passing of Dividend Causes Stump in Montreal Market.

Montreal, Oct. 15.—The passing of the Detroit United dividend aroused a storm of indignation to-day and was responsible for a heavy slump on the Stock Market. It was regarded as the worst blow to Canadian security holders that this market has perhaps ever experienced since the inauguration of the Stock Exchange.

To-day excitement was intense on the local Stock Market. It seemed that everybody was selling Detroit United, and the tape showed that the downward course did not stop until 29 1/2 had been bid. To say that the latest policy of the directors was a surprise is to put it very mildly indeed, as the last statement of the current year's earnings showed nearly a quarter of a million dollars in excess of the 5 per cent. dividend obligation, and this was for the period ending August 31, there still being another four months before the fiscal year is completed.

It is pointed out that since yesterday the "paper" loss of Detroit United has amounted to \$3,700,000, yesterday's capital having a market value of \$7,500,000, this compared with a par value of \$12,500,000.

Detroit United stock was listed in 1901. It sold as high as \$2 in that year and 97 in 1902. In 1903 it sold down as low as 55.

Maurice Loewy, director of the Paris Observatory and the doyen of astronomers, died suddenly on Tuesday, while conferring with the Minister of Public Instruction. He was 94 years old.

ECZEMA COVERED HANDS 11 YEARS

Cracked and Bleeding in Many Places—Became so Bad that Nail Came Off Finger—Tried Many Remedies and Consulted Three Doctors, but Got No Relief—Now Cured and Is Very Proud of Having Tried CUTICURA REMEDIES

"I had eczema on my hands for about eleven years. The hands cracked open in many places and bleed. One of my fingers was so bad that the nail came off. I had often heard of cures by Cuticura Remedies, but had no confidence in them as I had tried so many remedies, and they all had failed to cure me. I had seen three doctors, but got no relief. Finally my husband said that we would try the Cuticura Remedies, so we got a cake of Cuticura Soap, a box of Cuticura Ointment, and two bottles of Cuticura Resolvent Pills. Of course I keep Cuticura Soap all the time for my hands, but the one cure was effected by using all two sets of Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent, and now I would do without Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent. Mrs. Eliza A. Wiley, R. F. P. 2, Liscomb, Iowa, Oct. 18, 1906."

ITCHING PIMPLES Resulted from Poisoning. Cured by Two Sets of Cuticura Remedies.

"My husband got a blood disease from wearing woolen underwear. He was all full of pimples, and he had an awful itching. He took a good many so-called blood remedies, and nothing did him good. Then we saw in a newspaper about Cuticura Remedies, and they cured him after using in all two sets of Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent, and now I would do without Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent. Mrs. Harner, 1050 Bennett St., Reading, Pa., Jan. 25, 1906."

Complete External and Internal Treatment for Every Form of Itching. Toronto: Cuticura Soap to Cleanse the Skin, Cuticura Ointment to Soothe the Itching, and Cuticura Resolvent in the form of Chocolate Coated Pills in Vials of 100 Pills. Put the Soap in Boiling Water. Cuticura is Sold Everywhere. Cuticura Soap, Cuticura Ointment, Cuticura Resolvent. Cuticura Resolvent. Cuticura Resolvent. Cuticura Resolvent. Cuticura Resolvent.
