All articles crossing in licensed ferry boats exempt from wharfage.

ROBERT HUTCHINSON, Mayor.

William B. Wellner, City Clerk.

30th April, 1856.

HASZARD'S GAZETTE.

Saturday, July 12, 1856.

A few years since, there was not on any farm in Prince Edward Island, if we except the plough and harrow, and those indispensably necessary implements that have been immemorially in use, a single labor-saving machine. Grain was, till within a very few years, threshed by the flail, and winnowed with the hand-sieve; and we are not aware who introduced the first threshing or winnowing machine, or we would do all that lay in our power to transmit their names to posterity as benefactors of their race. The first horse-rake, for hay, ever used in the Island, was imported in the year 1839 by the Central Agricultural Society from the United States, having been selected by J. D. Haszard, Esq., then on a visit to that country. Since then, they have been manufactured here, and have become so common, that no farmer of any enterprise or intelligence is without one. The same may be said of fanners or winnowing machines; these, with the exception of the iron wheel-work, are made by our own mechanics fully as complete and efficient as they could be imported. The turnip-drill is of recent importation also, and the small kind, constructed to use by hand, are getting every day into greater demand. In fact, a great change has taken place in this respect within the last 15 or 20 years, and we trust, that there will be a continuance of importations by spirited individuals of all those mechanical aids, which are of the first importance to every agricultural community, but more especially necessary in a sparsely populated country, where manual labor is at all times impossible to be obtained. It is with much pleasure, that we notice two very useful labor-saving articles which have been lately added to the number already alluded to. The first is a machine for weeding and thinning turnips, imported by the Hon. Edward Haythorne, which we have, by the kindness of that gentleman, had an opportunity to see. We regret that we did not see it in operation, but we have no doubt, that it does its work with the precision and celerity that it is said to do. It is drawn by one horse walking between the drills, and is so constructed, that the wheels run each side of the drill, and on moving, impel a wheel armed with small blades or knives, which cut out the superabundant turnips, together with the weeds, for equal spaces, leaving those intended to be grown at regular distances from each other on the crown of the drill. It is also provided with cutters at the sides, for the purpose of removing the weeds from thence. The machine is furnished in every part with adjusting screws, to enable it to work in every kind of drill, and to leave the plants at greater or less distances apart. We can hardly conceive of a more essential improvement in the cultivation of a species of crop, that has already been productive of much wealth to the farmer, and will continue to be a more abundant source of prosperity, in proportion as its cultivation is better understood. We hope that the agricultural population will testify their appreciation of the boon conferred on it by the Hon. Gentleman by the universal adoption of it. The other is a mowing machine, imported by the Royal Agricultural Society from the manufactory of Ruggles, Nourse, Mason & Co., Boston, Massachusetts. We had the pleasure of seeing this last in operation at the Farm of the Society. No letter-press description could, without plates and diagrams, give any idea of the machine or its method of working. We are satisfied however, that it will prove a valuable auxiliary to the farmer when the parties using it have become better acquainted with its properties and powers.

ENIGMA.
I am composed of twenty-three letters,
My 1, 6, 4, is the name of a domestic animal,
My 12, 3, 4, 6, 17, 5, is the name of a fabulous being and also of a constellation in the Southern hemisphere,
My 9, 18, is a personal pronoun,
My 19, 12, 15, is an article that many people roll under their tongues as a sweet morsel,
My 20, 11, 22, 17, 4, is the name of a creature without any feet, wings claws, or arms,
My 16, 17, 6, 12, 23, 20, spells a word that signifies odd,
My 11, 12, 19, 20, 6, 17, 5, 14, 15, 4, is a place frequented by those who are called after a certain Greek Philosopher,
My 15, 6, 9, 2, is a combination of sounds used to express any material substance,
My 23, 6, 20, 17, 11, 18, is the system of created things,
My 11, 6, 20, 22, 15 is what a Soldier receives for his daily subsistence,
My 14, 15, 23, 12, 18, is a female name,
My 6, 7, 9, 14, is the name of a celebrated conflict,
My whole is exciting great interest in the minds of Englishmen, Americans & Frenchmen.

Several Correspondents make out the answer to the Enigma in our last to be "Crimea"

On and after Sunday next the 12th inst., Divine Service, will be held at the New Church, near the Ferry. Lot 48, at half past three, until further notice.

Passengers.
In the Steamer Lady Le Marchant, from Pictou, on the 9th inst., Messrs. George Reed, Samuel Murray and Lady, Miss Fall, Miss Palmer, Mrs. Jarvis, Miss Johnson, Rogerick Campbell, Mrs. Gray and wife, and Charles Palmer, Esq., Rev. W. Henderson, J. Hensley, Dr. George, A. McKay, and 12 in the steerage.

20,000 feet BOARDS,
243 pieces DEALS,
510 bundles SAWN LATHS.
JAMES N. HARRIS, Auctioneer.
July 12, 1856.

THE ALEXANDER FAMILY of vocalists are performing at Pictou this week, and are expected over in the first Steamer to give a series of entertainments in this City. The following, from the *Halifax Acadian Recorder*, will give some idea of the talents of this Company:

The *American Bell Ringers* have during the week been giving concerts at Temperance Hall. The Bell music of this family is certainly a novelty and one of a very attractive description. To hear a piece of music performed by several persons upon bells, each individual having under his management a number of notes corresponding in tone to certain notes upon the scale, and so ringing them that one catches up the air of his part where another leaves it, but without any hitch or false timing in the piece, seems to be something almost marvellous. To see the thing done is a real amusement and the music thus produced is not at all of that inferior description which one might suppose. The Alexander Family must have employed much time and patience, and no small amount of musical talent to fit themselves for these performances and all who are fond of novelty should go and hear them, for they are not likely often to have such an opportunity.

(For Haszard's Gazette.)
