THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of editinary, perodicals. It is an elegant misselflany of pure, light and graceful literature; and a collection of pictures, the rarest specimens of artistic skill; in black and white. Although each succeeding number affords fresh pleasure to its friends, the real value and beauty of The Aldines will be most appreciated after it has been bound, up at the close of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, The Aldines is a unique and original conception—alone and unapproached—absolutely without competition in price or character. The possessor of a complete volume cannot duplicate the quantity of fine paper and engravings in any other THE ALDINE, while issued with all Dr. J. Waker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegar Birfine paper and engravings in any other its cost; and then there are the chromos,

"What is the cause of the unparalleled success of VINEGAR BITTERS!" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principie, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine-been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases. ART DEPARTMENT, 1874. The illustrations of THE ALDINE have won a world-wide reputation, and in the art centres of Europe it is an admitted fact that its wood cuts are examples of the highest perfection ever attained. The common prejudice in favor of "steel plates," is rapidly yielding to a more educated and discriminating taste which recognizes the advantages of superior artistic quality with greater facility of production. The wood-cuts of THE ALDINE possess all the delicacy fand elaborate finish of the most costly steel plate, while they afford a better render ing of the artist's original.

To fully realize the wonderful work which THE ALDENE is doing for the cause of art culture in America, it is only necessary to consider the cost to the people of any other decent represen-tations of the productions of great In addition to designs by the mem bers of the National Academy, and other noted American artists, THE

The original pictures were painted in oil for the publishers of The Aldine, by Thomas Moran, whose great Colorado picture was purchased by Congress for ten thousand dollars. The subjects were chosen to represent "The East" and "The West." One is a view in The White Mountains, New Hampshire; the other gives The Cliffs of Green River, Wyoming Territory. The difference in the nature of the scenes themselves is a pleasing contrast, and affords a good display of the artist's scope and coloring The chromos are each worked from thirty distinct plates, and are in size
