The Tale of Perfect Time in a Watch

From Mainspring to Hairspring, between them lies the secret. The Mainspring is the power which it transmits to the active parts of the watch. The Hairspring has the control and regulates the motion. The fitting in most delicate; imagine a 100th part of a hair. Impossible to get it right. Yet it is enough to interfere in its performance, so wonderful is the adjustment. The friction from accumulated dirt; lack of oil, etc., destroy these perfect fittings. Do not let your watch run to ruin from neglect. Remember our business is the care of watches, and our opinion costs nothing.

D. A. McRAE,

WATCHMAKER and JEWELLER.
