into the district of the Yukon. One is over the Yukon river, the free navigation of which is secured by treaty to British subjects. Another is over Lynn Canal, by either the Chilcoot or the White Pass. As has been said, the ocean terminus of this may be in United States territory. A third is by way of Takli...

SILVER IN THE UNITED STATES. A somewhat startling statement comes from Washington to the effect that the agitation in the Senate for intervention in the affairs of Spain in Cuba is part of a plan formed by the free silver leaders to compel the recognition of that metal as a money standard. They believe, says the correspondent of the New York Herald, that if hostilities can be provoked with Spain, the first and immediate effect will be a rapid withdrawal of gold, which will force the administration to throw itself upon the mercies of the silverites, who will grant no relief except on the sole condition that the free coinage of silver shall be forthwith resumed at the ratio of 16 to 1. It is further said that McKinley thoroughly appreciates this feature of the situation and is shaping his foreign policy so as to avoid such a deadlock.

CROW'S NEST PASS RAILWAY. The announcement of the government policy in regard to the construction of the Crow's Nest Pass railway will be received with great satisfaction. The subsidy of \$11,000 a mile is not very large, and the concessions made by the Canadian Pacific in consideration thereof are valuable. For \$43,630,000 the construction of 380 miles west from Kethbridge will be assured. This will mean very much to British Columbia, to Alberta and the country generally. The agreement affects not only the freight rates on the C.P.R., but the land grant to the B.C. Southern, for the 260,000 acres of coal lands are to be divided equally between the company and the Dominion government. The very gratifying statement is made that construction is to be begun at once. This is worth a very great deal to this province. Without the full details of the agreement before us, it is impossible to comment intelligently upon it, for the telegraphic synopses received, at the time of writing this article, so far is plainly incomplete. The great point is that the immediate construction of the line has been assured. This of itself is so satisfactory that we are not disposed to be very critical over details.

ROUTES INTO YUKON. The Montreal Witness is the latest sinner against geography. Commenting upon the application of the Duke of Teck's Company for certain rights in the Yukon district, it says: The Yukon gold fields are upon a very sensitive boundary line, and the company's business would have to be done through the territory of the United States, with which it would be almost sure to quarrel.

WE are not quite sure what is meant by a "sensitive boundary line." Possibly the Witness means unsettled, or one that is difficult to settle. We need to remind it that the gold fields are no more upon any boundary, sensitive or otherwise, than Montreal is. Nor is it true that the company's business would necessarily have to be done through the United States. Until the boundary of Southeastern Alaska shall be defined, there will be some question as to the ownership of the head of Lynn Canal, and hence of the starting point of this company's route into the Yukon Valley; but conceding that the ultimate decision shall be in favor of the United States, we are not inquisitive enough to conceive why a transportation company should be in any greater danger of quarrelling with the United States because it might have to cross a few miles of the territory of that country in Alaska, than there is of the Canadian Pacific quarrelling with the United States over its transportation across the whole breadth of the State of Maine.

BUT neither the Duke of Teck's company, nor any other organization desiring to trade in the Yukon, will be compelled to cross United States territory to get there. There are four routes

the attention of such individuals and of being able to make ourselves understood by them. It would also be very essential to the success of the experiment that they should know the property of selenium referred to. The matter of providing a sufficiently powerful ray of light would also present difficulties. But setting these aside as mere matters of detail, the theory is all right enough. The modus operandi is as follows: A strong beam of light is thrown upon a piece of thin silvered mica, which acts as a mirror and reflects the light to the receiver of a telephone. The person speaking directs his voice against the mica, which vibrates, the vibrations affecting the intensity of the reflected beam of light; the minute changes in the light are faithfully reproduced by changes in the selenium plate, which in its turn affects the telephone receiver, just as the vibrations of the speaker's voice affect the receiver in ordinary telephones and the words of the speaker are heard. It will be conceded that this is rather a startling proposition, even in these days of X-rays and other scientific wonders. Truly the surprises, which science seems to have in store, are seemingly limitless.

MARK HANNA continues to be the power behind the throne in United States politics. A condition of Han-narchy—so to speak. The Toronto Globe says: "The sorcerer must go." That's what's the matter. He does go like the very old Nick. 1897—A MESSAGE. O'er sea to distant lands, To loyal kin and free; We stretch our hands! Together though far off we be, Together though unsee, All join the glorious anthem we: God Save the Queen! Together though far off we be, Together though unsee, We hail the Diamond Jubilee! God Save the Queen!

OUR INTEREST IN JAPAN. As the empire lies off in the Pacific almost due west from Canada, we have a material interest in its future, as it is one of the countries with which we are likely to be bound up in closer commercial relations.—Ottawa Citizen. EASTERN BRITISH COLUMBIA. Some years ago Dr. Dawson, who knows thoroughly the geography of British Columbia, expressed the opinion that the Columbia valley, along the foot of the Rocky Mountains, was the natural highway for opening up the eastern portion of British Columbia. According to this eminent authority the valley extends for 700 miles from the boundary to the Peace River. Now-a-days one hears a good deal about the construction of railways to open up the Cariboo and Cassiar districts. We think the provincial government could not do better than obtain information about the route recommended by Dr. Dawson as an economical and efficient means of opening to the miner and the rancher the vast extent of country along the eastern confines of the province.—Golden Era.

LICENSES TO SELL STOCK. The following are two sections from the new Companies Act of Ontario: 9. No extra-provincial mining, milling or development company having its office elsewhere than in this province shall, either directly or indirectly, sell or otherwise dispose of within this province any of its shares, stock, stock certificates, or other securities by whatever name known, unless and until it shall have received from the lieutenant-governor in council a license authorizing it to sell and dispose of its shares and other securities, and any person who, in contravention of this section, sells or otherwise disposes of such shares, stock, or securities, shall, on conviction thereof, be liable to a fine of \$20 per day for every day while he so acted, and, in case the fine be not paid, shall, in the discretion of the court, be imprisoned for a period not exceeding three months.

LOD ROSEMARY has been making a speech on golf. He declares that he is afraid to learn it because "when a man is once seriously inoculated with a love of golf he is of very little use for other pursuits of society." He says that to make a deliberate choice of golf as an amusement is "second only in gravity to the choice of a wife." He talked in this half serious way for some time and must have left his hearers in doubt as to whether he believed the great game of Scotland to be worthy of its place in public esteem.

THE Columbian says it was mistaken when it said that the C.P.R. built the bridge over the Harrison river, and calls on the Dominion Government to change its name to make it less of a menace to navigation. We suppose that the only way to have the necessary change made is through the intervention and perhaps at the expense of the Federal Government.

BECAUSE Rev. Dr. Carman said in Winnipeg that the parliament buildings would cost over a million and the Colonist did not correct him, the Columbian thinks there must be something in it. Nonsense. We once heard a man say that he thought the local opposition a pretty smart lot, but we did not think it worth while to correct him.

SENATOR MORGAN says the United States is not through with its wars. The Senator is a very beligerent person, who has yet to display his fitness for anything except to absorb whiskey and spout clap-trap. THERE is an agitation on foot for a telegraph line up the Nicola valley, and the suggestion is made that the Dominion government should help it along in some way. We are in full sympathy with the aim of those who are pro-

SEE THAT THE FAC-SIMILE SIGNATURE OF EVERY WRAPPER OF EVERY BOTTLE OF CASTORIA. AVEGETABLE PREPARATION FOR ASSIMILATING THE FOOD AND REGULATING THE STOMACH AND BOWELS OF INFANTS & CHILDREN. Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. NOT NARCOTIC. Perfect Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and Loss of Sleep.

HOME RULE COMING. Important changes in connection with the direction of Baptist church affairs throughout British Columbia are at the present time engaging the close attention of all connected with, or even casually interested in, the work of that denomination. In the past the management of the church in British Columbia has been united with that of the churches in Western Washington under the title of the Convention of the Northwest—"convention" being the term applied by the Baptists to the governing church body similar to the Synod of the Anglican or Presbyterian churches, or the Conference of the Methodists. The Northwest Convention has enjoyed direct connection with and received assistance from the American Home Mission Society since its formation in 1860, the \$1,300 being devoted to the church work in British Columbia during 1896 out of the Mission funds, and the provincial churches paying back into the treasury probably as much as half of this sum.

MEAMI, Fla., June 1.—The steamer Biscayne and crew of six men are under arrest here charged with having transferred a cargo of arms, ammunition and men to the tug Dauntless early yesterday morning. According to agents who were the transfer consisted of several hundred thousand rounds of ammunition, one and a half million cartridges, and one hundred and sixty men. The steamer was boarded by special agent Hamblen, of the Treasury department, who placed her under arrest. He was then seized by several Cubans, his revolver taken from him, and he was beaten about the face and body. He was held until the transfer was completed when he was put ashore. The Dauntless proceeded north. A report of the capture of the Dauntless is not believed to be true.

Good Blood. Is essential to health. Every drop of the system is reached by the blood, and on its quality the condition of every organ depends. Good blood means strong nerves, good digestion, robust health. Impure blood means scrofula, dyspepsia, rheumatism, catarrh or other diseases. The way to have good blood is to take Hood's Sarsaparilla. This medicine purifies, vitalizes, and enriches the blood, and sends the elements of health and strength to every organ, organ and tissue. It creates a good appetite, gives refreshing sleep and cures that tired feeling. Remember, Nothing Better. Miss Emily Craig, Almonte, Ont. says: I have never found anything better than your Sarsaparilla for Wild Strawberry (or pain in the stomach or diarrhoea). Few doses cured me of severe diarrhoea after other medicines had failed. We always keep it in the house and have every confidence in its virtues.

CASTORIA For Infants and Children. The Fac-Simile Signature of Dr. H. H. Fletcher is on every wrapper. Nothing Better. Miss Emily Craig, Almonte, Ont. says: I have never found anything better than your Sarsaparilla for Wild Strawberry (or pain in the stomach or diarrhoea). Few doses cured me of severe diarrhoea after other medicines had failed. We always keep it in the house and have every confidence in its virtues.

THIRTY-NINE OHIO MOB BRIGADE. Citizens of Urbana Co. With the Author Receive a Fatal Blow. The Soldiers Ordered Mayor and Possession of the Urbana, Ohio, June 4. Elias Canner, the wife publisher of the Urbana publisher assaulted by C. alias Click Mitchell, a victim was thrown to a locked up in the city prison count of the feeling was county jail the same night. That night the jail by a threatening mob the sheriff's posse company of the Ohio N. Last night the situation threatening than ever, but he at first refused militia from any other Later, however, he consented to the limit of Springfield for help. He was empanelled yesterday was indicted for criminal bringing Mitchell into uniform. Mitchell, who scared, pleaded guilty to the limit of the trial lasted only a few Mitchell wanted to get a carriage drove up to the rushed in to get Mitchell. The sheriff remained for with the prisoner while general rush from the crowd around the jail was BOWLING FOR THE and being determined to had crowded into the jail making for the jail. Leonard, in command, addressed the crowd, a three minutes to disperse general rush from the crowd again returned. The noise had subsided station was less pronounced half an hour had passed that the order was given, ing of musketry was heard. There was fired until a shot had been sent to the offices. It was about 2:30 morning when the shot people around the jail. The volleys resulted in this city, being shot through and instantly killed. A named Higgins was shot body and also killed in Craney, of Urbana, was right foot; Dr. A. Charles North Leadbury, was wounded in the forehead; Y of Cable, was shot in the eye seriously; Ray Dickers this city, was shot in the shoulder; McLaughlin, was the muscle of the right arm, who was standing on received a slight wound in John Wank was shot in the firing, and in view of refusal of the people to order Business telegraph field, ordering company Third Infantry to come on.

THE SPRINGFIELD arrived at 7:30 a.m., and marched toward the court.

SMOTHERING FROM HEART DISEASE. DELAY MEANS DEATH. One Dose Relieves—A Few Bottles Always Cure. For ten years I have suffered greatly from heart disease. Fluttering of the heart, palpitations and smothering spells have made my life miserable. When dropped out in my physician said I must prepare my family for the worst. All this time I have seen Dr. Agnew's Heart Cure advertised. As a last resort I tried it, and think of one joy when I received great relief from one dose. One bottle cured by dropsy, and brought me out of bed, and five bottles have completely cured my heart. If you are troubled with any heart affection, and are in despair, as I was, use this remedy, for I know it will cure you.—Mrs. James Adams, Syracuse, N.Y. Sold by Dean & Nicocks and H.A. & Co.
