

# LOOK!

If you were told of a new discovery for the treatment of coughs, colds and bronchitis, as certain in its action on all chest troubles as anti-toxin is on diphtheria, or vaccination on small-pox, wouldn't you feel like giving it a trial? Especially if you could try it for fifty cents!

**Peps is the discovery!**  
Peps are little tablets, neatly wrapped in air and germ-proof silver foil. They contain certain medicinal ingredients, which, when placed upon the tongue, immediately turn into vapour, and are as once breathed down, the air passages to the lungs. On their journey, they soothe the inflamed and irritated membrane of the bronchial tubes, the delicate walls of the air passages, and finally enter and carry relief and healing to the capillaries and tiny air sacs in the lungs.

In a word, while no liquid or solid can get to the lungs and air passages, these Peps fumes get there direct, and at once commence their work of healing. Peps are entirely distinct from the old-fashioned liquid cough cures, which are merely swallowed into the stomach, and never reach the lungs. Peps treatment of coughs and colds is direct treatment.

If you have not yet tried Peps, cut out this article, write across it the name and date of this paper, and mail it (with 10c stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps at 50c. box.

## JAILED FOR MONTH

Brantford, Oct. 5.—The way of the Indian transgressors is hard, especially when they partake of forbidden liquid refreshments on forbidden property. Dominion Government Detectives Reid and Champton arrested Harry Smith at the Ohsweken Fair for being drunk and James Hill for having liquor hidden in the oat box in his barn. They were immediately arraigned before Gordon J. Smith, Superintendent of Indian Affairs, who was on the premises. He sentenced the former to thirty days in jail and fined the latter \$15 or thirty days. He took the thirty days.

## CANON SHEEHAN, NOTED WRITER, DEAD

London, Oct. 7.—Rev. Patrick Augustine Sheehan, D. D., essayist and lecturer, and Canon of Cloyne, Ireland, since 1903, died today. He was born in Mallow, County Cork, on March 19, 1852. Canon Sheehan was noted as a writer. He was the author of several books, including Luke Delmage, My New Curate, and The Triumph of Failure.

## BIG GAME IN N.B. IS PLENTIFUL

Intention of Government to Shorten Season Next Year

"Big game is plentiful in the province this season, and although the hunters have not been as successful as usual, it is likely that with the beginning of October their luck will change for the better," said A. E. O'Leary, chief game warden for New Brunswick, who was at the Victoria Hotel in St. John recently. "We have had a warm summer, and the trees have kept their foliage longer than usual, and for that reason, according to the old guides, the moose have not been calling as usual. It was the intention of the government to change the date of the opening of the hunting season from September 15th to October 1st; but many of the guides had made arrangements to take in hunting parties in Sept. and it was not made. Next year, however, the opening of the season will not begin until Oct. 1st. That is time enough. The mating season does not really begin until October, and unless the moose are calling it is pretty hard to shoot one. Everywhere else they are shortening up the hunting season, and though big game is plentiful in New Brunswick, it is well to conserve it."

"Very few people have an adequate idea of the importance of our big game. Last year the number of moose, deer and caribou shot in this province was over 5,000. That means a big thing. Last season shooting licenses were issued to 518 non-residents and 9,752 residents. Besides, 44 licences to shoot deer, and 74 licences to shoot birds were issued. Licenses were also issued to 316 guides, and 68 camp helpers. Mr. O'Leary gave the following tabulated statement of the big game shot in the province last year:

District No. 1.				
	Moose	Deer	C'bou	
Restigouche	82	92	12	
Gloucester	172	80	1	
Northumberland	424	650	108	
Totals	672	822	121	
District No. 2.				
	Moose	Deer	C'bou	
Albert	80	163		
King's	121	148	2	
Westmorland	82	203	1	
Kent	140	280	7	
Totals	423	794	10	
District No. 3.				
	Moose	Deer	C'bou	
York	141	109	6	
Sunbury	81	109	6	
Queen's	146	304	18	
St. John	68	98		
Totals	436	620	30	
District No. 4.				
	Moose	Deer	C'bou	
Charlotte	83	164		
Carleton	72	204	4	
Victoria	104	209	13	
Madawaska	55	72	1	
Totals	314	649	18	

The chief game warden said the people of the province were every year showing greater appreciation of the importance of conserving the game supply, and that nearly every

## TO BENEFIT OTHER SUFFERERS

You May Publish My Letter About "Fruit-a-lives"

Mr. Jones is proud to acknowledge the great debt of gratitude he owes "Fruit-a-lives". He is glad to have his letter published in order that other sufferers may be induced to try these wonderful tablets made of fruit juices.

SARNIA, ONT., FEB. 5th, 1911  
"I have been a sufferer for the past 25 years with Constipation, Indigestion and Catarrh of the Stomach. I tried many remedies and many doctors, but derived no benefit whatever. Finally, I read an advertisement for "Fruit-a-lives". I decided to give "Fruit-a-lives" a trial and they did exactly what was claimed for them. I have now taken them for some time and find they are the only remedy that does me good. I have recommended "Fruit-a-lives" to a great many of my friends, and I cannot praise these fruit tablets too highly."

PAUL J. JONES.  
Get a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

## FATAL FALL

Montreal, Oct. 5.—While walking in her sleep early yesterday, Mrs. Milloy of St. James street, slipped and fell when approaching a staircase, rolling down to the first floor. The fall awoke the rest of the family, and they all came running down, to find the unconscious form of the somnambulist. An ambulance was summoned from the Western Hospital, and the unfortunate woman was removed to that institution. There it was found that Mrs. Milloy was suffering from a fractured skull and that a operation had to be performed. Mrs. Milloy died later in the day.

## NOX A COLD 108 WHILE YOU SLEEP

The most remarkable Cough and Cold remedy known to science. For all lung and throat trouble it has no equal. 25c and 50c per bottle, at all drug stores.

A doctor attended an old lady who had caught a cold. "Did your teeth chatter when you felt the chill coming over you?" asked the doctor. "I dinna ken, doctor; they were lying on the table," was the pleasant reply.

farmer in some countries interested himself in the protection of game.

Hunters from all parts of the United States, Canada, and even Great Britain now come to New Brunswick to hunt big game, and they leave quite a lot of money in the province. Mr. O'Leary said that, according to reports from guides and hunters, moose were in an excellent condition this year.

## ENORMOUS WASTE IN MANUFACTURE

145,000 Cords of Wood Pulp Are Lost Annually

In the manufacture of chemical wood-pulp by the sulphite process, one-half of every cord so treated is dissolved by the liquor in which the wood is boiled, and is discharged into the adjacent rivers as waste liquor. According to the latest bulletin of Pulpwood, issued by the Forestry Branch, Ottawa, the amount of pulpwood subjected to this chemical treatment in 1912 was almost two hundred and ninety thousand cords. One-half of this amount was absolute waste. The average price of a cord of pulpwood is six dollars, so that this waste, reduced to its money equivalent, represents a loss to Canada of over eight hundred thousand dollars.

Nor is this the only loss, for by this process 140 pounds of sulphur are required to dissolve the waste materials out of each cord of wood. Some of the gases generated in the process are recovered, but most of the sulphur passes off in the waste liquor, and no method has yet been found to recover it for a second time. Sulphur costs twenty-five dollars a ton, and the loss in this particular is equivalent to a money loss of over half a million dollars on the total amount wasted.

In view of the fact that each year more and more pulp-wood is being manufactured into pulp by this process in Canada, the utilization of this waste liquor becomes an important problem. Even the most practicable method so far devised does not recover enough valuable products to make it pay.

The waste liquor contains many materials, such as oxalic acid, tannin, extracts, dyestuffs and alcohol constituents which, if they could be easily recovered, would make the liquor of great commercial value; but in spite of the tremendous amount of work which has been done on the subject, especially in Europe, the problem still remains for the most part unsolved. As the liquor also contains carbohydrates, it should be possible to obtain turpentine, and eventually it may be possible to obtain rubber from it. In furthering the solution of such problems and in eliminating other forms of wood waste, the new Forest Products Laboratories being established by the Dominion Government at McGill University will doubtless play an important part.

## Sallow Complexion

Indicates indigestion, constipation or liver trouble. FIG PILLS will regulate your system and build up the nerve forces so that you can sleep and enjoy life. At all dealers 25c and 50c. The Fig Pill Co., St. Thomas, Ont.

## ENGLISH YEOMEN FOR PROVINCE FARMS

Secretary of Farm Settlement Board, Receives Cablegrams Asking for Reservations

Two cablegrams from England were received yesterday by the secretary of the Farm Settlement Board asking for reservations of farms held by the board for new settlers. In both cases the farms asked for were large, and evidently the parties wanting them are men of considerable capital. Mr. Gilchrist said yesterday that the number of enquiries for farms under the Settlement Act coming in from the Old Country was increasing rapidly, and that the indications were that "next year the board would have its work cut out finding ready-made farms to meet the demand."

There seems to be little doubt that the farm settlement plan, hit upon an excellent device for advertising the province and securing new settlers. Some of the enquiries received from England have indicated some suspicion that the opportunities offered by the act for taking up farms were too good to be true, but evidently since the act has gone into operation the reports which have been sent to the other side by new settlers have been of such a nature as to develop increasing interests in the ready-made farm scheme. The members of the board chosen to administer the act are all practical farmers, and they have used the best of judgment in the selection of farms for new settlers, as some of the letters received from men who have taken up farms under the act have contained many expressions of satisfaction.
