A DEL TIME.

When the Barth Drinks up Her Oceans Prof Cookley, of New York, says: Most of the planets have probably cooled down by radiation to a solid under cooled down by radiation to a solid under crust like the earth. The sun owing to his greater mass is still a fiery globe not yet cooled down so as to have a solid crust. But our moon being a body of small mass only about one-eightieth of the earth's mass, is supposed to have had time to cool down to a solid globe all the way from its surface to its centre. Its internal heat is supposed to have been all radiated away into the surround. ing cold space. Now the hot interior mass of the earth can, of course, contain no water, and little or none of the free gases that constitute an atmosphere would be boiled off, expanded and driven to the surface where are found now the great bulk of where our oceans and our atmosphere. But when the earth shall have parted with all its internal heat, having thrown it into the surrounding cold space as the moon has done, then the cold, solid but porous mass within its present crust, which is now incapable of absorbing water or air, on account of the present high temperature, will begin to drink up the water and air just as the parched soil after a summer's drought drinks up the rain, and the ground is dry in a few minutes after the shower. But you may well ask, could the solid porous mass within the present crust of the earth thus drink up the whole of the waters of the Atlantic and Pacific Oceans and cause all the waters of our globe to disappear? Let us examine this more While the interior of the earth remains

ager,

as hot as it is at present it is no more ble for the water and air of our globe to penetrate to those fiery regions than it is for a drop of water to remain on a hot stone. But the earth is losing its heat day by day and year by year radiating it out into the surrounding cold space. I know it has been compute that the earth receives from the sun annually just as much heat as it loses in a year by radiation into the surrounding space. Grant that it be so for the present and for many thousands of years to come. But the trouble is that the sun himself is cooling off, and, therefore, will not be always able to send us as much heat as he does at present. The time will, therefore, surely come when we shall lose more heat by radiation into space than the sun will be able to return to us. Then it will be only a question of time for the earth gradually to cool down, as the moon has already done, from surface to centre. When that time comes will not the dry but solid and porous core of our globe drink up the oceans and atmosphere, causing solid and porous core of our globe drink up the oceans and atmosphere, causing them to disappear, not into large cavernous pockets, but into the minute pores of its substance?

The proposition appears to be established by strict calculation that the improvement of the strict calculation that honey ien from the air at the rising of the stars and whenever there was a rainbow; Pliny, that it comes out of the air at about day-break; whence, he adds, "we find the leaves bedewed with honey when the leaves bedeved with honey when the leaves bedewed wit

able to absorb more than four times, possibly more than thirty times, the amount of water now on its surface. Now, it seems certain that in the manner first explained the earth will continues to lose both its.

Decentals Refer to You?

—Are you troubled with biliousness, dyspepsia, liver or kidney complaints, or bad blood? If so you will find a certain cure it cannot reach us as pure as it starts, but has to be polluted by the various substances it meets in coming through the air. Now, it seems certain that in the manner first explained the earth will continues to lose both its superficial water and its atmosphere. The earth, the other planets, and even the sun himself, are regarded as decorded at some future. are regarded as doomed at some future day to the same fate. Melancholy fate, some will say. But why complain of the general law of nature? Everything in nature has its morning of life, its high mature has its morning of life, its high meridian of glory and strength, its evening decline and its midnight of blackness and death. Is the case of a world—is that the last term of a series?

Macedonians found the sugar-tank in the sugar-tank in

A New Style of Umbrella. There is a man in St. Louis who has invented a combined ear trumpet, speak-ing trumpet, and umbrella, which proves to be an unalloyed blessing to deat people. The newly invented instrument does not differ in appearance from an ordinary umbrella; the umbrella stick is, however, hollow, and the handle has the usual bell-shaped aperture of the ear trumpet. A deaf man owning one of these instruments, and desiring to converse with a friend, places the point of the umbrella in his personal ear and turns the bell towards his companion. He has thus an efficient ear trumpet, and he can use it without exciting the slightest suspicion that he is deaf. Spectators will merely notice that he is holding an umbrella to his ear, and will in an umbrella to his ear, and will were developed in the decomposing were developed in the decomposing to be an unalloyed blessing to deaf ing an umbrella to his ear, and will suppose that he is an eccentric person— a philosopher for instance—who is listen-ing intently to remarks of an unusually ofound character. When two umbrellas are used even the deafest of men can hear. In this case the deaf man uses one umbrella as an ear trumpet, and his companion uses the other as a speaking trumpet. A conversational duet on two umbrellas can thus be readily carried on without attracting the disagreeable attention that an ordinary ear trumpet always attracts. The new umbrella also has the great merit of being a genuine musical instrument. For a trifling addition to its cost the inventor will supply it with pistons, converting it into a B flat cornet. An instrument of this kind is now on exhiinstrument of this kind is now on exhibition at the inventor's office in connection with an excessively deaf man, who, after conversing on any subject for half an hour, by the help of an umbrella trumpet will play a selection of popular airs on the instrument without extra hour, by the help of an umbrella ampet will play a selection of popular s on the instrument without extra trage. It will at once be seen that the pularity of the new umbrella will be confined to deaf people. Every son who plays the cornet will be glad have a cornet disguised as an umbrella capable of being used to shelter him a rainstorm. In some parts of the charge. It will at once be seen that the not be confined to deaf people. Every person who plays the cornet will be glad to have a cornet disguised as an umbrella and capable of being used to shelter him and capable of being used to shelter him from a rainstorm. In some parts of the country it is unsafe for a cornet player to carry his instrument in his hand, for popular indignation may at any moment take the forms of bricks and eggs of the kind known to Mr. Logar and told dvilled singly then in squade and then take the forms of bricks and eggs of the kind known to Mr. Logan as "old veterans." It will always be safe, however, for any person to display an umbrella trumpet, since no one can possibly detect by its appearance when folded that it is not an umbrella. The only fault that can be found with the St. Louis man's invention is that he has St. Louis man's invention is that he has not made it available as a rifle, and a fishing rod, and fitted it with a beer keg attachment. However, it is a good thing as it is, and will doubtless make

the inventor a rich man .- N. Y. Times Why is a man who spoils his children like another who builds castles in the air?—Eccause he indulges in-fancy too

A Total Wreck. -Many a strong frame has been totally wrecked by rheumatism. D. McCrimmen of Lancaster, was cured of ebronic rheu-matism by Burdock Blood Bitters. It cures all blood impurities.

When the Leaves Turn Brown How will it be when the reses fale, but of the garden and out of the glades When the fresh pink bleem of the sw from the dell like the cheek of a

ged for dry hips on a thorny bush? Then scarlet and carmine, the groves will flush Flow will it be when the autumn flowers Wither away from the leadess bowers: When sun-flower and star-flower and golden-Glimmer no more from the flosted sod, and the billside necks are empty and cold? Then the forest tops will be gay with gold. How will it be when the woods turn brown, Their gold and their crimson all dropped dewa, And arambled to dust?

of the things one day. When they pluck them a stocking is kept on the head to blind the bird. While he cannot see he is quiet, but if his blinkers get uncovered then he "goes for" the plucker. The doctor moved his arms so as to disturb the stocking, and instantly he saw what he had done, and went head first out of the pen, not caring for any more plumes just then. As he tumbled head first over the fence the bird—he was a jack one, of course—let fly a kick, which, striking a fence board, made toothpicks of a whole panel length. The mule's occupation as a kicker is gone in this country since the ostrich came. O, then as we lay
Our ear to Earth's lips, we shall hear her say,
"In the dark I am seeking new gems for my
orown."
We will dream of green leaves, when the woods
turn brown.
—Lucy Larcom, in the Floral Cabinet.

We worship in our youth, In wild and passionate dreams, some vague Ideal Till fancy yields to truth, And we transfer our worship te the Beal.

Sever;
Their meeting is the link
In the firm shain that bindeth them forever. Else, wherefore, when I gazed
For the first time at thee, why did it seem
As if the veil were raised
That hid the ide! of my life's bright dream?

I would that thou couldst know How much I love thee; but it may not be; Words my deep feeling show Only as shells recall the murmuring see.

But if in some bright sphere Our parted spirits meet and reunite,
The love I bear thee here,
Relumined there, will burn with quenchles
light. - [Every Other Saturday.

Ancient Love of Honey.

bees. The ancients used honey as ex-

Adam Forepaugh, jr., says that African elephants are more intelligent, imitative and cunning than the Asiatic.

In training elephants the best method is to win them over by petting and feeding them with something nice. I

Especially to Women.

Especially to Wemen.

"Sweet is revenge especially to women," said the gifted, but naughty, Lord Byron. Surely he was in bad humor when he wrete such words. But there are complaints that only women suffer, that are carrying numbers of them down to early graves. There is hepe for these whe

with best results.

A false count—the kind that rich American girls generally marry.

—Miss Mary Campbell, Elm, writes:

"After taking four bottles of Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, I feel as if I were a new person. I had been troubled with dyspensia for a number of years, and tried many remedier, but of no avail, until I used this celebrated Dyspeptic Cure." For all impurities of the blood, sick headache, liver and kidney complaints, costiveness, etc., it is the best medicine known.

Woman is a luxury. Unless a man's The bodies of Alexander the Great The bodies of Alexander the Great and of the Spartan King Agesipolis were preserved in honey. The ancient Assyrians also used the same substance for embalming. Its preservative effects are, however, only temporary, for, although it prevents the entrance of the germs of decay for a time, it is itself ultimately exercised by decay, and the bodies it Woman is a luxury. Unless a man's oircumstances permit of luxuries he had better be content with sewing on his own

pounds.

with best results.

collar studs.

—West Toronto Junction is within a few minutes of the Union station by the trains of either the Ontario and Quebec and the Grand Trunk or the Northerr. Real estate in the neighborhood has steadily risen in value and promises to advance still more rapidly. Some of the best lots in West Toronto are to be had from George Clarke, 295 Yonge street.

A young society lady of Philadelphia was A young society lady of Philadelphia was recently asked what "faux pas" was. She replied with native pride that he was the

eled to any extent in Mexico has been sub-jected to great annoyance owing to the rules in operation on nearly all the rail-ways relative to baggage. A traveler until recently was not allowed to carry his until recently was not allowed to carry his own value without paying for the privilege. Every article he carried that was not part of his personal attire paid its rates, and even a hat in its box under his arm was taxed. tensively as they did, probably, because they had not learned to extract sugar from the cane. Nearchus says the Macedonians found the sugar cane in

India, referring probably to the bamboo and its sweet juices, and Diodorus and Theophrastus speak of the sweet juice produced by a cane or reed-like plant; but, if cane-sugar was known at all in antiquity, it was known only as a rarity, and honey was still the pre-eminent sweetener. The ancients were well acquainted with the variations in the quality of honey, according to the season when it was stored and the plants.

Was taxed.

—A dilapidated physique may be built up and fortified against disease by that in onparable promoter of digestion and fertilizer of the blood, Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure. It counteracts biliousness and kidney complaints, overcomes bodily ailments special with the feebler sex, causes the bowels to act like clockwork, and is a safeguard against malaria and rheumatism. ity of honey, according to the season when it was stored and the plants

A man does not need much mucilage to make a bad reputation stick to him. That, the peor, and a mother in law he has always with him.

—O. E. Comstock, Caledonia, Minn., writes: I was suffering the most excruciating pains from inflammatory rheumatism. One application of Dr. Thomas' Eclectric Oil afforded almost instant relief, and two bottles effected a permanent cure. manent cure.

A train of sixteen mules, fifteen loaded with whisky, and one with flour, arrived at Eagle a few days ago, and a man from Montana wanted to know what they were going to do with all that flour.

Some ancient writers imagined that bees were developed in the decomposing bodies of animals, and an Arcadian shepherd is credited with having discovered the art of cultivating them in this way. Melanchthon believed something of the kind, and saw in it evidence of Previdence and a public symbol of going to do with all that flour.

—Mrs. W. J. Lang, Bethany, Ont., writes: I was one of the greatest sufferers for about fifteen months with a disease of my ear similar to ulcers, causing entire deafness. I tried everything that could be done through medical skill, but without relief. As a last resort, I tried Dr. Thomas' Eclectric Oil, and in ten minutes of Providence and a noble symbol of the Christian Church. Honey formed an important article of trade in the midout relief. As a last resort, I tried Dr. Thomas' Eclectric Oil, and in ten minutes found relief. I continued using it, and in a short time my ear was cured and hearing completely restored. I have used this wonderful healer successfully in cases of inflammation of the lungs, sore throat, coughs and colds, cuts and bruises, &c., in fact it is our family medicine. dle ages, but gradually declined under the competition of cane-sugar. The destruction of the monasteries at the time of the Reformation caused also a limitation in the use of wax-lights, and a reduction in the demand for comb. When a cashier becomes unsteady a lepositor is in danger of losing his balance. Training Elephants for Circus Tricks

THE COMBAULT'S

Is undoubtedly the most valuable and reliable Veteriary Remedy ever discovered. It has superseded the Actual Ca. tery or hot iron; produces more than four times the effect of a blister; takes the place of all linimerts, and is the salest application ever used, as it is impossible to produce a scar or blemish with it. It is a powerful, active, reliable six o'clock in the evening. They are drilled singly, then in squads, and then taught their various "specialty" acts and tricks. Elephants are more imitative than any other animal perhaps, and are very cunning. While practicing they are looking for an opportunity to "cut up," and will reach back and kick the trainer, and then look as innocent as a truant schoolboy. They seem almost human enough to talk. The importation of elephants has increased ten-fold within the past decade. and safe remedy that can be manipulated it will for severe or mild effect. Thousands of the best Veterinarians and Horsemen of this country testify to its many wonderful cures and its great practical value. It is also the most economical remedy in use, as one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mix-ture ever made. Price \$1.50. Sold by druggists, or sent, charges paid by LAWRENCE, WILLIAMS & CO., Sole —Stationmaster, to suspicious looking lady (aged), who had just entered a first-class compartment—"Are you first-class, ma'am?"
