THIRTEENTH YEAR.

PLANET MARS AND ITS MEN.

THE "RED STAR OF WAR" NOW WATCHED BY ASTRONOMERS.

It is inhabited?—If thinking Martians or some other life upon our planet, they probably have seen these curious signs. Have you discovered?

San Francisco, Aug. 3.—Are the people on the planet Mars trying to signal the earth?

That is the question which the work of the Great Lick telescope during the past few days has aroused. Mars has approached nearer to earth than the big California instrument, which will to-morrow night have opportunities for observation such as were never known before in the history of astronomy.

The present great attention to Mars is easily explained. To-night he will be in opposition—i.e., the earth will come directly between the sun and Mars, and the sun's rays will be shining upon Mars from the opposite side of the earth.

Moreover, at this period Mars is at one of its most favorable positions for observation. To-night Mars will be about 35,000,000 miles from the earth—a very short distance for even an ordinary telescope to span.

But the main reason for the great attention to Mars is that it is at one of its most favorable positions for observation. To-night Mars will be about 35,000,000 miles from the earth—a very short distance for even an ordinary telescope to span.

It will be remembered that Mars only became a subject of extreme importance 15 years ago when it last approached Earth. At that time not only were its two moons discovered by an American astronomer, but the great observatory at Milan was enabled to map its surface so as to show almost all the planet.

Mars has been under constant observation for more than three weeks past at the observatory. It is now larger and larger each evening, and to-morrow night it will be at its largest. It is now larger and larger each evening, and to-morrow night it will be at its largest.

It is admitted by all astronomers that the physical conditions upon Mars are very similar to those upon the earth. The atmosphere is very thin, and the temperature is very low.

That is as far as the astronomers will go. Astronomers form one opinion, and the other class of people who are interested in Mars has not been proved to exist. To their exact mathematical minds, it is a very different matter.

With the known age of the planet, its physical formation, as discovered by the astronomers, scientists could not deny that it was inhabited without resorting to a large degree of speculation.

On the other hand, it is also true that the work of Schiaparelli, the Italian astronomer, played a very important part in the observations now being made at the Lick Observatory.

After the last opposition of Mars, 15 years ago, he was enabled to map its surface in a way which went far beyond anything that had been done before.

There were configurations, as he has demonstrated, which, if they were of natural origin, would have been impossible to have been produced by any other means.

It followed as a matter of course that the results must have been a stage of civilization in some respects at least superior to that prevailing on earth.

The observations made at the Lick Observatory have already been so extraordinary that it is not surprising that the results have been so extraordinary.

This may be the explanation of the strange phenomena observed this week at the Lick Observatory. The results have been so extraordinary that it is not surprising that the results have been so extraordinary.

THE NO-CONFIDENCE MOTION

LEADING LIBERALS HOLD A CONFERENCE WITH MR. GLADSTONE.

Her Majesty's Privy Council Gives Judgment in Favor of the Bishop of Lincoln—Parliament to Issue a Petition Protesting Against the Honors of Michael Davitt and Patrick Pellan.

LONDON, Aug. 3.—Mr. Gladstone fully resumed work on the subject of the no-confidence motion. He held a conference with the leading liberals, including Mr. Chamberlain and Mr. St. John.

Mr. Gladstone also held a conference to-day with Mr. Chamberlain, Mr. St. John, Mr. Chamberlain, Mr. St. John, Mr. Chamberlain, Mr. St. John.

ALICE MITCHELL IN AN ASYLUM.

She Was Allowed to Gather Flowers From Her Victim's Grave.

Memphis, Aug. 3.—Alice Mitchell was taken to the insane asylum at Bolivar, Tenn., to-day. She first expressed a desire to visit the grave of her victim, Frank Ward. Her request was granted, and in company with Sheriff McLendon, she was driven to the cemetery. She displayed great emotion, and, as she gazed upon the little mound of earth, tears flowed in great profusion.
