

LIVER LAZINESS

Those Who Lack Energy and are Unsuccessful Should Read This Closely.

"I am only thirty years old, yet for almost two years I have felt more like seventy-five. I have found it difficult to sleep at night and in the morning feel so depressed and heavy that effort was difficult. My hands were always clammy and perspiration on slight effort would break out all over me. It was not unusual that I should begin to brood over the chance that I should soon be unfit to do my work, and this dread made my sleepless nights perfect misery. After repeated trials of medicine and mixtures Dr. Hamilton's Pills gave me the first gleam of hope. From the very first I could see they were different in action from other pills. They didn't gripe and acted as naturally as if nature and not the pills were cleansing my clogged up system. My spirits rose, I felt much better, the sluggish action of the system gave way to normal activity. Dizziness and headaches ceased, appetite, good color, and ambition to work returned and have remained. I am like a new man and I thank Dr. Hamilton's Pills for it all."

This was the experience of J. E. Parkhurst, a well-known grocery dealer in Jefferson. Follow his advice, use Dr. Hamilton's Pills for your stomach, kidneys, and liver, and you'll enjoy long life and robust good health. All dealers sell Dr. Hamilton's Pills, in yellow boxes, 25c. per box, from The Cutarrhione Co., Kingston, Ont.

A handsomely illustrated weekly, largest circulation of any scientific journal. Terms for Canada, \$1.00 a year, postage prepaid. Sold by MUNN & Co., 361 Broadway, New York.

Perpetual Youth

A Case in Which It Would Not Work Well

By F. A. MITCHEL

"I see by the newspapers," said Reinhard, "that these institute fellows who have been substituting knee joints in the legs of human beings and otherwise repairing the human body claim that they are on the way to cut out substances which lead to decay or bring on old age and when they succeed we shall always be able to remain young."

"H'm!" grunted Von Buest contemptuously.

"You seem to doubt the possibility of such a result?"

"Doubt it? It has been done long ago."

"Been done long ago! What do you mean, professor?"

Professor Von Buest took his pipe out of his mouth—he was always smoking—and, looking the other in the eye, said:

"Reinhard, the conceit of this age is intolerable. Most of our discoveries are accidental, though I will admit that nowadays our scientists are drawing out nature's secrets by scientific experiment. Why shouldn't what has been accidentally discovered today have been accidentally discovered before?"

"Because such discoveries electrify the world, and we all know of them."

"Some of them do now that knowledge is so widely diffused. But you who are German know that there still remain in the fatherland those who investigate for the love of science and, despising the world, do not always give out their discoveries, and when they do it is because they will benefit mankind."

"What do you mean by saying that the elixir of life has been discovered?"

"I did not say that. Listen to me and I will impart a secret. Pasteur did not begin our present methods of microbe investigation. Jenner began it a century ago. Why should the idea lay dormant from the time of Jenner's suggestion till Pasteur took it up and developed it? It did not lie dormant."

"Because such discoveries electrify the world, and we all know of them."

"In what way? In the case of Wilhelmie, would long for age, if not for death. Her associates would grow old while she would remain young. She would have experience which is incompatible with youth. She would belong neither to her own generation nor the one next below her. Having no proper position, being identified with no particular age, she would be a worse enemy to herself than the microbe that produces the decay of old age. All in vain. The opportunity to preserve his daughter's youth and beauty was too tempting for him. He gave me no peace till I consented."

"When I began to give Wilhelmie the antitoxin she was sixteen years old. Hers was my first case and my only one in practicing upon a human being after having satisfied myself of the efficacy of my remedy, and naturally my efforts were not at once successful. I did not completely arrest Wilhelmie's natural decay till she was midway between seventeen and eighteen."

Von Buest paused and resumed his pipe.

"Well, professor," said Reinhard impatiently, "go on."

"In what way? In the case of Wilhelmie, would long for age, if not for death. Her associates would grow old while she would remain young. She would have experience which is incompatible with youth. A DRUGGIST IN WINNIPEG

Cured Himself With GIN PILLS

No greater compliment could be paid GIN PILLS than to have a druggist use them. Mr. Rogers being in the business, tried all the ordinary remedies, but it was not until he used GIN PILLS that he was cured of a severe pain in the back.

Winnipeg, May 19th, 1912.

"In the autumn of 1911, I suffered with a continual pain in the back. As a druggist, I tried various remedies without any apparent results. Having sold GIN PILLS for a number of years, I thought there must be good in them otherwise the sales would not increase so fast. I gave them a fair trial and the results I found to be good."

GEO. E. ROGERS.

GIN PILLS must cure you or your money will be refunded, 50c. a box, 6 for \$2.50. Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto.

found something different, something to freshen me. To him alone I confided my secret. I had cause to regret my confidence. He had a daughter fifteen years old, a lovely, beautiful girl. 'Could you keep her as she is today,' he said to me, 'the rest of my life would be supremely happy.'

"I sighed, for I knew that a desire to preserve his daughter's youth would master him and he would pursue me till I consented to give her perpetual youth. I paid no attention to this first broad hint, but it came again and again and finally took the form of a definite request."

"For a year I resisted, assuring Welsbard that if I consented the day would come when his daughter, Wilhelmie, would long for age, if not for death. Her associates would grow old while she would remain young. She would have experience which is incompatible with youth. She would belong neither to her own generation nor the one next below her. Having no proper position, being identified with no particular age, she would be a worse enemy to herself than the microbe that produces the decay of old age. All in vain. I did not completely arrest Wilhelmie's natural decay till she was midway between seventeen and eighteen."

Von Buest paused and resumed his pipe.

"Well, professor," said Reinhard impatiently, "go on."

I replied, 'only so long as it may be desired.'

"His face lighted with pleasure. 'Can you re-establish the ordinary process of growing old?' he asked."

"There is nothing to re-establish. Let your daughter stop taking the antitoxin and the natural decay will be resumed."

"I did not see Welsbard for a week, at the end of which time he looked more lugubrious than ever. I asked him what troubled him. He told me that he had proposed to his daughter to cease taking my antitoxin and she had flatly refused. Welsbard had very unwisely told his son-in-law that his wife could resume the process of following him to old age if she chose, and he had urged her to do so. She was obstinate, and a quarrel had ensued between the two that bid fair to wreck their happiness forever—that is, all that was left of it."

"And here, my friend, comes an instance of the unity of nature. A unity young and beautiful, and every year we believe her decrees are misfortune. There was every reason why Frau Menzel should grow old. And yet those old fellows like Ponce de Leon were continually seeking for the elixir of life. A man may be satisfied to grow old, a woman never. This one having perpetual youth would never give it up, though it threw her out of harmony with the rest of the universe."

"At first it seemed that remaining young with her children would be a boon to her. It did not turn out so. A melancholy phase of life is that we cannot be of the next generation beneath us. Even a young body will not bridge that gulf."

"Every year after this the husband grew older, while the wife remained young and beautiful, and every year the gulf between them grew wider. After awhile it became a case of December and May. The older Frau Menzel grew in years the more pleased she was with the attention of young men. They, while pleased with her beauty, found in her an experience which did not accord with their own experience. This led to a continued disappointment in her that soured her disposition. The couple's bickerings were on Welsbard, who reproached himself for being the cause of their troubles."

"And yet there was one thing that would have undone, partly at least, all the mischief. All that was needed was for Wilhelmie to stop taking the antitoxin."

"That could scarcely be expected," remarked Reinhard. "How did the matter end?"

"When Frau Menzel was fifty years old—she reached that age a year ago—she was a very singular compound, having a youthful body and an old mind. One evening, having forced her husband, who was now sixty, to take her to a ball, she insisted on dancing the turkey trot, which was just appearing in fashionable society. When the pair reached home there was a violent quarrel, the result of which was never known, but the couple were never seen out together again. Soon after this the husband died, and the wife discovered that the antitoxin ceased to affect her. Her youth and beauty suddenly collapsed. In a night she had grown old and ugly."

"What was the matter with the antitoxin?" asked Reinhard.

"I was making it for her, and after her quarrel with her husband over the dance I ceased to put in the proper ingredients."

Upwards of 50 kegs of beer and 15 bottles of spirits were consumed by the foreigners in Ford City, near Walkerville, during the celebration of the Polish Easter week.

An interesting land lease was drawn up in London on Monday when an acre of land, part of Lot 17, concession 7, township of Carleton Place, was leased for 99 years at an annual rental of one cent. The owners of the property are Mrs. Sarah McNeil, Duncan and Archibald McNeil, and the land was rented to the north Carleton Presbyterian congregation, who will erect a new building on the site.

CAUSE OF ASTHMA.—No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradiate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Causes Much Disease

Advice about Stomach Troubles and how to relieve them.

Don't neglect indigestion, for it may lead to all sorts of ills and complications. An eminent physician once said that ninety-five per cent of all ills have their origin in a disordered stomach.

Our experience with Recall Dyspepsia Tablets leads us to believe them to be one of the most dependable remedies known for indigestion and chronic dyspepsia. Their ingredients are soothing to the inflamed membranes of the stomach. Rich in Pepsin and Bismuth, two of the greatest digestive aids known to medicine, the relief they afford is very prompt. Used persistently and regularly for a short time, they tend to relieve pains caused by stomach disorders.

Recall Dyspepsia Tablets help insure healthy appetite, aid digestion and promote nutrition. As evidence of our faith in them, we ask you to try them at our risk. If they do not give entire satisfaction, we will return the money you paid us without question or formality. Three sizes, 25 cents, 50 cents and \$1.00. You can buy Recall Dyspepsia Tablets in this community only at our stores.

Watford The **Food Store** Ontario

There is a Recall Store in nearly every town and city in the United States, Canada and Great Britain. There is a different Recall Store for nearly every ordinary human ill—especially designed for the particular ill for which it is recommended.

The Recall Stores are America's Greatest Drug Stores

Mill Run by "Hog" Power

Contrivance Which Forces Pigs to Grind Meal if They Want It.

They have a novel scheme in the States for making the hog work for his living. Amongst the workers on the farm, the pig has usually no place, but a contrivance has been introduced whereby he may grind his own meal. It consists of a barrel, with a milling appliance inside, into which Indian corn is poured.

The barrel is on a swivel, and there are holes low down in the sides from which radiate bars of wood so placed that when a hog presses his snout against the bars the barrel turns round. This works the mill inside and newly ground meal falls under the hog's nose.

In order that the hog may waste none of his power in slipping, there are slats on the floor against which he can brace his hind feet and so keep the mill going. As many as fifteen hogs can get a chance at the meal at the same time, and when a full force is at work the mill goes round at a lively rate, and each hog commanding a hole has a continuous trickle of meal as his reward.

The machine is so contrived that no hog can get any meal unless he stays in the procession. He must either push and travel with the mill or drop out and let another hog take his place.
