CLAYTON, LAMBERT & CO.

FOOT-POWER MACHINERY.

COMPLETE OUTFITS FOR CONTRACTORS AND BUILDERS.

Machines for ripping, cross-cutting, scroll-sawing, mortising and planing, forming edges, grooving, gaining, rabbeting, cutting doors, and turning. Builders use our Hand Circular Rip Saw for the greater portion of their ripping in preference to carting their lumber to a mill five minutes' drive from their shops. The same is true in regard to scroll-sawing, mortising, tenoning, cutting stuff for drawers boxes, etc. Builders using these machines can bid lower and save more money from their contracts than by any other means.

Read the Following Letters from Builders:

CLARENCE F. LEE, carpenter and builder, Morristown, N. J., says: "I have had one of your Hand Circular Rip-Saws for about three months, and am much pleased with it. I have done the ripping for 25 houses in that time, which is over forty miles through inch boards. Have ripped as high as 3-inch plank. Table is also good for rabbeting; having rabbeted all joints and saved all drips for 200 windows."

ALEX. SHERIDAN, Lima, Ohio, says: "A few days since we had some 150 small drawers to make for a drug store; the steam power mill wanted 60 cents each for making them. With my foot power machinery I made them, and saved 25 cents above good wages on the job. If desired, these machines will be sold ON TRIAL."

The purchaser can have ample time to test them in his own shop and on the work he wishes them to do. Descriptive Catalogue and Price List Free.
