The "Vaisach" was built on the slip of the Finnish shipyard "Virtaliya Marin", and the finishing work - the installation and start-up of the power plant - were carried out at the "Baltiiskii zavod" Association.

There are 116 members of the crew. They are quartered six and two-bed cabins containing comfortable bunks and a linen wardrobe. There is a shower, bathtub, television, and a radio in each cabin.

The satellite system installed on the ship makes it possible to receive the satellite television and to transmit data from the ship to the shore. The ship is also equipped with a radio-compass and a radio-compass. The ship is also equipped with a radio-compass and a radio-compass.

11. In the future, the Finns have provided first-class accommodations on the "Vaisach". The Finns have provided a psychological relaxation centre, a swimming pool, and an excellent sauna with a swimming pool.
