

of hatchery fish should be incorporated into bilateral fishing arrangements. In response to recommendations resulting from the periodic reviews, the Parties agree to develop modifications for implementation as soon as practicable thereafter.

11. Between April and June of each year, Canadian and U.S. domestic management authorities will exchange information on the management measures under paragraphs 4 to 6 that are to be implemented to ensure that the cumulative exploitation rates by agreed boundary area fisheries do not exceed allowable levels for key management units and that total exploitation by all fisheries is consistent with target levels established by the Parties for resource conservation.

12. Unless otherwise agreed by the Parties for the duration of this Chapter, the Northern Boundary Technical Committee shall undertake the technical assignments described in paragraph 2 for coho salmon originating in rivers and mouths situated between Cape Caution and Cape Suckling.
