

THATS YOUR INCREASE IN NET PROFITS WITH THE ALLIS DOUBLE CUTTING BAND MILL

33 TO
40 %

The bank balance is nearly every business man's criterion.

We can increase it for you.

Perhaps you have a single band mill in operation.

The "Allis" cutting attachment, cutting both ways, will increase your production 33 to 40 per cent. without increased charge for operation.

Consequently your net profits are increased this amount.

Likewise your bank balance.

It will pay its cost in a few month's sawing.

On new equipment the Allis double cutting band mill should be the only mill to consider.

It's a money maker and a bank balance increaser, for it increases net profits.

You can figure for yourself, with its increased production, how long it will take to pay for itself, merely on its increased production.

Let us estimate with you on new equipment.

It's dollars in the bank for you if you will.

Our "Steam Set" too is a net profit producer.

It increases your output an additional 10 per cent. and so adds 10 per cent. more to your net earnings.

It always sets accurately and never gets tired.

Let us tell you more about it.
