

MAP OF THE GEOGRAPHICAL DISTRIBUTION OF THE GRAINS AND GRASSES IN EUROPE AND NORTH AMERICA

Drawn from the culture of these Plants in the Zones indicated, as also from the climatal conditions necessary for their growth.

REFERENCES.

- Region of Summer Rains and moderate summer temperatures, — Zones of Grains and Grasses.
- From the Pacific to the 98th Meridian is the region of Summer draughts and high summer temperature, — Desert and semi-desert areas of the United States;
- Region of summer rains and high summer temperatures, semi-tropical, — South-eastern part of the United States; temperatures too high for grains and grasses in the South and too high for their profitable culture in the North.
