**THE PRICE OF HOGS.**  
The "bit" arguments put forward by the pork packers, some time since, that the packing of pork was a precarious business and that, if the farmer demanded any more money for their hogs it would be calamitous, have received a rude jolt. Every farmer has read the facts as brought out in the Davies' court case, where dividends as high as 125 per cent. were paid on their stock.

This means that the business has paid good wages to their employees, given good salaries to the heads of the business, paid running expenses, allowed for deterioration and waste and handed over to the stockholders a good, big plum.

What effect has this upon the producers? Does such a revelation of profit tend to increase the farmers' confidence in the claims of the companies? The farmer is producing pork very near the margin, and is losing now because of the high prices of feed where he has to buy it.

The farmer is satisfied with a moderate margin for his work. He asks only for a living return to his honest labor. The packer has all the advantages of organization, market forecasts, manufacture of by-products and labor at his back. His returns are sure and his business success is generally measured by his good management.

But the farmer is not so. His returns are not so positive. Labor is unsatisfactory. Feed is high. Crops fail. Hogs die. He runs the whole gamut of chance and is throttled at the hopper stop.

As in the case of the milk dealers, there is too much consumed in handling and distributing. A more generous portion should be the producers'. So far the World has advocated the farmers' side of the case, and now we are convinced of the justice of the farmers' demands. A man with 50 per cent. dividends bulging out of his pockets makes a sorry emulation for charity. Not all men who beg are blind; not all people believe them to be blind. Hogs are hogs and the farmers have the business. Let them have decent returns.

**MANITOBA CROPS POOR.**  
PICKERING, July 3.—Mr. Edward Boone of Qu'Appelle, Sask., has returned from a visit to his 200-acre farm. To the World he said that Saskatchewan and Alberta promise well, but the situation in Manitoba, however, the situation is not bright for wheat. Oats and barley are sowed more extensively than in the other provinces, as mixed farming is growing in Manitoba, and this has to be "fair" crop. Mr. Boone seemed to be pleased with the general outlook.

**CANADIAN NATIONAL DOUBTFUL.**  
Owing to the unfavorable attitude of Hon. Nelson Monteth, minister of agriculture of Ontario, and his refusal to allow the Eastern and Western Dairyman's Association to identify themselves with the movement, it is highly improbable that the proposed Canadian National Dairy Show will materialize as announced in our columns some weeks ago. While the minister has been roundly criticized for his adverse action in the matter, his views are founded on fact and with reason.—N. Y. Produce Review.

**A BIG MOVEMENT.**  
C. C. James has just returned from his trip over the province in connection with the new agricultural act. Lindsay granted them \$500, and the people to be out in 100,000 acres. Cornwall purchased 14 acres and told them to go to head. He thinks the minister made a great move, for the farmers of Ontario.

**THE FARMERS' PAPER.**  
The World fought for the farmer in getting a pig hog more for his output of pork. The recent disclosure of the profits of the William Davies Co. make it plain that the farmer yet should get more for his hogs. If he is to be a "fair" crop, the World will fight for it. But every farmer should subscribe for The World, which fights his battles.

**THE CROP OUTLOOK.**  
Crops in Ontario are promising well. Wheat and barley are going to be average yields. Oats look better than the last two years gone, although in some places they are poor on old and poor land. Peas are extra fine. Mixed grain is showing up well. Wheat and oats may be high in price, but the outlook in Ontario is good.

**Farm For Sale.**  
J. K. McEwen of West York, has received instructions from Dugald Smith to sell by public auction, on the premises on Saturday, July 12, 1907, lots 11 and 12, in the fifth concession of the township of Caledon, in the County of York, containing 200 acres, more or less. On the premises are good buildings. Convenient to church, school, post office and water well. Sale at 1 p.m. Terms: 10 per cent. down on day of sale; \$300 in one month, the balance to remain on mortgage. The farm will be subject to a reserve bid. For particulars apply to Dugald Smith, York, or the auctioneer.

**Professor Ford of the Ohio State University's field husbandry department** passed thru Toronto Saturday after having a visit to the O. A. C. at Guelph. He was enthusiastic over the work he conducted there.

## STRAWBERRIES DEAR OTHER FRUITS COMING

Canadian Fruits Are Looking Well  
—Hot House Vegetables From United States.

A big yield of fruit in Ontario in sight, and with a big population to eat them! The fruit market in Toronto is assuming the busy proportions so familiar to the dealers and visitors of last year. The old wooden fruit-washed freight shed on Scott-street is filled with packages, baskets, crates and boxes. Two new commission men have lurid signs at the west end announcing their entry into the business. The old firms are all there with many of the old faces. A glance thru reveals much the same conditions as prevailed last year. The Canadian fruit, principally strawberries as yet, is the same as ever. Some boxes are put up as extra, but many are sand spattered and dull looking. A few place green leaves over the fruit and so in the sale. With fruit packing it is the little touches that count and invariably bring better prices. Cherries are here.

Several baskets of sweet cherries from Virgil and Queenston were selling from \$1.25 to \$1.75 per basket. Early Richmond and Montmorency are creeping bashfully forward. Marshall Levitt of Queenston had some choice ones in yesterday. Gooseberries are not so plentiful as the demand and sell for \$1.25 to \$1.50 per basket. A very large strawberry, known as the Williams, brought 11¢ cents. They were a beautiful sample, and their taste as good as they looked. The majority of the berries are Clydesdales, while a few green points and dark red ones were seen. Prices ruled from 6¢ cents to 11¢ cents. The demand is extra good, say the dealers, and the canneries are taking so many that they do not expect any cheap berries here this season.

As usual California is along with her early fruits. Her packing is also good. Canteleups well and pleasingly packed are here, selling at 11¢ cents. Cherries are bringing \$3.50 per box. Watermelons are piling up at 50¢ cents each. Quite a large number of tomatoes from Texas have arrived. These are very green and the ripening process has not begun in transit as was expected. They are nice good sell at \$1.75 per case. Peaches bring \$2.75, while plums sell at \$3 per case.

**Vegetables Forced.**  
The forcing of early vegetables is a small industry in Ontario just now. It is growing, and the demonstrations made by the farmers of the quality of the fruit over the southern ones. Ripe tomatoes at Guelph look and taste better than those from the south. Progress can be made in Canada along these lines. Hot-house cucumbers at \$1.15 per dozen, carrots \$1 per dozen bunches, cabbage \$2.75 per case, cauliflower \$4.50 per case, green peas 35¢ a basket and new Carolina potatoes at \$3 per barrel are to be seen on the stand.

**APPLE SHIPPERS CLAIM THAT THEY LOSE MONEY**  
Bad Transportation, Orchard Pests and Disease Work Havoc—Good Prices For Good Fruit.

R. J. Graham of Belleville, one of the big apple exporters of that district, in an interview with an Ottawa journal, claims that the greater portion of the apple shippers lose money. This story has become a standing joke with the farmers who sell the apples, as every year the buyers are eager for the business. Mr. Graham, however, was quite sure of his facts. He said that the demand in England and Canada is good for the choice fruit, the placing of this fruit upon the market is handicapped by poor packing, poor fruit, and poor storage accommodation.

This experience of Mr. Graham is not due to the fact that the returns to some buyers. Messrs. Dudley Bros. of Colborne are preparing to export largely again, and already before reported in The World, have purchased the Newcastle Co-operative Company's output for \$2.50 per bushel, delivered. This firm has purchased several large orchards between Toronto and Colborne also.

Mr. Canton of Clinton, who visited this office on his visit to the whole sale houses here, where he cleaned up a nice large sum for his season's shipping from that district, has evidently made a good thing of his 20,000 barrels of annual business.

**Bad Transport.**  
Mr. Graham instances a case along the line of the Pore Marquette Railway, in Western Ontario, where bad transportation was accountable for his loss. "I ordered cars, but these apples were detained for weeks unprotected at the stations along the line, and arrived in Montreal in very bad condition. I was there when they arrived, and found that they had been overhauled and many of them destroyed and, of course, the shipment was unprofitable," he said.

A cold storage station at Chatham, for instance, which has saved the apples, he believed. If such existed, apples could be brought in the day they were packed and cooled before they were sent to the market. He suggested that the fruit should be cooled in a cold storage station for both apples and cheese. Hamilton, he said, was another point that would be very convenient as it had both electric and steam railroad connection with a large producing district.

Mr. James Durno of Jackson Rothie Norman, Aberdeenshire, Scotland, has been secured by the International Show at Chicago to judge the grade and cross-bred bullocks. Mr. Durno is widely known as a favorably known in Great Britain as a breeder and a feeder of beef cattle.

## THE FARMERS' UNIVERSITY.

Over 40,000 Farmers Visit the O. A. C. in June—President Comments on Their Carefulness—Vegetable and Fruit Experiments.

Guelph! It is a name now that thrills every farmer in Ontario. It is known to every agricultural professor in America and Europe as a peer among such schools. Forty thousand farmers, all over Ontario, from the scattered sections of newer Ontario, from the Shorthorn and Clydesdale sections, the fruit growing sections, from Essex to Frontenac, visited the great agricultural university during the last few weeks.

Friday last was the final day and South and West Simcoe were there to wind them up. The tasty sandwiches, the "ripened" cheese, the peas and biscuits are all eaten, and President Cresswell is pulling his face out of the ruts of the pleasant smile.

And truly, the half can hardly be told of the great work that is being done for Canadian agriculture at this spot. The president says some very nice things about its greatness, but the work cannot be described, and the farmers have just "to dig in and make a name for themselves," from the vastness around them.

"The farm is yours; we want it to be accepted as yours and used as a test plot for you." Such are the words with which the men, women and children are greeted.

**Farmers are Orderly.**  
Excursions started the seventh of June, and have continued every day since then, and the grounds show not a trace of waste paper, not a misplaced article, not a broken twig, not a bruised poppy stalk. Thousands of farmers have wandered all over the place, and no watchmen are employed. Yet these people respect the place, carry away the literature, and behave as if they had immediate possession in law. In this respect they certainly excel any city crowd that ever excursions anywhere.

**Some New Things this Year.**  
Some farmers visit the grounds each year. They regard it as their annual lesson to be learned. Others come once in five years. Some are old men and visit the place for the first time. Visitors this year, even last year's men, find some improvements.

A new 50,000 gallon water tank, built high up on steel towers, each upon a cement base, stands immediately behind the main building. Its construction is entirely of steel, with the exception of the cement posts at the bottom.

Then gain our stock men. Last year considerable criticism was meted out by certain breeders because their breeds were poorly represented. The Clydesdales are reinforced with several valuable mares. Already the pet of the breed, the "Red" and "Black" foaled last year—just a year ago Sunday—from the \$1,500 mare purchased as Robert Davies' sale—is a valuable one. He weighs 2000 pounds and is a beauty.

In the dairy the biggest additions have been made. Two new Jersey cows of merit, imported by Robert Hunter of Moxville and just out of quarantine, are added to the herd. Instead of two we have now three. The eight nice-looking representatives of this cream breed, while the Holsteins with distinctive markings are also present. With their 14,167 pounds in seven months, or her 20,000 pounds in twelve months.

Think of it! A cow giving as much milk in one year as six of Ontario's average cows. Every farmer who went to Guelph knows that. It is an object lesson that counts.

**Prof. G. E. Day Drives Out.**  
Genial Professor George Day, in his gray two-piece suit, and his white matches his silver hair, surmounting a most pleasant face that lends immediate confidence, hitched and drove us about the farm that he so much enjoys. The cornfield comes first. Here, the Hackney horse after the International Show in London, England.

The O. A. C. belongs to the farmers of Ontario and by the way they have been visiting it for years. They must recognize the ownership.

Crops on the model farm at Guelph are about two weeks later than the average, but the prospect is one of the best in the history of the college. The corn is looking exceedingly well, while roots were never better.

The vegetable growers of Ontario ought to organize an excursion to visit the work being done by Prof. Hutt at Guelph. He has experiments and tests giving results there that only the interested eye can appreciate.

The department at Ottawa has been deluged, we believe, with applications for registry of imported fillies. This was brought about by the recent enactment of the Clydesdale Association in raising the standard of registration after July 1.

There are big things being done in Toronto Junction in the stock lines. The accommodation for fat cattle, sheep, hogs and horses is going to be the equal of any in America. The popularity of the place is growing monthly. Any farmer could well afford a two-hours' visit. Take a Dundas car from the city.

Heretofore the chief Siberian outlet for butter has been from the Baltic ports to northern European countries, especially England. Now the market is looking eastward, and "ice wagons," or what we would call refrigerator cars, are being supplied the East Siberian and Chinese Railway for exporting of Siberian potato to the Manchurian and Amur districts, and perhaps to China proper as well as to Japan.

The high prices of almost all feed stuffs this season, the late spring, the dearth of hay and the enforced turning out of cattle upon short, tender pastures have brought discouragement to many dairymen. They are seriously mulling the margin of profit on spring milk. It should, therefore, be a comparatively easy matter to convince them that the value of a well built and well filled silo; for not only does a

## CLYDE FILLIES

Are wanted, but unless the people know you have them, how can you sell? No one lights his lamp under a barn! As well fish for whales in your mother's water pail.

Now is the time to get into the advertisements for the coming fall. It is the long ad, the strong ad—that tells in the end. Keep the mare steady by letting The World readers see your name every week, or twice a week on these pages. Remember your ad goes into The Sunday edition free also.

**FARMS FOR SALE.**  
FOR SALE—A CHOICE DAIRY AND GRAIN FARM, situated on Dundas-street, a good stone road, in the Village of Dixie, Peel County, 12 miles west of City of Toronto, part of lot No. 10, con- taining 121 acres, ever-as-is the spring creek, frame house, two tra- verses, and stables, must be sold to close the estate. For further particulars apply to Chas. H. Gill, Dixie, Ont.

**\$1.75 BUYS A PAIR OF PURE**  
bred brown leghorns. Order direct, W. J. Flayser, Galt.

**SHORTHORNS FOR SALE.**  
PURE BRED SHORTHORN BULL—Imported sire and dam—16 months old. Thos. W. Blain, Gifford.

plentiful supply of ensilage permit difference as to spring prices of hay and straw, but it also allows the cattle owner to keep his stock off pasture until the grass is sufficiently advanced. Further, if summer ensilage is provided the worry induced by uncertain soiling crops as well as late summer pastures is removed.

Prices for apples all thru the season last year were very high. This year the rulings were all the way from \$2 to \$5 per barrel. A few days ago a sale was made in Ottawa at \$5.50 per barrel for one lot of well preserved apples of the best quality. It will be seen, therefore, that the trade, with all its conditions favorable, should be very profitable to the Canadian grower who ships to Europe or the Canadian west.

## ARE YOU RUPTURED?

GET OUR PRICES

On Trusses, Abdominal Supporters, Elastic Stockings, Shoulder Braces, and all kinds of RUBBER GOODS. We are the largest dealers in Stock Room Supplies in Canada. Write for Catalogue. Our prices are 50 per cent lower than any other house.

**THE F. E. KARN CO., Limited**  
Canada's Greatest Medicine House  
409 QUEEN & VICTORIA STREETS TORONTO

## NOTICE TO THE LIVE STOCK TRADE:

GENTLEMEN: We beg to inform you that there are Two Market Days Weekly here, namely: Monday and Wednesday

When buyers of all kinds of Live Stock will be present. COME AND GIVE THIS MARKET A TRIAL. YOURS RESPECTFULLY, W. W. HODGSON - MANAGER

**CLYDESDALE BREEDERS**  
OWNERS of Imported Clydesdales, not recorded in Canada, are urged to do so at once, as after July 1st, 1907, only animals bearing registration numbers in the Scottish stud books, and whose parents and grandparents are similarly recorded, will be eligible for registration. Address all communications to "Accountant," National Live Stock Records, Ottawa. Clydesdale Horse Association of Canada. J. W. SANGSTER, Secretary.

**"HINGE-STAYS" MAKE DILLON**  
Short, stiff, hard, steel wire stays make a "hinge-like" joint at every lateral wire on the Dillon fence. These "hinge-stays" give our fence a degree of elasticity—enable it to withstand greater strain. They set like, and really are, hinges—make our fence swing or spring back into shape after receiving a heavy blow, or the unusual pressure caused by a furious bull or other animal endeavoring to push his way through to freedom. Catalogue tells more about this "twice as strong" fence.

## Sir Hector 4141

The property of William Harris, Esq., Cranfield Farm, East Toronto. The celebrated Canadian Clydesdale stallion will stand for service this season at his own stable at Cranfield Farm.
