It was not until a hard voice close to her said drily: "Are you the young lady whom I met here before—who refused to take the warning I gave?" that Mabin, dashing away the tears from her blinded eyes, recognized in the erect figure standing

beside her Mrs. Dale's former mysterious visitor. "I-I beg your pardon," said Mabin, hastily. "I-I did not see you come in. You want 'o see Mrs. Dale? I will go

She stammered over the lady's name, just as Mr. Banks had done. "No," answered Mabin promptly. And at this answer the old lady, sud-denly breaking down in the intensity of her relief, fell back in her chair and gasped out:

"Thank heaven!" Mabin's thought moved caickly. Stirred by the excitement of this interview she tried to find a way of serving Mrs. Dale; and it occurred to her that if this fierce old lady could meet Mr. Banks he would perhaps be able to tone down her ferocity. After a short

Mrs. Dale was lying on the hard horse-hair sofa, with her eyes closed. Two of the servants were present with fans and smelling

salts, and the usual remedies for a fainting fit. As usual, in the case of a household where there is a skeleton in the cupboard, the servants took sides, and each of the opposing parties were represented on this occasion. can," she went on gently, touching the beautiful fair hair, which had become loose and disordered, and looking with tender compassion into the merry blue eyes, which seemed to have lost their brilliancy, their bright color.

The man who nurses his wrongs carefully finds that they grow rapidly.

When a business man gets to the point where he cannot sleep at night, where he is so shattered of nerve that it is torture to even remain in his bed, and he has to get up and pace the floor—it is time for that man to bring himself up with a round turn. If he does not, it means nervous prostration and mental, if not physical, death. For a man who gets into this condition there is a remedy that will brace him up, put him on his feet and make a man of him again. It is Dr. Pierce's Golden Medical Discovery. It goes to the bottom of things. It searches out the first cause. When a man is in this condition you can put your finger on one of two spots and hit that first cause - the stomach or the liver or both. This great medicine acts directly on these spots. It promptly transforms a weak stomach into a healthy one. It facilitates the flow of digestive juices and makes digestion and assimilation perfect. It gives a man an appetite like a boy's. It invigor-ates the liver. It fills the blood with the ife-giving elements of the food, and makes t pure, rich, red and plentiful. The blood s the life current, and when it is filled with the elements that build new and healthy tissues, it does not take long to make a man well and strong. It builds firm, muscular flesh tissues and strong and steady nerve fibers. It puts new life, vigor and vitality into every atom and organ of the body. It cures nervous exhaustion and prostration. Nothing "just as good" can be found at

medicine stores.
