# INDUSTRIAL FARM **NOW BUSY PLACE**

More Than Sixty Tractors Showing People Progress of Farming.

## INTERESTING DISPLAY

City People as Well as Farmers Are Much Interested.

The great tractor demonstration is SAYS MISTAKE arriving and being installed in their allotted positions. More than 60 tractors, including butfits for converting automobiles into tractors, have already been received at the railroad station, and the majority have reached the grounds of the Toronto Industrial Farm, where this instructive exhibition is taking place. During the afternoon the buzz of the engineer was heard as they moved out the tented village across the fields to their allotted ten-acre plots, which are to be plowed and cultivated ready for the seeder before the clos eof the monstration on Friday afternoon.

Many other farm implements are to beside the tractors. They range from an old wooden plow which was once used by Daniel Webster to the modern disc harrow, and from a manure spreader to an ensilage cut-ter. And then again one is attracted individual electric plants which giving electric lighting to the farm buildings, running the churn and washing the clothes.

Truly the sight is one not to be missed by the alert thinker of Ontario, whether he be farmer or city dweller. Any farmer who can by any means spare the time and who does not take advantage of this opportunity of witnessing what power machinery is doing to increase production and solve the labor question on the farm is in need of a violent awakening. And business man who has no relation to the world of today should take a ride up Yonge stree tand see spread out before him the sight of these steel animals moving slowly up and down field after field, literally dozens of them, each with several plows instead of one, or a disc harrow or other implement crawling after

Wednesday, Thursday and Friday should see an immense attendance at this, the greatest by far of any farm power machinery exhibition ever held in Canada. Manufacturers from distant points in the United States as well as our own. Canadian firms have gone to great expense in shipping these tractor machines and other implements to the industrial farm, and everyone in a position to do so should spend at least two days witnessing the demonstration of how Canada's agricultural land will be made ready on to feed the starving Europe for some years to come.

Men. women and the production becomes more marked. Men. women and the production becomes more marked. Men. women and and realistic photoplay that has ever teen produced in Toronto.

The reason for all this intense in terest is not far to seek. It is not merely that "The Public Be Damned" contains a story of such intense and intrinsic interest as is rarely indeed portrayed on the stage. It is not merely that the production is marked by photography of an excellence and by direction of a quality such as are rarely met with in any screen production. It is not merely that a presenting cast of unique and unequaled excellence is headed by Charles Richman whose splendid work in "The Battle Cry of Peace" is yet fresh in the memories of patrons of motion picture theatres in Toronto, and Mary Fuller, whose powers of characterization and capacity for emotional acting are of the very highest order. But it is chiefly because "The Public

Be Damned" handles, intelligently and intelligibly, the dominant domestic problem of the day that the public in Toronto are displaying such an extraordinary amount of interest in its advent. Moreover, it handles this problem without kid gloves. It places the blame for high prices mainly on the greed of the food monopolists. And who say that it 's wrong? Certainly not the Toronto housewife, who, week by week, sees prices go up and yet never has any same or satisfying reason given her for the advance in price. The food controller has two duties The first of these is food conservation. The second is price control. Whatever our food controller may or may not have achieved in the matter of conservation, he has certainly done little or nothing in the way of control ling prices. This is a truism which every householder and every housewife in Toronto knows to her black and bitter cost. It is the result of the lack of price control which "The Public Se Damned" portrays with such vivid and graphic realism. Profiteering occurs in all classes and conditions of war time works of necessity. But it is never so dangerous, so deadly, so disastrous or so diabelical as when it takes place in connection with the food of a people already suffering intensery under the strain of war. "The Public Be Damned" shows just how the little game is worked. It shows up the food hogs" and their evil ways as they have never been shown up And as this is a matter in which we are all vitally interested we should none of us miss seeing it.
