ITALY AND THE VATICAN.

The Scheme for Restoring Temporal Power Regarded as Visionary.

Washington, D. C., Sept. 20.-The project originating in London of raising one billion of dollars to be placed at the disposal of the Pope as a fund with which he could negotiate with Italy for a restoration of his temporal power, is regarded by leading Catholics and the authorities here as visionary and absurd. The circular reported to have been issued in London has not been seen in this city, nor has the subject been before the authorities in any form. It is regarded as emanating either from some judice against the church. It is also said that the restoration of temporal power involves sentimental considerations which neither Italy nor the Pope would reduce to a question of barter.
