In its history, this invaluable Medicine occupies the, most homorable position possible for any remody to attain. A few years since it was known only to the friends and neighbors and patients of the proprietors, and alw-ys sought for by them whenever troubled with Rhenmatism, and in this way come to the notice of physicians generally, and through their favorable expression, and its acknowledged value as a Rhenmatic Remody, the domand f r it became so frequent and urgent as to oblige its proprietors to increase their facili-ties for its manufacture. Its reputation rapidly extended, and soon orders, le ters of enquiry. letters of thanks, and certificates of praise were daily received from all sections of the United States and Canada . and in this way on a basis of its morits eleme-unaided by "tricks of the trade" or special efforts—it has risen to its present en-viable position. Wherever introduced it has received the most flattering preference in the treasment of all rheumatic complaints. In this we are really greatful and happy, not alone be-cause our medicine finds roady rate, and is con-sequently profitable to us, do we say this, but because we open new field in medical science, and cure at once what the medical practitioners have for ages found so difficult even to reliver. We fill a place heretofore unoccupied. We re-liver the suffering and Minister to Ged's poor; we restore the laboring man to the use of hiss in-
