MRS. ELIZABETH KENT, MacDONALD COLLEGE.

up in a severely restricted environment

HARRIETSVILLE W. 1.

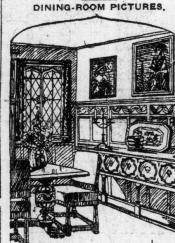

The monthly meeting of the Harrietsville was held at the
home of Mrs. C. B. Adams on March
4, with a large attendance. In the absence of the president, the vice-president, Mrs. L. Jackson, occupied the
chair. After the opening ode and gengive their curiosity, their desire to make
and unmake, some scope-dolls that can
be dressed and undressed, horses that
can be harnessed and unharnessed, and
above all, blacks and constructive toys
of wood and weel, such as are now happily to be had in increasing variety.

The chief point in the Montessori
method of education is probably its emphasis on the progressive use of the
instinct of investigation, which it seeks
steadily to develop into construction and
creation.

Many a child who is regarded as stu-

pid, who has lagged through school marked a failure by teacher and parent is merely a child who should have been is merely a child who should have been trained through his hands, who probably; so trained, would be far more valuable person than the parrot pupil, who has no troubel in imitating, in docilely giving back what those around him gives the property of the

child, and he is so rare among healthy children that he probably does not ex-

Once in a country inn we sat and stared with fascinated horror at a large print of Judith and Holofernes which occupied the wall of the dining-room where we were supposed to eat. The uxurious table of the wicked general was spread in his tent, and he sat at one end of it, but his head was on the floor of the foreground of the picture, and the dark Judith with her sword of vengeance stood near. Needless to say we had no appetite for what was set besult from toxins, poisons and impurities fore us. It is a striking example of

wall, or any other.

In another dining-room of cherished It is the function of the kidneys to filter impurities from the blood and cast them out in the form of urine, but in many instances the bowels created.

Meals tasted better for the look of uses the skin pores as the next best means of getting rid of these impurities those cherries. It must have been a fairwhich often break out all over the skin ly good painting, but whether it was which often break out all over the skin in the form of pimples.

The surest way to clear the skin of these eruptions, says a noted authority, is to get from any pharmacy about four ounces of Jad Salts and take a tablespoonful in a glass of hot water

Ploture frames and sizes must be con-

of toxins in the bowels. It also stimulates the kidneys to normal activity, thus coaxing them to filter the blood of frames and subjects should be used. Family portraits of the large, solemn thus coaxing them to inter the skin of impurities and clearing the skin of type belong in a large solemn room, and pimples.

Jad Salts is inexpensive, harmless and living-room and bedroom. Prints of old living-room and bedroom.

THE INSTINCT OF INVESTIGATION. English hunting and inn scenes are Mirrors should not be hung in the dining-room, certainly not where anybody at the table can be haunted by his own reflection. No unkinder test of character can be made than to put a

person where he must see himself eat and talk. Let us leave that sort of blunder to the poor taste of the public eating place. (Copyright, 1921, by Metropolitan News-

Women's Activities Western Untario

Address News For This Column The Editor of Woman's Page.

The first aspect in a child of the instinct of investigation, a most important instinct, which leads to all scientific discovery, seems to be merely a desire to destroy. He wants to tear and smash and pull down.

This, of course, cannot be permitted, and the child's instinct is usually repressed by removing the article from his reach or by punishment. Hare and wise are the parents who direct it into the right channels, providing the child from the first with things that can be taken apart and put together again without injury to the material. Children brought up in a severely restricted environment are sent to show it in their destructive.

The regular meeting of the Lobo Woman's Institute will be held on Wednesday afternoon, March 16, in the Masonic Hall, Lobo. An interesting program, consisting of solos, instrumentals and papers will be given. Mrs. P. L. Graham will give a talk on "The Organization of Institutes and Duties of Its Members." A paper on the "Worth While Things of Life" will also be given by Mrs. G. F. Edwards. Miss Cora Tuckey will read a blography on one of the Canadian writers, and the rollcall will be answered by "Seasonable Hints."

On Friday evening, March 13, the Lobo Institute intends holding a social evening. The program, which is being put on by the members, promises to be very entertaining, after which refreshments will be served.

Lett Lood for their agw home in Long and interesting feature of the evening was a short program, Mr. T. Green being an able chairman. An address was read by Duncan McCallum, while Miss Florence Fletcher presented them with a handsome cabinet of Old Colony silver in behalf of those present.

Short speeches were also made by Messrs. Archie J. Fletcher, John A. McGugan and Duncan McCallum, who expressed their regret at losing Mr. and Mrs. Pincombe from the community.

The remainder of the evening was spent in cards and dancing.

DORCHESTER GOLDEN WEDDING. DORCHESTER GOLDEN WEDDING.
Mr. and Mrs. Joseph Fulkerson of
Dorchester celebrated their diamond
wedding on Tuesday, March 8, many
of their friends calling on them on
that day to offer congratulations, in
spite of the heavy rain, similar to that
which drenched the country of the
wedding day of this aged couple. Four
generations were present at this celebration, as well as friends from Hamilton, Port Huron, St. Thomas, London
and Alberta. The house was beautifully decorated and the banquet
sumptuous.

Mrs. Fulkerson was born in Put-nam in 1842, while Mr. Fulkerson was born in Ancaster Township in 1836, coming to Putnam at 14 years of age, and since that time both have resided in that district.

This blank, properly filled out and attached to chart above, with your chain of circles across it, must be sent in with your remittance. If you secure any new subscribers each one must submit a blank separate from yours. If a new subscriber does not wish to participate in the contest he may note across the face of the chart, "No Solution."

BLANK FOR SOLUTION DATA AND SUBSCRIPTION.

NOTE.—Contestants desiring the paper sent to somebody else should merely attach a note to this blank giving name and address of persons they wish the paper sent to. Any subscriber whose name or address is not correct on the label of his paper will please fill in this blank as it should be and attach note to blank, giving name and address as it is now printed on his label.

THE PROBLEM

Have you sent in any other solution prior to this one?.....

The name of the person who interested me is:

The problem is to draw a chain of circles once across the chart, from the first column on the left to the last column on the right, selecting the figures to encircle from which you can obtain the greatest difference between the sum total of the even and the sum total of the odd figures. The odd figures are 3, 5, 7 and 9, and the even, 2, 4, 6, 8. By "sum total" is meant the figures added together. That is, you are to take the odd figures you put circles around, and add them up; then the even figures, and the difference between the two totals is your solution. It makes no difference which of the two sum totals is the larger; the greatest difference you can obtain either way is what counts.

tain either way is what counts

The chain must be drawn in continuous sections of either three, four or five circles to a section. By "section" is meant three, four or five circles in a straight line. You may use either number of circles you wish in each section. The sections of the chain may go either up or down, or to the right, but not to the left. That is, start in the first column by drawing either three, four or five circles up or down, as you wish; then proceed to the right, then up or down again; then, to the right, and so on until you reach the last column. The chain must end with either three, four or five circles in this column.

TO THE LONDON ADVERTISER:

29294-943456929292565

3458387636523838543832

TO PARTICIPATE IN CONTEST

This contest is open to all residents of the Province of Ontario. Solutions of the puzzle will not be accepted from outside of this territory. While addresses for delivery of the paper may be changed as desired, all communications and matter relating to the contest must pass back and forth from the original addresses of contestants. The contest is open to men and women under the following terms:

Anyone in the Province of Ontario, upon making a subscription payment to The London Advertiser of not less than \$2.75, or more than \$10.00, may submit a solution of the puzzle. You may submit as any different solutions as you wish with a subscription, on payment of not less than \$2.75 or more than \$10.00 with each one. If you submit more than one solution, the payment with each one will be applied to extending the subscription already in force, unless otherwise directed. If you are already a subscriber, your subscription will be extended from the time last paid to, whether you receive the paper by mail or carrier. New subscriptions will be started as soon after receipt of solutions as possible. So change will be made in any carrier service you are now receiving the paper through. All amounts paid will he credited on subscription at the regular rates, so you cannot lose, while standing an equal chance to win a valuable cash prize.

FACTS TO REMEMBER

while the amount you pay with a solution of the puzzle does not have any effect on your winning a prize, it does affect the amount you will receive, should you win one of the first five prizes is determined by what the winners pay. This is explained in the prize list, which you should study carefully before sending in your solution.

The value of the first five prizes may also be increased \$100 each by interesting four people who are not now subscribers to become subscribers. The sum of \$25 will be added for each new subscribers must pay not less than \$2.75, and he has the prize less than \$2.75, and he has the prize same terms as any other contest if he wishes to do so, upon the same terms as any other contestint, the \$2.75 or more up to \$10.00 paid by him entitling him to submit a solution of the puzzle. Whether these new

\$10.00 paid by him entitling him to submit a solution of the puzzle. Whether these new subscribers submit solutions of the puzzle or not, each one must sign a separate blank, so that the records may be kept in such a way as to show by whom they were interested. If no solution is sent by a subscriber you interest, merely write across the face of the chart, "No solution submitted," and send it in attached to the blank. Any one or all of the names of any new subscribers may be sent in with your solution, or any time later you wish before the close of the contest.

Extra Charts Furnished

them. The office is located at 140 Dundas street. Postoffice Box 578.

If the paper is already being sent to your residence, but in the name of some other member of the family, and you do not wish an additional copy, merely answer "Yes" to the inquiry if you are already a subscriber, and attach a note to the blank stating in whose name the paper is being delivered to.

Contestants will find this puzzle offers unasual entertainment for a party of friends. If you want to pass a pleasant winter evening invite in a few friends, and give to each one a chart, and see who in a given length of time can work out the best result. It will prove to be a most interesting game. Extra charts may be secured for this purpose by calling upon the contest manager for whatever number is needed.

The best chart submitted in this contest will be reproduced in The Advertiser, so that every contestant may check it up and compare it with his or her own work.

Those desiring extra charts to work on will be supplied with what they require if they will either call at The Advertiser contest office in person, or send a self-addressed, stamped envelope for mailing them. The office is located at 110 Dundas street. Postoffice Box 578.

If the paper is already being

The first section, it will be noted, consists of four circles; the second, three; the third, three, and so on. The sum total of the even numbers, viz., 46, 58, 92, etc., is 750, and the sum total of the odd numbers, viz., 69, 75, 83, etc., 892. The difference between these totals is 142.

ILLUSTRATION

Contestants should try all the combinations they can to see what is the greatest difference they can obtain between the sum total of the odd figures and the sum total of the even or vice-versa. The prizes will be awarded for the greatest differences submitted, without regard to what the greatest possible difference that can be obtained may be. Only the figures you put circles around are to be considered. The following illustration will furnish a general idea for drawing your chain of circles. The illustration consists of double figures, such as 46, 69, 75, and so on, but the puzzle contains only single figures from 2 to 9. Hence the differences will be comparatively much smaller and the sum totals easier to obtain. 46) 34 65 74 24 96 64 88 91 75 69 86 28 69 73 36 84 29 95 62 75 86 59 93 72 52 27 93 29 59 The accompanying illustration explains what a chain of circles is. This contest is wholly independent of, and is in no way connected with any other newspaper contest in London of leved solely by this paper, and will be paid in accordance with the terms and conditions stated in this announcement.

The Advertiser offers these prizes for individual effort. While it is proper for members of one household to work together, or several friends, it is not permissible for more than one of those working in unison to send a solution of the puzzle. When in the judgment of the contest manager more than one member of the same family, or more than one of any number of persons he believes have worked together, send in a solution of the puzzle, he reserves the right to refund subscriptions and return the solutions he believes have been submitted contrary to the foregoing rule. The Advertiser also reserves the right to imally decide any other questions which may arise, and those entering the contest agree to abide by such decisions.

The spirit and intent of the contest is to reward those who work out the best solutions of the puzzle through their own independent efforts.

The time a solution is submitted has no effect upon its winning a prize. It is well, however, to send in your solution as soon as you have it in shape to submit. Something might arise to prevent you sending it in later, thereby causing you to lose the chance of winning one of the valuable prizes. If, on the other hand, you submit an early solution, and later find you can improve upon your first effort, you have the privilege of submitting as many more solutions as your first. Your solution ball he considered as incorrect, and ruled out of contest. Date Submitted......1921. I herewith inclose \$...... for subscription, and submit the following as my solution of your INFORMATION In the event of ties on this puzzle, as many prizes will be reserved as there are contestants tied, before any prizes are awarded for a less correct solution. For instance, if five people tied on the best solution, the first five prizes would be reserved for them, and they would be awarded the prizes in accordance with the standing of their solutions of the second puzzle. That is, the one submitting the best solution of the second puzzle would receive the Total of Odd Numbers Difference Difference If this blank is used by a subscriber who has been interested by a contestant, write in the name and address of the contestant who interested you. You have the same privilege of participating in the contest as the contestant who interested you in subscribing. second puzzle would receive the first prize; the one submitting the next best, the second, and

the next best, the second, and so on.

No solution unaccompanied by cash to apply on subscription will be accepted. Solutions and the money should be sent together, not separately. No solution may be changed after it is once submitted. If you want to submit something different send another solution, accompanied by any amount you wish to pay from \$2.75 to \$10.00. It will all be credited on one continuous subscription, and you will have the satisfaction of knowing your paper is paid for that far in advance. No one directly or indirectly connected with The Advertiser will be permitted to enter this contest.
