After Long Years of Perfect Health He Was Attacked With Kidney Trouble and Other Complications-Dr. Williams' Pink Pills Bring Him New Health.

(From the Picton, Ont., Times.) Mr. B. L. Mastin, of Hollowell township, Prince Edward County, was a caller at the Times office the other day, and during his visit told of his great suffering from kidney trouble and rheumatism, accompanied by dyspepsia, cold feet and a generally broken down constitution. Mr. Mastin is one of the first settlers of Prince Edward county. He is in his seventy first year and is the father of a grown-up family of well-to-do farmers. In the course of the conversation Mr. Mastin said: "I have never known what it was to be sick. I have always had good health and worked on my farm every day until some months ago, when I was taken with severe pains in my back and shoulders. I consulted a doctor, but received little benefit. I was told by one doctor that I had rheumatism and kidney disease, but his treatment did not help me,

and I continued getting worse. My appetite failed me and I fell away in Mesh. I became irritable and could not sleep well at night. Nobody can conceive the intense pain I endured. Not deriving any benefit from the food I ate and having a constant pain in my stomach, I soon became tware that I had dyspepsia, and the pain in my back and shoulders intensified by the stone-like weight in my stomach, made life to me almost unbearable. I was life to me almost unbearable. I was also a great sufferer from cold feet, nearly every day my feet would get like chunks of ice, and unless I was like chunks of ice, and unless I was constantly by the fire the soles of my feet would feel though they were wet. One day I old my wife I was going to try Dr. Williams' Pink Pills. Having read so much of these famous pills, I thought that what they had pills, I thought that what they had done for others they might do for me. I procured a box from Mr. E. W. Case, druggist, and to my great delight before I had used quite one lox I had improved. When I had finished a couple more boxas I felt like a new man, and I gladly tell this for the benefit of all who suffer as I did." Continuing, Mr. Mastin said; "My rheumatism is all gone, and I can come and go and enjoy as good health as well as I ever did." With these remarks, Mr. Mastin got up to go, but added that his wife was receiving much benefit from Dr. Williams' Pink Pills. "I took home a couple of boxes

To Keep Baby Covered.

An objection to which many mothers make to having the nursery cool at night is that an older child is restless and kicks the bedclothing off, sleeping most of the time without cover. This is easily overcome by sewing up the side of a crib blanket; through a hem at the top run a purse string; put the child into this blanket bag, tying it under the arms, and he can toss and turn to his heart's content, keeping well coverheart's content, keeping well covered. If arms and shoulders are exposed, a light sacque may be put on, but do not neglect to have the nursery well ventilated night and day if you wish the baby to grow hardy and healthy.—Marianna Wheeler, in Harper's Bazar.

But whilst in no case is mannerism of the kind marked to exaggerated exof the kind marked to exaggerated extent, several frequent participants in debate have certain tricks of action more or less indispensable to successful speech. Mr. Gladstone's gestures, like his other resources, were infinite. At one time—it was during the fever heat of the turbulent Parliament of 1880-85—he fell into a habit of emphasizing his points either by beating his clenched fist into the open palm of his left hand, or violently thumping the harmless box with open right hand. This last trick was recurrence to an earlier manner, observation of which drew from Disrneli an expression of heartfelt thanksgiving that so substantial a piece of furniture as so substantial a piece of furniture as the table of the House of Commons separated him from the right hon.

In its fuller development the exer cise became so violent it occasionally happened that the very point he desired especially to enforce on the attention of his audience was lost in the clamor of collision. The Premier's colleagues on the Treasury Beach were so perturbed by the fisticuffing, which frequently gave cause to the enemy to guffaw, that they proposed among themselves that one of them should delicately call his attention to the matter. The proposal was pleasing, but who was to bell the cat? After fruitless discussion of this question in the inner camp, the Dean of Windsor, an old personal friend of Mr. Gladstone's, was meanly approached and induced to undertake the task. I don't know how the mission fared. Its curative effects were certainly not permaeffects were certainly not permanent.

Recently she advertised for a sweetheart in that trusting, confiding way Pennsylvania girls have, and from the number of answers received selected one containing a photofrom the number of answers received selected one containing a photograph as fully meeting all her expectations. It was a pretty picture, representing a blood young man, with nice sweeping hair curling down over his brow, a patrician looking dress coat draping away from a torso like that of a greyhound, and tan-shoe clad feet negligently posed in an attitude of luxurious ease.

It was the picture of a man any woman would love at sight, and Miss Dunkel, in the sunctity of her little white room, shed tears of thankfulness that Providence had been so good as to give her such a man. Yesterday the man who had answered the advertisement and in

There is a lesson in this to young women who advertise for lovers. The desirable ones are not to be had in this way. They must be sought for patiently, picked and selected with as much care as is wasted upon the choice of an Easter bonnet, and even then there is one chance in three hundred and ninety-seven that both parties will not be disappointed a month after the poor but ambitious organist has finished breathing o'er Eden.
