

	PAGE
Diabase and gabbro	89
Diorite and andesite	89
Quartz porphyry	89
Lamprophyre	90
Sedimentary rocks	90
General statement	90
Slate and phyllite	91
Distribution	91
Lithological character	91
Origin	91
Conglomerate and agglomerate	92
Iron formation	92
Ferruginous dolomite	92
Pontiac series	93
General statement and distribution	93
Greywacke, arkose, and conglomerate	93
Iron formation	94
Amphibolite	95
Pontiac schists	96
Granites and gneisses	97
General statement	97
Northern batholiths	97
General statement	97
Lithological character	97
Belt of banded gneisses	98
General statement and distribution	98
Lithological character	99
Granite and granite gneiss	99
Syenite and syenite gneiss	99
Granodiorite and granodiorite-gneiss	100
Diorite and diorite gneiss	100
Pegmatite and aplite	100
Mica schist	100
Structural features	102
Foliation	102
Banding	102
Granulation	103
Folding and faulting	103
Huronian	103
Cobalt series	103
General statement	103
Distribution	106
Lithological character	106
Basal conglomerate	106
Greywacke and argillite	108
Arkose	108
Upper conglomerate	109
Ville Marie quartzite	109
Relationships of the Cobalt series to the basement complex	109
Folding	111
Origin of the Cobalt series	111
