

FIG. 82. (Full Size).

This small steatite pipe must have served less for use than for ornament. The bowl is not more than half-an-inch wide or deep inside, and the stem-hole which enters from the breast is fully half as large. Fig. 82 is regarded as representing a duck. It is certainly intended for a bird, and a duck most probably. Through the lower back corner a small suspension hole is bored.

We have to thank Mr. J. W. Fitzgerald, of Parry Harbor, for this and other specimens.

FIG. 83. (Full Size).

What may be called the "lizard" pipe is here figured. It is made of steatite and was found on lot 8, concession 6, Nelson township, County of Halton, by Mr. George D. Corrigan, who presented it to the museum. Both head and tail are damaged, but there is a little more of the latter and less of the former than is shown in the cut.

FIG. 84. (Quarter Size).

FIG. 85. (Quarter Size).
