PROSPECTUS
OF
THE LITERARY GARLAND,
A Monthly Magazine,
TO BE DEVOTED TO LITERATURE AND SCIENCE.

WHILE so many publications of a political character find a liberal support in public indulgence and generosity, it surely will not be deemed presumptuous to hope that one of purely literary nature may find a corresponding degree of favor and encouragement; and, as it would, to form a species of relaxation from the tedium of political speculation, and to enliven, in a trifling degree, some of the hours which might otherwise be burdened with ennui.

In this hope, it is proposed by an Amateur in Literary Horticulture, to devote a few leisure hours to the creation of the nearly unbroken ground of Canadian Literature, fearing not that a field so fair and promising will fail to yield an abundant return for the labour expended in reclaiming it. He does not scruple to confess, that the flowers with which the literary garden will, for a time, be decked, will be principally culled and borrowed from the parterres of more productive climes; but, as such only will be selected as can be selected as can be readily acclimated, there is little danger but that they will expand as fully as in their native soil, while, by implanting in native hearts the germ of honorable emulation, they may assist in fostering into strength a growth of native flowers as rich and luxuriant as the most beautiful of their foreign rivals.

With this view, it is proposed to issue, monthly, a Magazine corresponding to the above title, containing the usual variety of poetry and prose, of tales and sketches, historical and fictitious, with occasionally a mechanical or philosophical treatise, which, by blending instruction with amusement, will, as well as the drawing-room, for the latter of which, however, it is of course more particularly designed. The work will consist of forty-eight royal octavo pages, and will be printed on good paper, with beautiful new type, and in as fair a style as it is possible to attain. The price is fixed at Three Dollars a year to city subscribers—postage being, as matters of course, added to those who favour us with orders from the country. The first number will be issued as soon as a sufficient number of subscribers have been obtained to guarantee a reimbursement of the funds expended in the mechanical part of the undertaking.

No payments will be expected before the appearance of the sixth number, between which period and the publication of the twelfth, it is confidently anticipated that all subscriptions will be cheerfully paid. Should the hope of the publisher of the success of the undertaking be realized, it is intended to enlarge and beautify the work with Music, Engravings, &c., so as to render it unsurpassed by any American publication.

The Magazine will be printed and published by the undersigned, at Montreal, by whom all letters and orders, postage paid, will be attended to with gratitude and punctuality.

JOHN LOVELL.

MORISON'S UNIVERSAL MEDICINE.
NOTICE.

THE subscribers, general Agents for Morison's Pills, have appointed WILLIAM WHITTAKER, Sub-Agent for the Upper Town, No. 27, St. John Street.

LEGG & Co.
That the public may be able to form some idea of Morison's Pills by their great consumption, the following calculation was made by Mr. WING, Clerk to the Stamp Office, Bonneset House, in a period of six years, (part only of the time that Morison's Pills have been before the public,) the number of stamps delivered for that medicine amounted to three million, nine hundred, and one thousand.

The object in placing the foregoing before the public is to deduce therefrom the following powerful argument in favour of Mr. Morison's system, and to which the public attention is directed, namely, that it was only by trying an innocuous purgative medicine to such an extent that the truth of the Hygeian system could possibly have been established. It is clear that all the medical men in England, or the world, put together, have not tried a system of vegetable purgation to the extent and in manner prescribed by the Hygeian. How, therefore, can they (much less individually) know any thing about the extent of its properties?
