New Series—Vol. 1. No. 8.

BERTRAM BORING AND TURNING MILLS

Readily Convertible from Belt to Motor Drive or the Reverse

72-Inch BERTRAM BORING and TURNING MILL. Motor Driven—no belts

Tool bars are octagon with four sides scraped to a bearing. This gives unusual strength and stiffness and allows the bars to enter comparatively small holes when boring.

Standard belt-driven machines are arranged so that motor drive can be readily applied after the machine is installed. Send for Boring Mill Catalogue.
