GOSSIP.

Messrs. Bell Bros., Bradford, Ont., breeders of Shorthorns, write: "Our stock have wintered well. Our Shorthorns are bred from such noted families as the Stamfords, Rosebuds, Miss Ramsdens, Strathallans, Strawberrys, etc. Have for sale some nice young cows with calves at foot, by Queenston Archer, also some choice heifers by Heir-at-Law = 34563 = and Gladiator (Imp.) 32064. Our stock bull, Queenston Archer, by Derby (Imp.), and out of Veronica (Imp.), by Brave Archer, is leaving some grand calves, which will make their mark in the showing."

Mr. Arthur Johnston, of Greenwood, Ont., changes his advertisement in this issue. He reports sales of seven very fine young bulls during the past few weeks, most of them fit to head first-class Shorthorn herds, both in quality and breeding. He says: "We have still a good lot fit for immediate service, as follows: one five-year-old imported roan bull of most fashionable Scotch breeding; one four-year-old imported red-roan bull, equally fine Scotch breeding; one three-year-old roan bull, and two yearling imported red bulls. Besides these imported bulls, we have a capital-bred Crimson flower bull, now 22 months, roan in color, a first-class bull and a fine breeder. Probably one of the best bulls in the herd is a fourteen-months dark roan Bessie bull, clear imported Scotch, of the richest breeding. Besides these, we have a number of younger bulls from imported sires and dams, four of them fit for service immediately."

SUGAR-BEET PROSPECT IN S. ALBERTA.

The Knight Sugar Company has secured contracts with the farmers along the St. Mary's line for 4,500 acres of sugar beets this season, and seeding operations will soon commence. This is one-third more than was planted last year, and as greater care is being taken in the preparation of the soil this year than ever before for this crop, the tonnage is expected to easily double that delivered last fall, when three million and a quarter pounds of sugar were manufactured. This company has at the present time 250 head of beef stock fattening on the beet pulp stored in the big silo of the factory, affording a practical demonstration to the stockmen of the value of this by-product as a finishing food. Experiments here and at the sugar-beet factories across the line show that a steer cannot eat more than a hundredweight of the pulp daily, which at the present selling price of 50 cents a ton makes the feed-bill 24 cents a day. At the American factories, the pulp is sold at \$1 a ton, and the supply is invariably contracted for early in the summer, as the stockmen find that even at \$1 a ton, pulp is the cheapest fattening feed they can secure. As yet the farmers here have not taken advantage of the opportunity of buying this pulp, but many will do so this fall.

Chicks without Lice

If you will sprinkle the setting hen and nest thoroughly with Instant Louse Killer, we will positively guarantee your brood to come off free from lice.

Instant Louse Killer

Is also equally effective in destroying lice on stock and ticks on sheep, doing its work quickly in every case. It also kills bugs on cucumber, squash and melon vines, cabbage worms, slugs on rose bushes, etc., besides being a powerful disinfectant and deodorizer, thereby destroying many forms of disease. Instant Louse Killer is the original powder Louse Killer, put up in round cans with perforated top. Be sure of the word "Instant" on the can—it has twenty-five limitations.

1 lb. 35 cents.
3 lbs. 85 cents.
