

FAIRBANKS-MORSE

Fairbanks-Morse factories produce the largest line of internal-combustion engines in the world. Hundreds of men in the engineering and experimental departments are employed on all problems connected with gasoline engines. There is no company in the world that has spent as much money as the Fairbanks-Morse Co. on experimental and development work. The name Fairbanks-Morse is synonymous with gas-engine perfection.

Horizontal Evaporator Tank Engine mounted on skids.
Sizes: 2, 4 and 6 horse-power.
Built in our Toronto factory, the finest gas-engine factory in the world.

Gasoline Engines FOR GENERAL FARM POWER

Our farm engines have all the principal features of the well-known Fairbanks-Morse engines, and are made in vertical or horizontal types to meet the requirements of the farmer. Their simplicity means long life.

The MARK of a GOOD WAGON — AND WHY —

IN WAGON manufacturing, good paint too often covers a multitude of defects. But this condition of affairs doesn't last very long. After a little time poor material and poor construction will show and become a constant reminder that you have made a poor choice.

There is a safe way to avoid this—a certain way to a satisfactory purchase. Choose an I H C Wagon, either a

Petrolia or Chatham

In doing so you buy certain satisfaction. You get proved quality. You get a wagon that thousands of farmers have tried out under all conditions of wagon service. There is a lot in the name of a wagon. And in the names Petrolia and Chatham there is everything you could wish for in wagon service and quality.

When you put good money into a poor wagon you are constantly reminded of it. And you continue putting money into it through time lost by breakdowns and inefficient service as long as you have it.

When you buy an I H C Wagon you make an investment that pays you big interest in efficient service for many years.

Both the Petrolia and Chatham Wagons are well up to the I H C standard of excellence.

The Chatham and Petrolia line includes Farm, Freight and One-Horse Wagons. A wagon is no better than the material entering into its construction. Chatham Wagons are as good as the best material, the best construction and the best workmanship can make them. They have hard maple axles, oak bolsters, sand boards, reach and lawns, oak rims, spokes, hubs, oak or black birch, white ash trees and yoke, white ash or oak tongues. The material is dried under cover and carefully inspected. As soon as the machine work is done on all the gearing, each part is soaked in boiled linseed oil so that every grain, mortise and tenon is properly protected. The wheels are subjected to the same treatment before the tires are put on.

See the local dealer and select the wagon that meets your exact need. Or, if you prefer, write nearest branch house for catalogues and prices.
