Questions and Answers.

Miscellaneous.

Grade Stallions.

Are grade horses allowed to travel for
stud purposes in any parts of Ontario?
E. H.

Ans.—At the present time, yes.

Lump on Cow's Udder.

I have a cow which has had, for the
past two years, a lump between teats.
It has been growing larger lately, but
does not seem sore to touch, and can
be moved with the skin. Please tell
me if I can get anything to take lump
away.
T. W.

Ans.—A veterinarian might be able, by
operation, to successfully remove it. It
might be possible to reduce it by appli-
cations of iodine.

Countermanding Order.

I bought some fruit trees last fall. A
month later I gave the company notice
to cancel the order. They wrote saying
the order was not subject to counter-
mand. Can they compel me to accept
the trees?
Ontario.

SUBSCRIBER.

Ans.—It is probable that, after tender
to you of the trees in accordance with
the terms of the contract, they could
compel you to pay for them.

Breeding Filly.

1. I have a young Clydesdale mare rising
two years old, pretty good size; would
weigh 1,100 lbs. Would she be too
young to breed?

2. Would it be advisable to use a
Percheron stallion on a Clydesdale, as I
rather prefer the Percheron horses?
F. S. M.

Ans.—1. She should be a little larger,
but it might not injure her. Breed her
a little late in the season.

2. Do not cross. If you prefer Perch-
erons, get Percheron mares.

Railway Ballast.

I have a gravel-bed about one mile
from the ——— railroad. Two
years ago the said company advertised
at different places along the road for
gravel or ballast, and I wrote them,
with the result that the company sent
men to test the ballast, and it was pro-
nounced good stuff. Have the company
any right of claim on such gravel at
such a distance, other than buying it at
my price? I am told they have.
Ontario.

FARMER.

Ans.—Yes,—see the Railway Act, Re-
vised Statutes of Canada, 1906, Chap.
37, and especially Sec. 180.

Deceit.

I took colt to auction sale. The colt
was knocked down at \$75. This man
wanted to get home early, so he went
down to the house where a man was
busy filling out notes. He said he wanted
to sign his note and go home; but
the man told him they had not the book,
as the sale was not over. He said he
would give them the amount. So he
said he bought the colt for \$70. He
should have said \$75. I saw him the
next day, and he would not make it
right. I have several witnesses that he
bought the colt at \$75. What proceed-
ings should I take to have him make it
right?
Ontario.

Ans.—Sue him in the Division Court.

Grass Pastured Off.

Last spring I seeded down my orchard
with a mixture of grasses, clover pre-
dominating, and the adjoining three
acres with lucerne. The seed made a
splendid showing, but my neighbor's
stock got in and pastured the whole
bare. They did the same thing to an-
other field of timothy, which, however,
was three years old.
E. L.

Ans.—About all you can do is to wait
and see whether or not the grass comes
through the winter. Once in a while,
grass so pastured off comes in the spring
after a favorable winter. If it does not,
why, of course, it will be necessary, if
you wish the land seeded down, to re-
seed, and see that the cattle are kept
off the land.

Buy an Engine with Reserve Power

FARM power needs are seldom the same for any
two days together. You never can tell when extra
power will be needed. For this reason it is best to
buy an engine a little larger than you ordinarily need. The engine
with ten to twenty per cent of reserve power will often save enough to
pay for itself just by its capacity for carrying you through emergencies.

I H C Oil and Gas Engines

are large for their rated capacity. They are designed to run at the
lowest possible speed to develop their power because that increases the
durability of the engine. A speed changing mechanism enables you to
vary the speed at will. Any I H C engine will develop from ten to
twenty per cent more than its rated horse power. You can use it to
run your feed grinder, pump, grindstone, repair shop tools, cream
separator or any farm machine to which power can be applied.

I H C engines are built vertical, horizontal, stationary, portable,
skidded, air cooled—in 1 to 50-horse power sizes. They operate on
gas, gasoline, kerosene, naphtha, distillate or alcohol. I H C trac-
tors in sizes from 12 to 60-horse power. See the I H C local agent
