Toronto Office: Queen City Chambers, 22 Church Street, Toronto. H. E. Smallpeice, Representative.

WEEKLY COURIER—Published on Thursday morning, at \$1 per year, payable in advance.

Monday, September 15, 1913.

## THE ACCOMMODATION OF NURSES

In connection with a hospital investigation at Hamilton, it has transpired that the accommodation for the nurses has been poor.

Their sleeping quarters have been entirely inadequate and there has been overcrowding to a direct sanitary and health menace. The demand there has now become general and insistent for new and improved conditions.

Every woman so employed should have her own sleeping apartment away from the main structure, for it is not fair or seemly that those so employed should be constantly housed amid necessary scenes of suffering, and then be huddled together in some small apartment at the end of the day's work.

It was a recognition of this fact which led the members of the Ladies' Hospital Aid, some time ago to commence the splendid work of establishing a Nurses' Home in connection with the local establishment. Their task was a laborious one, but the citizens of Brantford sprang nobly to the assistance, as they always do in connection with any good cause, and as the outcome, this city has now as an accomplished fact, something which residents of Hamilton have just commenced to realize is an absolute necessity.

The formal opening of this commodious and well-furnished structure will take place on Friday of this week and will be the occasion of much legitimate satisfaction among all classes of the community.

## NAVY RECRUITING DIFFICULTIES ON THIS CONTINENT

Certain Liberal papers are still continuing the pretence that it would be an easy thing to man a Canadian navy with Canadians.

That it would not, any observing man must realize, who knows the failure of such a move in connection with even Laurier's toy affair, and of the tremendous difficulty which Uncle Sam experiences in keeping his regular army and navy up to full strength.

Here is a sample of the nature of the literature scattered broadcast among our neighbors.

"Workingman, what wages are you working for?

How much do you have left in your pocket after paying for your board, lodging, clothing and other necessities?

Do you know that if you are an active young man, of temperate habits, free from disease, the United States Army offers you good pay and the opportunity, free of cost, to see the world—the Orient, Hawaii, the Philippine Islands, Alaska, Panama, and all the United States. Also an excellent opportunity to obtain a mechanical and technical education and thorough training in electricity at government expense.

You receive free: Board, lodging, clothing, medical attendance, baths, lights, and the advantages of schools, libraries, gymnasiums, etc.

Full pay and allowances while sick and while on ordinary furlough. No doctor's bills.

A pension for life if permanently injured or incapacitated in line of duty.

A steady job for four years and upwards. Retirement after thirty years' service with a Government check each month for \$34.50 to \$90.00 according to grade held at time of retirement.

You receive during your enlistment a clothing allowance of \$15.00. This will buy all the clothing you need and allow you a saving of \$40.00 to \$75.00 or more which will be paid you in cash upon discharge. During your second enlistment this saving can be doubled.

You will be paid upon discharge two cents per mile from place of discharge to place of enlistment. Example—If you are discharged at San Francisco you receive in cash \$61.10.

Ask your present employer for these advantages, and see what he says. The pay is from \$15.00 to \$90.00 per month, depending on rank and length of service, with 20 per cent. increase for foreign service in the Philippine Islands and Alaska. Remember that all necessities are furnished free by Uncle Sam and that you can spend your pay or save it as you wish.

Splendid chance for advancement. Special inducements offered to Pharmacists, Musicians, Bandmen, Electricians, Clerks, Bakers, Cooks, Barbers, Teamsters, Carpenters, Blacksmiths, Horsehoers, and other mechanics.

A favorable opportunity is offered for active, intelligent young men of temperate habits, who may enlist as

privates and develop the necessary qualifications, to secure promotion to commissioned officers. There are in the army over 500 commissioned officers, ranging in rank from General officer to Lieutenant who enlisted as privates and obtained commissions in this manner.

Does this look good to you? Don't you think it will pay you to investigate?

You are invited to call at any of the Army Recruiting Offices named below, where you will be treated with the utmost consideration and your questions answered. If there is no Army Recruiting Office in your town write for Recruiting Circular, which explains all the requirements and conditions of enlistment. Perhaps a man can be sent to your town to talk it over with you and your friends. Write and see.

A similar appeal set out on colored posters, is also freely distributed regarding the navy and there are recruiting agencies in all centres with a large number of petty officers eagerly looking for men.

The truth is that there are too many chances offering to capable young men both in Canada and the United States to make a man-of-war discipline or army discipline attractive.

**A FUTILE TOUR.**—The Conservative press shows perturbation over the promised campaign of Mr. J. A. Cooper of the "Canadian Courier," and Mr. Arthur Hawkes of "The Canadian and British News" against the centralization of naval defence. —Toronto Globe.

This paper for one, hasn't noticed any wild desire, on the part of Tory journals to take to the woods because of the proposed tour.

It is equally certain that Premier Borden and members of the party as a whole are not losing any sleep over the matter.

The gentlemen named are both excellent and capable men, who, of course, have a perfect right to tell all the rest of us what should be done, if they see fit, but their views as far as the Conservative party is concerned, will be simply those of individuals without any backing from the ranks, unless they can create such, which is most emphatically unlikely.

The plain truth is that like Sir Wilfrid Laurier, the Globe, and others of the Liberal party, have got it wrong on this matter.

Leaving politics aside, as they should be left in such a case, every man who gives the subject any consideration at all must realize:

1—That it would be a physical impossibility for Canada to build Dreadnaughts, save at the cost of many years.

2—That it would be equally impossible when built, to man them solely with Canadians, for the simple reason that capable young men in this fast growing country have many better opportunities.

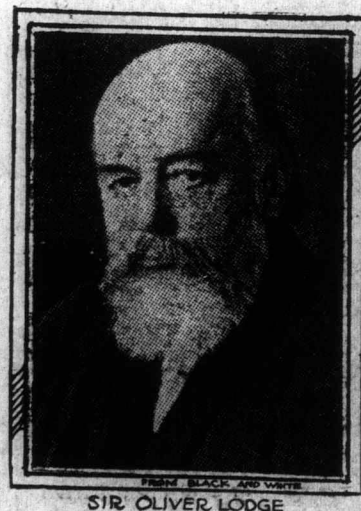

3—That the very fact that John Bull despite the action of the Canadian Senate, is himself going ahead with the proffered ships, is proof positive that he needs them as speedily as possible—far, very far, sooner than Johnny Canuck, under the best possible circumstances would be able to lay down even one keel.

The talk of jeopardizing Canadian autonomy because of the performance of an act long overdue, is, of course, the veriest buncombe, not calculated to fool any but the most simple-minded.

Hawkes and Cooper can spout as much as they like, and it is to be hoped that they will enjoy their self-imposed task, but they might as well make up their minds before they begin that they cannot make any inroads on the feelings of the vast majority with reference to the excellence and the suitability of the Borden plan.

And if the Globe really wants to note party defections on the subject, it can find hundreds of Liberals who do not approve of Laurier's "put off," and at present totally impracticable scheme.

## NOTED SCIENTISTS.

SIR OLIVER LODGE

Sir Oliver Lodge is president of the British Association for the Advancement of Science, the most distinguished body of scientists in the world.

## NOTES AND COMMENTS.

If the deportation of Thaw from Canada involved an unconstitutional act of the immigration act, then said act had better be allowed to remain that way.

The announcement is made that women wore beards in the long distant past. It would take a pretty plucky man in more senses than one, to beard some of them these days.

President Wilson and his associates are stated to be now exceedingly anxious over the situation in Mexico. Sooner or later Uncle Sam will have to do the inevitable with regard to that country.

The Washington authorities have devised a bench for the parks which will prevent flirting. This is done by the use of iron arms which are intended as a preventative of steel embraces.

Ulster continues to announce that it still proposes to take that garment off for the better purposes of a fight. It may sound strange but it is nevertheless a fact, that the West is tickled to death over coming the greatest cropper of its career.

British Anthropologists now in session in the Old Land have reached the unanimous conclusion that in the selection of a husband a woman has few or no aesthetic instincts; no sense of the beautiful. That accounts for the appearance of many huddles the world over.

The Winnipeg Free Press each fall publishes an official estimate of the grain yields of the three prairie provinces and the figures usually turn out to be correct. The commercial editor has spent nearly two months on the job, and has motored 1493 miles through crops. The result shows a grain output of approximately four hundred and fifty million bushels, and wheat alone exceeds 1912 by seven million bushels. The early receipts of all classes show high quality.

Manitoba has barred moving pictures of scenes in connection with Thaw's arrest at Sherbrooke, Quebec. Good for Manitoba. This continent has had altogether too much of "his nastiness." On the same basis, Evelyn Thaw, now doing a vaudeville stunt in the States should not be allowed to display herself in Canada. Pictures and acts which depend upon licentiousness and murder for their drawing power should not be tolerated anywhere.

## True Eloquence

Chicago Inter-Ocean . . . . . "Zip," is Maitre Labori's comment upon Chicago. No wonder a man who can say so much in such small compass is the leading lawyer in France.

## The Farm, the Old Reliable

Hamilton Herald. Ontario mineral production increases; but after all it is the product of the farm that the old province must continue to rely upon.

## Merely a Suggestion

Chicago Record-Herald. If they tear up the tracks and destroy the rolling stock they may be able to make the New Haven road comparatively safe.

## BIG EXPENDITURE IS AUTHORIZED

## City Council Does Not Question Big Purchases by the Hydro Electric.

The board of works and fire and light committees were the only ones to submit reports at the council meeting last night. Both reports were adopted without discussion. The fire and light report recommended big expenditures for equipment, but the council showed confidence in Engineer Ireland's department by not even questioning any detail of the work.

## Board of Works

The board of works reported as follows:

That permission be given the Brantford Hydro Electric system to lay their wires and standards on the inside of the curb on both sides of the following streets: Colborne from Lorne bridge to Charlotte; Dalhousie from George to Brant Avenue; Market from Water to G. T. R. Ry station; George from Colborne to Dalhousie; Queen from Colborne to Darling; and that all work in connection with the laying and replacing of the walks is to be done at expense of said system.

That the request of the Paris Board that their account for cleaning snow at city parks be struck out, be not granted, and that they be notified that as long as this work is undertaken by the city the cost of same will have to be charged to them.

That in accordance with the request of the Board of Park management, as contained in the letter of their secretary of July 14th, that portion of Grand River Avenue lying between Jubilee Terrace and Church street, be transferred to them.

That the request of the Brantford Foundry and Development Coy., as set forth in their letter of July 10th for permission to run switches from the Brantford and Tillsonburg Railway line through their property, be granted in accordance with the plan filed with their application and subject to the approval of the Railway Commission. Switch (a) does not touch the city property and switch (b) takes from nothing on the south side of Grey street to 2 1/2 feet additional width on the north side of Grey street.

That the cement walk to be laid on the west side of Grant street from Balfour to Brant street be placed on the outside of the boulevard.

That the following communications be filed: G. W. Latimer of July 1st; Brantford Foundry Development Co. of July 10th; J. J. Hawkins of July 10th; and that the letters of Brewster and Heyd of July 18th and August 16th be referred to the city solicitor. Ald. Suddaby submitted the report. Ald. Spence said he would like to know if Rev. Latimer's letter called for any action.

Ald. Suddaby: Yes, that sewer has been completed. The report was thereupon adopted. Fire, Light and Hydro.

The fire and light committee reported as follows: That the tender of the Ornamental Lighting Pole Co. Limited, for 152

ornamental cast iron street lighting standards at \$30 each f.o.b. cars, Brantford, be accepted.

That the tender of the Canadian General Electric Co. Limited, for 152 ornamental magnetic street lamps including cutouts, also three fifty-light regulators and controlling equipment at a price of \$16,330, be accepted, the price to cover lamps, etc., delivered f.o.b. cars Brantford, and to include complete installation of regulators, etc., ready for operation by the Canadian General Electric Co.

That the tender of the Canadian Crocker-Wheeler Co. Limited, for two 750 K.V.A. substation transformers at a price of five thousand dollars be accepted, the price including installation ready for operation.

That the tender of the Canadian Westinghouse Co. Limited for recording switchboard instruments at a price of \$556 f.o.b. cars Brantford be accepted.

That the tender of the Canadian General Electric Co. Limited, for complete high tension and low tension switching and control equipment for substation be accepted at a price of \$9,425, the price to include installation ready for operation.

That the city solicitors be instructed to prepare forthwith contracts for all the above.

That the petition of the A. J. Reach Co. be handed to the water commissioners with the recommendation that the request be granted.

That a pulmotor be purchased at a cost of one hundred and fifty dollars. Ald. McFarland, chairman of the committee, read the report, which was seconded by Ald. Woolams. Ald. McFarland said in regard to the com-

**HOOD'S PILLS** Cure Biliousness, 25c. Best for all liver ills. Try them.

tract for the two 750 substation transformers, they had been asked for at a previous meeting. It was thought that they would have to go \$2,500 higher than the original estimate. Through Mr. Ireland's efforts, the two transformers can be purchased at \$5,000, only exceeding the estimate by \$500. No alderman here, said Ald. McFarland, need smile if a few hydro accounts are brought up here. There is not one item whereon the estimate has been exceeded.

Wherewith the report went through without discussion. It pays to have a good engineer.

## HARVEST HOME AT SNYDENHAM

The Harvest Home, entertainment given in Sydenham St. Methodist church last evening, was a splendid success. A very large crowd was present and the programme was an excellent one. Mr. J. H. Fisher, M. P., of Paris, acted as chairman, in a most genial and pleasing manner. The de-

corations of Sunday were still in evidence and the whole evening was a most enjoyable one. The music for the occasion was furnished by the Brant Male Quartette (Messrs. Crocker, Kerr, Styles and Green), and the quartettes, solos and duets they put on delighted the audience to such an extent that encores were the order of the evening. Miss Ina May Jones was the reader of the evening and her selections were given with splendid artistic ease and expression. The audience was delighted with her work. Four short operation in the church: Rev. L. man on "activity, harmony and co-operation in the church"; Rev. L. Brown "A Little Bit of Love"; Rev. A. E. Lavell, "The Church Militant"; and T. H. Preston, "The Old Time Religion." Each speaker confined himself to his subject briefly but entertainingly and they were away and above the average "speech" at an occasion of this kind. A pleasing diversion was the presentation by Mr. Fisher of a ten dollar gold piece to Leslie Hodges, the boy who passed head of his section at the recent entrance examinations from Grandview school. The offering was quite satisfactory and the affair a most successful one.

## Talking to the Point

CLASSIFIED WANT ADS. get right down to the point at issue. If you want something, say so in a few well chosen words. Readers like that sort of straight-from-the-shoulder-talk, and that is the reason why condensed ads. are so productive of the best kind of results.

CLASSIFIED WANT ADS. in this paper are always noticed, because they are in the back page of the first section, along with the births, marriages and deaths. They are read by wide-awake, intelligent readers, who are on the lookout for favorable opportunities to fill their requirements.

## Paris New

(From our own Correspondent) PARIS, Sept. 16.—Duck, a city who migrated to the pond in early spring when the season opened yesterday, report much better luck for several seasons past. Mr. Shawcross had an unpleasant experience when he endeavored to some dead ducks on the "West" pond, using an old lead for the purpose. The boat capsized, and the duck shot in heavy garments and wading and loaded down with cartridges had a lively few minutes in the upturned boat. Luckily he had with no more loss than a gun and the dead ducks.

The lateness of the Grand cars on Saturday robbed Paris victory over Brantford in a Ontario cricket league fixture game did not commence. Had Paris declared all out at six wickets they would have but the whole eleven went in and the game dragged out with nine Brantford men retreating standing. Paris 122, Br. 80.
