Bright's Disease Invariably Vanguished by Dodd's Kidney Pills.

Other Cases in Which the Great Kidney Remedy Conquered.

Men Tell of Reliable Victories Over the Dread Disease.

(From Mail and Empire.) So great has been the interest in Toronto over the cure of Bright's Disease, reported from Shubenacadie, Nova Scotia, that a reporter yesterday visited the head office of the Dodds Medicine Co., 62 Youge street, Toronto, to ascertain the views of the management concerning the case. He found the management satisfied, but her assessment satisfied,

but by no means surprised.
"No," was the answer to the reporter's question. "We are not surporter's question. "We are not sur-prised that the public generally are at length being forced to the conclu-sion that Dodd's Kidney Pills will cure Bright's Disease. We have known it for a long time ourselves. The Par-ker cure is only one of many of which we can furnish proofs.

A Specialist's Prescription "The troubles in these cures have been made by what is termed a 'patent medicine.' Had they been made by a physician in the regular way, and that physician had been able to tell exactly now he brought them about, they would have been talked of learnedly from one end of the country to the other. But when people talk about our cures there is a tendency to say, 'Oh, that is only a patent to say, 'Oh, that is only a patent medicine advertisement

"They forget that Dodd's Kidney
Pills are the life work of a doctor,
that they have been uniformly successful in treating all diseases of the Kidneys, and that the only feature in which they differ from regularly obtained medical advice is that the prescription of a specialist is given the public at popular prices.

No Room for Doubt No Room for Boubt

"Now, you have seen the particulars in the Parker case. Nobody can doubt for an instant that that was a veritable case of the 'incurable Bright's Disease, neither can anyone doubt that the cure was effected by Dodd's Kidney Pills and by no other agency. Of course it took time and perseverance, but the patient was in the last stages of the disease before she started to use Dodd's Kidney Pills. Had she started sooner the work would have been easier and the results would have been easier and the more specific. been obtained much more speedily. It was an extreme case and took

"Here is another case., If you'll take the trouble to look at this letter you'll see it is written by the Postmaster at Lovett, Ont., Mr. C. A. Paul's Farcwell to Ephesus.—Acts 20; 28-28.

Commentary: — Connecting links. After the riot at Ephesus, Paul immediately left the city. This took place, according to Lewin, in May, A. D. 57. The apostle then spent ten menths visiting the churches he had founded on his second missionary journey. His first stopping place was Troas (H. Cor. ii. 12, 13). Here he was disappointed in not meeting Titus with news from the church at Corinth. Paul then crossed over to Europe and probably visited Philippi, Thessalonica and Berea; and perhaps it was at this time that he journeyed to Hlyricum (Rom. xv. 19). While in Macedonia, perhaps at Philippi, he wrote his second letter to the church at Corinth. Paul then visited Cocinth and while there wrote the episte to the Galatians and to the Romans.

The Holy Ghost had placed them in charge of His chosen people, who had been purchased with a great price—the blood of Christ, Great is the responsibility of those who are made overseers of God's elect ones. The doctrine of salvation by faith in Christ is the only sure foundation upon which they could build. Once settled upon that foundation the rance of God is sufficient to keep a soul even though without any human support. For those who are sanctified and faithful God has provided an inheritance. In the possession of this inheritance, the sanctified enjoy communion with God and with His saints on earth, together with the assugance of sharing His glory and blessedness in the world to come. and New York.

In a recent issue of one of the magazines appears an interesting study of British police methods in the detection and punishin at or erimes of violence as revealed in London's criminal record for a single year. The article has special significance, coming from the pea o. Colonel Avery D. Andrews, formerly police commis-sioner of New York, and who was Butte, Anaconda and Helens sioner of New York, and who was last year appointed a special commissioner to investigate and report a scheme for reorganizing the police department of that city. During the calendar year 1901, only twenty-four murders were reported in London, with its murders were reported in London, with its population of six millions. In sixteen of these cases, or two-thirds of the whole number, the accused were brought before the courts; six of the remaining eight committed suicide; one escaped to Italy, and one, a woman was not prosecuted owing to the peculiar cirrosecuted owing to the record with that of New York is startling. Last year about one hundred murders were committed, and in seven months sixteen murders were committed in the boroughs of Manhattan and the Bronx alone. In not one case of these sixteen murders were reported in London, with the Union Pacific.

The UNION PACIFIC has also extended territory to which round territory to which round the Bronx alone, a woman was not prosecuted territory to which round the Bronx alone, a woman was not prosecuted territory to which round tended territory to which round ten

were committed, and in seven months sixteen murders were committed in the boroughs of Manhattan and the Bronx alone. In not one case of these sixteen was an accused person brought to trial. That New York is not exceptional in the United States is shown by the figures of the Chicago Tribune, which makes a specialty of criminal statistics, and which is authority for the statement that in 1901, when London had twenty-four murders, the United twenty-four murders, the United States had 7,852, and only one hunthe United states had 7,852, and only one hundred and eighteen murderers were executed. Last year there were nearly one thousand more murders, and only tweaty-six more excutions. Colonel Andrews suggests that the celerity and certainty of justice has much to do with the small number of crimes of violence in London, and he is doubtless right, for the same hour.

qualities in the administration of justice in Canada have had an equally deterrent effect, although it must be dmitted that in this country there have of late years been some fearful miscarriages of justice as well as a great many cases in which the officers of the law have been obliged to confess themselves baffled.—Saturday Night.
