The Two Claimants
(By Louise B. Cummings.)

Howard Prower and Ralph Cunningham, two young Englishmen, met in the gold country of Colorado and became fast friends.

These young men, having compared notes, learned that they came from eminent British families. Prower was a younger son of a nobleman, and Cunningham claimed to be a graduate of Oxford. Besides the fact of their being fellow countrymen, there was a strong resemblance between them. They were nearly the same height and build and both light complexioned. There was one difference between them, though it was scarcely noticeable. Prower's right eye was of a slightly different shade of blue from his left eye.

But there was a great difference in the character of the two men. Howard Prower was a kind-hearted, noble man; Cunningham was a devil. They prospected together for a time, agreeing that if one struck paying dirt he would share it with the other. Finally Cunningham dug a hole in the ground for which he was offered a hundred thousand dollars. He had no intention of sharing it with Prower, and was deliberating how he could beat him out of his portion when a letter came addressed to Howard Prower, Earl of Brokefield.

Prower was away on a prospecting tour when the letter came. Both men had been away from England for ten years. If Prower were out of the way, Cunningham might return, pass himself off for the new Earl, and thus appropriate the title and estates. While he was deliberating on this plan word was received that Prower had been attacked by claim jumpers and murdered.

Cunningham went to the place where the fight had occurred and tried to find his friend's body. He was told that a number of persons had been killed in the fight and they had all been buried side by side. He was shown the graves, but saw no reason why he should exhume his friend's body. Returning to his cabin, he opened the letters that had been received and learned that Prower's father and two older brothers had been taken ill and all had died within a period of a few weeks.

A month from that time Cunningham appeared in England and claimed to be Howard Prower, now Earl of Brokefield. There was no one of the family to receive him except a sister of the late Earl, who did not doubt that he was her nephew.

No one disputed the identity of the claimant except Lady Gladys Pembroke, the daughter of a neighboring nobleman who would have been Howard Prower's wife except for his poverty. She had not married and when the heir returned expected a happy meeting. To play the part of her lover was more than Cunningham could accomplish, and she at once pronounced him an impostor.

But notwithstanding this assertion, Cunningham established himself as the Earl of Brokefield. He had played the part of a peer for four months, when he should appear but the real Earl, Prower had been left for dead by those who had attacked him and those who had joined in his defence. Before they had returned to bury the dead, he had crawled away. When he had recovered he looked for his enemy, but did not find him. Later he had heard of his father's and brothers' death, and at once started for England.

When one day Howard Prower walked into his home and met his old friend face to face the latter turned pale. There was one of two courses which he might choose—step down and out or claim that the newcomer was an impostor. He chose the latter course. He ignored his visitor, saying that he had come to personate the real Howard Prower, but that he

would be unable to substantiate his claim.

Prower, aghast at such treatment, withdrew and entered suit against the man who had usurped his title and his property. His aunt unfortunately adhered to the opinion that Cunningham was her nephew. This left Lady Gladys Pembroke the only witness in Prower's favor, and her evidence was not counted so valuable as that of a member of the claimant's family. Nevertheless, Lady Gladys warmly espoused Howard's cause, and the relations of lovers that had existed before he left for America were resumed.

One witness was found in an old woman who had nursed Howard when he was a baby. But she had never seen him since that time, and her evidence was not considered of much value, especially since in her old age she had lost her eyesight. However, at the trial she was called to the witness stand and testified as follows:

"I have not seen Howard Prower since he was a baby, when I used to give him his bath and wheel him in his perambulator, but if I could see plainly now as then I would know him, for I noticed on him a defect I have never seen in any one else. His eyes were of a different shade of blue."

The two claimants were at once examined carefully. Nearly all the examiners pronounced that the blue of Howard's right eye was slightly lighter than that of his left.

This settled the case definitely, and he was adjudged to be the Earl of Brokefield. Cunningham was sent to prison for a term of years for making false pretensions.

RELIEF AT LAST

I want to help you if you are suffering from bleeding, itching, blind or protruding Piles. I can tell you how, in your own home and without anyone's assistance, you can apply the best of all treatments.

PILES TREATED AT HOME

I promise to send you a FREE trial of the new absorption treatment, and references from your own locality if you will but write and ask. I assure you of immediate relief. Send no money, but tell others of this offer. Address:

Windsor, Ont.

Siberia's Boom Town.

What the great Trans-Siberian Railway has done to develop the remote districts which it penetrates is strikingly shown in the story of the town of Novo Nikolaievsk, Siberia. When the rails of the Trans-Siberian reached the Ob River, the site of the town was a tangle of underbrush, with no signs of human habitation; now it is a modern city of 10,000 inhabitants, with electric lighting, large stone buildings, schools, a large town hall and a cathedral in the Byzantine style of architecture.

The reason for this rapid development is that Novo Nikolaievsk is situated at the intersection of the Trans-Siberian Railway and the River Ob, the great artery of communication for Western Siberia. Now that the Altai Railway has reached Bisk, Barnaul and Semipalatinsk, much freight will go beyond Novo Nikolaievsk, but it is expected that the new city will make up for this loss by the cargoes that will be transhipped into vessels on the Ob for conveyance down the river to the projected railway from the Ob to the White Sea. Novo Nikolaievsk will thus become a "window into Europe" not only for the Altai region, but also for all Siberia tapped by the railway from the eastern boundary of the Tomsk government almost to Omsk. New York Times.

Minard's Liniment Used by Physicians IN DAMP WEATHER.

Precautions to Be Taken by the Housewife.

A little while ago two young housewives were condoling with each other over the prolonged season of humidity and dampness.

"We can't get a single bureau drawer closed," said one, "and last night when I wanted to get out the very best table linen I own for an unexpected guest, we couldn't get the linen drawer open, and instead of showing off my best, we had to use paper napkins."

"We're in a worse state," said the other. "Finally after much pulling I got a bureau drawer all the way out, and now I keep it propped up on two chairs because I can't get it in again."

Summer dampness is really hard to guard against. It is sure to come every year. The weather is too warm to permit fires which might restore the house to a comfortable dryness, and as the dampness is only

The Seal Ring.

The seal ring dates back to the days of the Old Testament and products of the glyptic art, as gem engraving was called, were known in the most remote times. In Exodus xxviii, 17-20, mention is made of the following stones, upon which the names of the twelve children of Israel were engraved: The sardius, the topaz, the carbuncle, the emerald, the sapphire, the diamond, the ligure, the agate, the amethyst, beryl, onyx and jasper. In verse 2 of the same chapter we find mention of the engraving of signets upon the hardest stones. It is believed that the Egyptians instructed the Israelites in the art of stone engraving. The Egyptians used the lapidary's wheel and emery powder and knew the use of the diamond in engraving other hard stones. Among the Assyrian and Babylonian ruins were found fine specimens of signets on gems, many of them set in rings.

Keep Minard's Liniment In the house

THE VOICES CALLING ME.

I walk alone on the beach to-night
And the stars throw down their gentle light
I'm catching the lure of the old church bells,
They sweep me on where memory dwells,
And bring in those visions bright—
Bring in those visions bright
Of many I loved, who from o'er the sea
Are stretching out hands of love to me
Oh, their voices are calling me, so tenderly calling me.

MINARD'S LINIMENT CO., Limited.

I was very sick with Quinsy and thought I would strangle. I used MINARD'S LINIMENT and it cured me at once. I am never without it now.

Yours gratefully,
MRS. C. D. PRINCE,
Neuwigewauk, Oct. 21.

DOING COLONIZATION WORK

Western Canada is not the land of the romancer, but happily ending stories frequently owe origin to the west. For example, here is what Albert V. Laidlaw, of North Dakota, at the Royal Alexandra Hotel told a newspaper representative the other day:

"I am on my way as a home-visitor to my former home. I have ended my work for the season in harvesting grain. I have seen the last of it threshed, drawn, loaded and shipped for sale.

"I have worked early and late through the entire season with the idea of 'making good' on the season and asking myself a holiday. I have been successful. Everything is snug at my farm buildings. There is nothing for the hired man to do but to feed the stock. I am away on a three-months' leave, and I am going back to my former home and tell the folks about Western Canada."

Canadian Pacific Railway officials assert that a superior class of settlers from the United States arrived in Western Canada last year. The settlers have made good, it was asserted. Many of the settlers are now home-visitors to their former homes.

Officials asserted that in addition to the pleasures to the home-visitors in taking a holiday and the revenue to railways in the west, the home-visitors are doing a great colonization work for Canada. The holidays of the home-visitors invariably lead to new settlers and the breaking of new soil, which means increased crops and additional prosperity to the west, passenger officials assert.

Every brave man is a man of his word.—Cornelle.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. Concerning them Mrs. Romaine Polier, Mizonette, N. B., says:—"My baby suffered from constipation, but thanks to Baby's Own Tablets he is perfectly well again." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SCIENCE NOTES.

The heaviest theatre curtains are now operated by the touch of a button.

The pressing need for small locomotives has been responsible for the rescue of many old-timers from the scrap heap. They have been rejuvenated and placed in service in Europe.

Babies under treatment at the Hebrew Infant Asylum, in New York, are kept in glass cases to prevent danger of cross infection.

Machinists engaged on fine work now make use of magnifying mirrors in order to more carefully watch the progress of the operation.

Private enterprise has resorted to use of aeroplanes for the exploration of Argentine where it is hoped to make use of a waterpower which has been heretofore inaccessible.

Discarded sleeping cars are being used as dormitories by the students

Remarkable Reptiles.

During the time of deposition of the clays constituting the Morrison shale in southern Colorado there existed a great variety of remarkable reptiles of huge size. Their bones, which are in places abundant, are the remains of animals that were mined in the soft clay of which Morrison formation largely consists. Some of these creatures, such as the brontosaurus, were sixty feet long. Many of them had remarkably small heads, notably the stegosaurus, which had so diminutive a brain that it must have been very stupid. This animal was undoubtedly very clumsy also, but its huge size and protective armor aided in its preservation.—Geological Survey Bulletin.

Montreal Man Tells Wonderful Story

BAD CASE OF BRIGHT'S DISEASE CURED BY DODD'S KIDNEY PILLS.

George Sullivan, Who Suffered From the Dread Disease for Two Years. Gives Credit for His Recovery to Dodd's Kidney Pills.

Montreal, Que., March 22.—(Special)—Completely cured of that most dreaded of all diseases, Bright's Disease of the Kidneys, Mr. George Sullivan, 254 de St. Vallers street, this city, is spreading the good news that he found his cure in Dodd's Kidney Pills.

"I suffered from Bright's Disease for two years," Mr. Sullivan states in an interview. "I was unable to work for weeks at a time. I spent hundreds of dollars on doctors without receiving any real benefit and received outdoor treatment at the Toronto General Hospital.

"I was feeling very badly discouraged when a friend advised me to try Dodd's Kidney Pills. After using three boxes I was much better. I kept on till I had used nine boxes, when I was completely cured.

"Naturally I consider Dodd's Kidney Pills a wonderful remedy."

Dodd's Kidney Pills are no cure-all. They cure kidney diseases of all kinds from backache to Bright's Disease. The proof of this is their growing popularity in Canada for over a quarter of a century. If you haven't used them ask your neighbor about them.

Graphic Description.

Zach had been introduced to a new circular saw. The foreman of the sawmills performed the introduction, and after giving Zach a few necessary extra instructions he left him to his work. Zach was really interested in the buzzing blade, and his curiosity getting the better of his discretion, he soon found himself minus a finger. Despite his excitability he was something of a stoic, so he bound up his wound without seeking assistance. While he was thus engaged the foreman reappeared. To him Zach described the accident.

"But how on earth did you manage it?" the foreman exclaimed, angrily, for the prospects of damages ahead were not exactly pleasant.

Zach shook his head.

"Sure, an' I don't know," he said. "I just touched the thing like this with my finger when—I'm blessed if there ain't another one gone!"—New York Times.

HELP WANTED.

LADIES WANTED TO DO PLAIN and light sewing at home, work of spare time, good pay; work sent by distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

WANTED—SECOND HAND FUR WETS finishing department, work chiefly heavy woollens and blankets; good pay for right man. State age, and experience. Sibley Mfg. Company, Ltd., Brantford, Ont.

Please Mention This Paper.

Ask for Minard's and take no other CORAL REEFS.

Nature's Methods in Building Those Seashell Monuments.

Coral reefs surrounded many of the islands in the Pacific. They protected the lowlands from the washing of the waves, and the still waters enclosed by them are the only harbors of refuge for ships. The reefs themselves furnish the greatest peril to navigation, and if there were no inlet through which a vessel could enter their protected area they would be a danger and nothing else.

But almost every reef has such an inlet. It is a necessary result of the laws under which the forces of nature work. To understand this we must see how these reefs are formed.

Chemically the reef corals are almost pure carbonate of lime, the substance of ordinary limestone and marble. The reef corals as the shell of the oyster or any other shellfish grows, it is itself the common and undivided shell of innumerable polyp or minute insects, which are being produced and are dying in successive generations.

These tiny beings get all their living from the waters of the sea. It is from this source also that they derive the salts of lime from which they secret the heavy structure that remains after the animal is dead.

The coral polyp cannot live in fresh water. Their food supply is brought to them by the waves and currents of the sea. As a result they secrete the heavy structure that remains after the animal is dead.

The coral polyp cannot live in fresh water. Their food supply is brought to them by the waves and currents of the sea. As a result they secrete the heavy structure that remains after the animal is dead.

There will be the inlet to the inclosed waters.

One Safe Rule.

Hopkins' wife has a ful for all manner of things sanitary. She came across an interesting item in the evening paper and promptly communicated it to her husband.

"An eminent medical authority," she said, "claims that a dentist's fingers carry disease germs."

"In that case," said Hopkins, "there's but one safe rule to follow—boil your dentist!"—Exchange.

TWO NEW V. C.'S.

Heroic Officers Win Highest Award for Bravery.

According to the London Gazette the King has been pleased to confer the Victoria Cross on the undermentioned officers:

CAPTAIN WILLIAM ANDERSON BLOOMFIELD, Scouts Corps, S. African Mt. Bde.

For most conspicuous bravery. Finding that, after being heavily attacked in an advanced and isolated position, the enemy were working round his ranks, Captain Bloomfield evacuated his wounded, and subsequently withdrew his command to a new position, he himself being amongst the last to retire.

On arrival at the new position he found that one of the wounded—No. 2475, Corporal D. M. P. Bowker—and been left behind. Owing to very heavy fire he experienced difficulties in having the wounded corporal brought in.

Rescue meant passing over some 400 yards of open ground, swept by heavy
