Minard's Liniment Cures Diphtheria.

Help for the Kidneys Through Gin Pills.

A GUARANTEED CURE.

Read this letter. Read it twice. You have never heard such good news before—if your kidneys are sick. It tells how to be free of pain—how to have all your old-time health and vigor.

"I have been for years a sufferer with pain in the back and across the kidneys. There was scarcely a minute, day or night, that I was free of pain, and when I attempted to pass urine, the pain was almost unbearable. A friend of mine in Portage la Prairie, who was similarly afflicted, strongly advised me to try Gin Pills, as they had cured him. I bought a box of Gin Pills, and in less than a week, to my great delight, found myself without pain. I have had to go as often as every 20 minutes to urinate and several times during the night. Since taking Gin Pills, I sleep through the entire night and am not more than ordinarily inconvenienced during the day. I can earnestly recommend Gin Pills to anyone suffering from pain in the back, kidneys or bladder.

Mr. G. O. C. GOWLER, Portage la Prairie.

Your druggist has Gin Pills, or will get them for you. 50c box—6 for \$2.50.

If you will send us your name and address and tell us the paper in which you have read this we will send you a trial box of Gin Pills absolutely free. You will get such relief that you will gladly continue the treatment until cured. Do it today—now—and start to cure yourself. Address The Bole Drug Co., Winnipeg, Man.

UNDERGROUND RIVER.

Is This Source of Robert Barr's Story of 25 Years Ago?

St. Catharines, Feb. 8.—A young lady of Merriton, who returned last night from a visit to Nelles Corners, Haldimand County, brings home the story of the discovery of a big underground river at Nelles Corners.

Last week while men were drilling for natural gas they struck the river 500 feet down in the ground. The discovery was made when the drill suddenly dropped down 30 feet. When drawn out it was wet for 30 feet.

The rush of water could be heard away down in the bowels of the earth when the men put their ears to the hole drilled in the ground. Some water was pumped out and with it came some fish. The water tasted like water.

The residents around the district believe it is a great channel connecting the lakes. Its discovery is believed to explain why all the wells around there ran dry.

Kingston's Hay Scales Building Burned

Kingston, Feb. 8.—The city hay scales building on Wellington street was destroyed by fire yesterday morning at 6 o'clock. How the fire occurred is not known. The account books of James Daly, lessee, were burned in the building. The city corporation owned the property.

Medals For Russ Veterans.

St. Petersburg, Feb. 8.—Medals for all those who participated in the war with Japan have been ordered, according to an Imperial rescript published in The Russki Invalid yesterday. Those who defended Port Arthur are singled out for special distinction.

Self-confidence and conceit never make a lasting impression on those we continually meet.

THE NEWS

believes in itself, its circulation and the results it can produce for an advertiser. It offers advertising space whether large or small at a Flat Rate of 4 cents per line, (56 cents an inch.) Its whole method of doing business is fair.

This advertisement measures 5 inches (70 lines) and would cost \$2.80 per insertion whether you run it once or for a whole year.

MISS DEBORAH PASSMORE.

An Able Artist in the Employ of the Government.

In the division of pomology of the department of agriculture are reproduced in water color studies the choice varieties of fruits that are sent in from all over the country.

Chief of the little corps of artists doing this work for the government is Miss Deborah Passmore, who is widely known for the accuracy and the beauty of her work. Her water color "portraits" of rare apricots, peaches, plums, grapes and various other fruits are not only technically perfect and therefore of value to the scientific world, but they are really works of art. It is remarkable how she succeeds in catching the very texture of the skin as well as the color and form of the fruit. The

MISS DEBORAH PASSMORE.

hard, smooth surface of a winter apple, the fuzzy cheek of a peach, the pebbled grain of a pear—all are so realistically shown that the fruit stands out from the sheet as if one could pick it up. Yet Miss Passmore is a rapid worker, and the files of the division contain portfolios filled with the output of her brushes. Throughout the department and in the fields where her work has long been recognized as probably the finest that has ever been achieved it excites the greatest admiration and enthusiasm.

Miss Passmore was an artist of unusual ability before she entered the government work and has a large collection of pictures, both in oils and water colors, on the walls of her attractive home. She came to Washington some twenty years ago and established herself as a teacher, having classes composed largely of young women in diplomatic circles. She has been in the department for twelve years, during which time she has acquired the remarkable skill for which she is so well known.—Washington Post.

Why Ashamed of Work?

"A woman who will work and has no false pride about declaring herself a business woman is usually successful," said a prominent man recently, "but I never knew one that committed the folly of apologizing for earning her bread or endeavoring to hide the fact that she was in business that did not make a failure."

What would be said of a man who thought so meanly of his occupation or of himself for being engaged in it that he continually offered excuses for not passing his life in idleness? asks the Chicago Inter Ocean.

This feeling of reserve is one of the chief obstacles to be overcome by the average woman forced to a consideration of the question of earning a livelihood, and the sooner we realize the fact that all work that supplies a legitimate want is honorable the nearer will be the solution of the financial problem so often a menace to the happiness of the individual and the home.

The great law of supply and demand is the chief factor of success in the world of business. That a woman should offer to help fill a demand and receive a just remuneration therefor is not a thing to be ashamed of.

Children's Second Teeth.

No sooner has a child got its first teeth than it is time to begin to think about the second. The first permanent teeth come when the child is from five to seven, and as they are the four molars which come beyond the last molars of the temporary set they are often mistaken for the first teeth. As soon as they appear the child should be taken to the dentist to see if they are regular in their position.

If the teeth do not come in perfectly even and regular a dentist can remedy defects which it is impossible to change after they have been neglected a few years. The dentist should also be seen even before a first tooth is taken out, as if it is removed too soon the jaw contracts and the tooth which comes in its place is crowded.

Care given to the first set is as important as care to the second, and a soft brush should be used twice a day from the time the child is a baby. Tooth powder is not necessary to keep children's teeth in good order. Rinsing the mouth at night with a little lime water and cleaning often enough with soft water are a better preservative than a dentifrice.

Opposing Labor Savers.

If women did not oppose the introduction of electricity in the kitchen her work would be easier, is the startling statement made by the writer of "The Electric Housekeeper" in The Tech-

nical World Magazine. Says he: "It would be ungallant, certainly unpleasant and possibly dangerous, to make too clear the parallel between the farmer and the average housekeeper. Yet it is a fact that it is harder to introduce a labor saving device in the kitchen than anywhere else. The successful manufacturer goes far afield to find anything which will cut down the labor necessary for the making of his product, but the head of the average private food factory sticks to her old ways and her old appliances with a devotion which goes far toward accounting for the truth of the old proverb that 'woman's work is never done.'"

"Not one woman in a hundred thousand has yet begun to realize that the best maid of all work on earth is the little copper wire which brings the electric current into her home for lighting purposes."

The Breakfast Room Desk.

No breakfast room is so cozy as the one which contains a well appointed and well stocked desk in the sunniest window, ready to turn to for the immediate answering of the mail which has been perused at breakfast. Englishwomen, who understand the art of letter and note writing better than any women in the world, follow this plan and have certain other customs which come under the class of letter writing made easy.

Letter paper is bought by the quantity, stamps are bought by the hundred and pens by the gross, any of which outlays would be considered an unheard of extravagance by the ordinary American woman, who buys her writing materials in dribbles that are small and stingy as compared with her lavish expenditures in other directions.

Women and the Law.

Most married women imagine that they are mistresses in their own houses, but that it appears, unless they actually hold the deed to the property, is a delusion. "It should be distinctly understood," said Judge Swartz of Norristown, Pa., in a recent case, "that the husband is master of his own house. The wife has no right to invite or admit her mother or any one else to the house against her husband's will." The judge was good enough to add that the wife might go to see her mother whenever she wished, provided she did not go so often as to neglect her duty to her husband and her home, but he did not say that a man must see that the kindling wood was chopped and the water pails full before he indulged in a visit to his father.—New York Tribune.

A Shirt Waist Box.

Almost every woman owns one of the chintz covered boxes, commonly called window seat boxes, which are invaluable in a small apartment for holding silk skirts, shirt waists or hats, but very few of them are fitted with trays, which greatly increase their convenience. If you are at all handy, however, a very little time and work will settle the matter. Take a strong pasteboard box and line and cover it with chintz or any other thing that is convenient and looks well with the lining of the other box. Do not use the chintz cloth. Things stick to it.

The Reposeful Woman.

"She is the cleverest woman of my acquaintance," was the verdict of one neighbor on another, "because she is not in the least dull and yet manages to be restful. I know so many bright women—bright in all sorts of different ways, but all alike in one thing—they are never reposeful. They are strung up to concert pitch. They amuse you, charm you, stimulate you, dazzle you, but they never rest you by any chance."—Brooklyn Times.

Alabaster Ornaments.

The best method of cleaning any alabaster ornament is to first remove any grease with spirits of turpentine and then to place the article in water for ten minutes or a little longer if very dirty. Next rub all over with a painters' brush and leave to dry. Then rub again with a soft brush dipped in plaster of paris.

Glove Maxims.

A woman who is careful of her hand must be careful of her gloves, for this is most important. If they are tight they ruin the shape of the hand; if they are badly cut they give a common aspect to the whole appearance, and such gloves are the dearest in the end.

Fix It Now.

There is that bit of gimp or fringe which has been hanging for some time from the chair or couch. Just a few moments with a tack hammer and a few gimp tacks and these pieces of furniture will lose that run down at the heel sort of look they have had.

Frosting For Cake.

One cup of frosting sugar, two tablespoonsful of water; boil together; take it off the stove and stir in the white of an egg beaten to a stiff froth; stir all together well, then frost your cake with it, and you will never want a nicer frosting than this.

Artistic covers are used for the telephone book. They are made to suit the color tone of the room or hall in which they hang. Simple cretonne is one of the prettiest coverings.

A cheap but efficacious disinfectant is made by dissolving one pound of green copperas in one quart of water. Pour down the drains.

To stuff dates remove the stones, fill the dates with almonds or peanuts; then close the fruit and roll in sugar.

The danger of a woman is that she can do nothing in moderation.
