## Newfoundland and Aeroplanes.

The Telegram in a recent editorial bears out our contention that crossing the Atlantic in a flying machine is not very far distant, and it urges that Newfoundland be made better acquainted with flying machines.

It is common knowledge that America is preparing to build a huge fleet of aeroplanes for use on the Western front. Many of them will be large, and the problem of getting them overseas is not the easiest. Some people urge that the best and simplest way to send them across will be to fly them over. To-day every new aeroplane built in England for use in France is taken over under its own power in the air. This has become quite a matter of course, and some aviators do little else but deliver new "busses," as they are nicknamed from somewhere in England to somewhere in France.

From somewhere in Newfoundland to somewhere in Ireland is a difference only of degree. Machines could be flown from the States to Newfoundland; a brief stop for overhauling, rest and fuel, and in anywhere from ten to twenty hours be in Ireland. Of course with the end of the war a cross-Atlantic air service seems an eventuality that we may be quite sure of.

As the Telegram points out we have now a number of Newfoundland airmen at the front, and the number will be steadily added to. Frank Pike, for instance has joined the Canadian Flying Corps, and we understand that Frank Payne is also to enter the aviation service, while Elmo Ashbourne is on the waiting list.

The man who sees ahead of his time is always ridiculed to some extent. To us there seems nothing that offers such possibilities for rapid service in a country of scattered settlements and poor communication, like this, as the aeroplane, or as it is more generally called now, the airplane.

Especially does this apply in two cases both widely different. In the seal-fishery instead of going entirely by guess as is done now a competent flyer could easily locate the seal herd and supply the exact directions necessary to take.

But it is in our northern winter mail service that the flying machine would be chiefly useful. Landing and starting places are provided naturally on these great stretches of ice. We might have easily bi-weekly com-

munication with Lewisporte from all over the bay, and we doubt if the cost would very greatly exceed the present method by carrier.

Our present P.M.G. is distinguished by his desire to improve the postal service. He has done much; I offer him my suggestion for consideration. —Twillingate Sun.

## Doctor Said Operation.

When Chatham Lady Suffered From Extreme Nervous Exhaustion—Now Feeling Fine and Working Large Garden.

Chatham, Ont., November 1st. —This letter will interest every lady reader, because it describes a condition for which many doctors advise an operation. That the operation is often unnecessary and very often leaves the patient an invalid for life is well known.

You will read here of what Dr. Chase's Nerve Food has done for this lady and will then understand the great good it is accomplishing in many thousands of similar cases throughout the continent.

Every woman should think long and earnestly before consenting to an operation of this kind. It is a simple matter to give Dr. Chase's Nerve Food a trial and the results are almost always entirely satisfactory. You not only avoid the risk and expense of an operation, but find yourself restored to health and vigor.

Mrs. E. M. Ford, 82 Delaware avenue, Chatham, Ont., writes: "For four years I suffered from nervous exhaustion. I was restless and could not sleep well. I had headaches, neuralgic pains through the body and backache. There was buzzing in my ears and twitching of nerves and muscles. I also had palpitation of the heart, which caused shortness of breath. I was easily tired and always drowsy after eating. When walking or on my feet very much my feet would seem to go dead in my shoes. I consulted two doctors and both told me that I would have to have an examination and probably an operation, but I would not have either. Shortly after this I commenced using Dr. Chase's Nerve Food, and after a treatment of this medicine I can say I am now feeling fine. I am able to do my household duties without difficulty, and besides this, attend to a half-acre of garden. I can go about without that dead feeling in my feet, and am grateful to Dr. Chase's Nerve Food for my cure. I think very highly of this medicine and recommend it to other sufferers whenever I have an opportunity."

Dr. Chase's Nerve Food, 50 cents a box, a full treatment of 6 boxes for \$2.75, at all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations only disappoint.

The hat brim that droops is very becoming and fashionable.

## Presentation of Outerbridge Shield.

To-night the Outerbridge Shield, which was competed for by the members of the C.L.B., under the inspection of Major W. Rendell, will be presented to the winning Company. F. Company in charge of Corporal Williams won the trophy last year. During the evening the battalion will be inspected by Hon. J. R. Bennett, Minister of Militia.

## Workman Injured.

While engaged discharging cargo from a steamer a few days ago Mr. G. Tilley, of Battery Road, met with an accident, as a result of which he got a hip and leg severely injured. He is improving and will be able to get out again shortly.

## Fishermen!

If you are troubled with Rheumatism lay aside that old pair of Wool Lined Boots that are always wet and make your feet perspire and buy a pair of the famous BUDDY BOOTS. They are not wool lined and will keep your feet dry and in a healthy condition.

## Regimental Notes.

Three recruits, W. Aspell, F. W. Harding and J. Murphy, all from St. John's, put in an appearance at the East End Recruiting Station yesterday.

A number of volunteers who recently enlisted received their uniforms this week.

The House of Assembly and Legislative Chambers, which are now occupied by the Minister of Militia and staff are one of the busiest departments of the whole public service. The big plush carpets and grand array of soft cushioned chairs and desks have all been pushed to one side, and instead of having long-winded speeches and seeing M. H. A.'s tip-toeing to their places, the visitor to those quarters is now greeted with the rattle of a dozen or more typewriters and the heavy click of the military boot.

## A Matter for the Government.

The congestion of freight from Cape John south to Fogo awaiting shipment to St. John's is a matter that the Government should immediately consider. Despite the fact that the steamers Prospero and Fogota are now going over the same route, as is also the Earl of Devon, the freight for here is daily piling up. We would suggest to the Tonnage Committee that the S. S. Thetis be put on this service from now till the end of the year.

## "Cascarets" for a Cold, Bad Breath or Sick Headache

Best for liver and bowels, for biliousness, sour stomach and constipation.

Get a 10-cent box now. Furred Tongue, Bad Colds, Indigestion, Sallow Skin and Miserable Headaches come from a torpid liver and clogged bowels, which cause your stomach to become filled with undigested food, which sours and ferments like garbage in a still barrel. That's the first step to untold misery—indigestion, foul gases, bad breath, yellow skin, mental fears, everything that is horrible and nauseating. A Cascaret to-night will give your constipated bowels a thorough cleansing and straighten you out by morning. They work while you sleep—a 10-cent box from your druggist will keep you feeling good for months. Millions of men and women take a Cascaret now and then to keep their stomach, liver and bowels regulated, and never know a miserable moment. Don't forget the children—their little insides need a good, gentle cleansing, too.

## Nfld. Sphagnum Moss Appreciated.

Copy of Letter Received from Newlyn War Hospital Supply Depot.

Newlyn, Penzance, October 6, 1917.

Dear Madam, I think you may like to hear how very useful your eight sacks of Sphagnum Moss have been. The Green Moss—the larger kind, we made into dressings 14 in. by 10 in. and sent nearly two hundred of these to be substituted at H.R.H. the Duke of Cornwall's centre for sublimation of Sphagnum Moss Dressings at Princeton, S. Devon. These Dressings were sent to Salonika, and also in response to an order from the Australian Government.

The Red Moss, though excellent in its properties, turns to dust very quickly; so of the dust alone, we stuffed twenty-four rest pillows—18 in. by 12 in., and sent them to the large W.H.S. Depot at Devonport, who were delighted with them.

The doctors find one objection to using either the Moss or Moss Dust for stuffing pillows with, because it is very absorbent, that should it get wet, it would be difficult to dry a pillow stuffed with it.

The Red Moss itself we used for dysentery pads—as the bags of Moss are enclosed in outer coverings of a thin layer of cotton wool and gauze, so the dust cannot penetrate. We made so many large pads 18 in. by 12 in. with your Moss, that we were able to send to the following Hospitals cases of the pads—to the French Red Cross Committee, for cases of Spinal wounds and paralysis, Hospital Temporaire, Notre Dame, Lecteur Postal 3, to the West Cornwall Infirmary, Penzance (where torpedoed victims are taken), to the Cancer Hospital, Fulham Road, London, and some will be sent to St. Mark's Hospital for cancer, London. At all of these hospitals military cases are taken in.

The Cushions that you kindly sent, we forwarded some to the Central Depot of the Surgical Branch of Queen Mary's Needlework Guild, 2 Cavendish Square, London, and some to the War Hospital Supply Depot at Devonport. They were most grateful. Thanking you again very much for your kind help and all the trouble that you took in picking over the Moss, I am,

Yours faithfully,  
(Sgd.) ETHEL BLYTH,  
Hon. Secretary.
