it will cost to import in the near fu-
ture. California Prunes will be four
cents per pound higher than last year.

Do You Freckle?

During the summer months, and es-
pecially while on holidays, we shall
probably find that freckles will ap-
pear on the face and neck.

Persons of a fine complexion, and
those whose hair is red, are the most
subject to freckles. Sometimes freck-
les are the aftermath of jaundice, but
in the sunny weather almost every-
body is affected by the action of the
sun, and it is interesting to trace the
origin of freckles.

One authority says that the skin,
during the winter and spring, has be-
come strangely sensitive, and the heat
of the sunbeams draws out drops of
moisture which operate like a convex
glass, thus concentrating the rays,
which are made to act powerfully on
the skin. The heat of the sun, thus op-
erating on the drops of moisture,
causes the skin to become darker in
"spots," which we call freckles.
