

## French Levy 26 Per Cent. Protective Duty on German Goods

Disarmament Conference is Subject to Ratification--Fighting in China Becomes General.

### DEATHS FROM EARTHQUAKE.

CONSTANTINOPLE, Sept. 20. Sixty deaths and the destruction of three villages are given as the toll of a second earthquake reported in Digen District of Armenia. Large cracks appeared in the ground from which loud subterranean noises were heard. The population of the district were panic-stricken. The Government is sending aid.

### PRELIMINARY TO THE CONFERENCE.

GENEVA, Sept. 20. No international conference on the reduction of armaments is possible unless the parliament of Great Britain and France ratify the proposed protocol on arbitration and security. That much emerges clearly from the statements made by the leaders of the League of Nations Assembly. A British journalist having expressed his doubts that either the British Parliament or those of the Dominions would ratify the protocol, a prominent member of the French delegation came back with the remark that if Great Britain did not ratify the world might be assured that no conference would be held.

### FRENCH PROTECTIVE TARIFF.

PARIS, Sept. 20. An import tax of 26 per cent. will be levied on all goods from Germany, beginning Oct. 1, under the terms of a decree published to-day. This protective tariff against German goods was authorized by Parliament three years ago, but was never enforced.

### MANCHURIAN LEADER CLAIMS SUCCESS.

TOKYO, Sept. 20. In a communique issued at Mukden Chang Tio Lin, Manchurian leader, claims decisive successes over the forces of the Federal Government of Peking at Liu Ho, north of the capital, and on the Phinfu border, between Chin-Chow on the Peking-Mukden railway, on the railway in Manchuria and Tsuruyama Ypi Hill, according to press dispatches received here. Chang also claims his second and fourth armies, which are crossing the Chihli border, captured large quantities of munitions.

### FOREIGNERS ADVISED TO LEAVE.

MUKDEN, Manchuria, Sept. 20. Chang Tio Lin, the military dictator

of Manchuria, requested the British and U.S. Consuls to warn their countrymen at Chingmangtao, a gulf port of the Manchurian-Chihli border, and Haikgan, an adjoining town, of his intention to bomb these places. The Consuls were asked to advise the foreigners to leave.

### ARTILLERY BOMBARDMENT.

SHANGHAI, Sept. 20. There was a short resumption of artillery bombardment at 5 o'clock this morning in the battle area between the Shanghai-Nanking railway and Kaiping, west of here, where the Kiangsung army is vigorously attacking the Chekiang lines defending Shanghai. The artillery duel lasted two hours after which the bombardment subsided, continuing sporadic during the rest of the morning. The headquarters of the Chekiang Army claims gains along the railway around Twangtu. The defences of the foreign settlements of Shanghai are being closely maintained at strategic points along the boundary. The influx of refugees continues unchecked.

### DEFENDERS CLAIM GAINS.

SHANGHAI, Sept. 20. In an engagement that started at daybreak, reinforced Chekiang troops, on the front between the Shanghai-Nanking railway line and Kaiping forced the invading Kiangsung forces back, strengthened their line and retained the positions near Hwangtu, 15 miles west of here.

### TANKER ON FIRE.

HALIFAX, Sept. 20. The tank steamer Ivor was reported this afternoon to be adrift and abandoned 500 miles east of Sable Island and liable to blow up at any moment. Advice came by wireless to the local agent of the Marine and Fisheries Department and all shipping was warned to keep clear of the danger zone. The crew had been taken off by the Baltic American Line steamer Lithuania, which had headed for Halifax.

### SEAPLANE SINKS.

FELIXSTOW, Eng., Sept. 21. The seaplane which was to have been Great Britain's entry for the Schneider Cup race, to be flown near Baltimore Oct. 24 and 25, descended on the water Friday night after a trial flight and sank; the pilot being rescued by a motor boat. The seaplane, which had been especially built by the

Air Ministry, will not be entered in the race now, even if the attempts to salvage it are successful.

### 37 VILLAGES WIPED OUT.

CONSTANTINOPLE, Sept. 20. Of 46 villages on the bank of the river Aras, in Armenia, 37 have been destroyed by the recent earthquake. Details of casualties and of material damage done are lacking here. The shocks are continual in Erzerum District and in numerous places large fissures have developed. Shocks are also being felt in the neighbourhood of Kars.

### LABOR DELEGATE ADDRESSES A CANADIAN GATHERING.

LONDON, Ont., Sept. 20. "A Labor Government in power in Canada may not come within life time if only because it is based on justice and right," said J. T. Brownlee, the Fraternal Delegate from the British Trade Unions to the Dominion Trades and Labor Congress, in course of a speech before large meeting here last night. "If the people of Canada," he said "had any real desire to translate the sermon of the Mount into acts of legislation, they would find that there are plenty of men and women in the Labor Party who are as anxious as themselves to put into practice the every day tenets of the Prince of Peace."

### ENCROACHING ON DANGEROUS GROUND.

TIENTSIN, Sept. 20. Hanghaikwan, a border town on the Peking-Mukden Railway, was shelled on Friday morning, according to a correspondent, several civilians being killed or wounded. Appeals have been made to the British and United States Consuls, to protest against the shelling of civilians. One of Chang Tio Lin's airplanes dropped a bomb on the same day at Phinwang Tao, in Phihli. The bomb fell between two British steamers anchored off the breakwater.

### Rod and Gun for October

The readers of the October issue of Rod and Gun in Canada are introduced to the intimate haunts of the elk, the red fox and the moose. The Bugler of Crystal Mountain by Naine LeRoy Gayle is an unusually interesting biography of the elk. Bonny castle Dale, in his best style, makes us acquainted with Sly Reynard in Nova Scotia. Sure Fire Fishing on French River by J. E. Kerrott is a description of an ideal place for the sport of the angler. Bob White's Rival, a story of Hungarian partridge hunting in Alberta, by W. D. Elliot is equally interesting reading and Back to Nature, by "Timbered It" and Surprises for Miller by Martin Hunter, are two particularly entertaining sketches. In addition to these in this well illustrated number, there are numerous other worth-while articles and stories and the regular contributors have packed their departments full of interesting material from first hand experience.

Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, at Woodstock, Ont.

### Treasure Hunt by Seaplane in South Atlantic

LONDON, Sept. 15.—Seaplanes will be used in a treasure hunt in the South Atlantic if a scheme now being promoted develops.

The treasure is believed to be hidden in a grim and rocky little island named Trinidad, nearly 700 miles from the coast of Brazil.

The tradition is that centuries ago a band of pirates after rifting a Spanish vessel, were themselves chased by pirates. In their haste they buried the treasure on this islet, hoping to return and secure it later. As it happened, however, they were caught, and all were hanged.

The island, which is little more than an uninhabited rock of eight square miles, has been visited by more than one treasure-seeking expedition. Its rocks, however, are washed by such seas that often for weeks on end it is not possible to land or to leave.

### Seized Truck With 1100 Gallons Alcohol

Hyannis, Mass., Sept. 15.—A truck that was supposedly an oil container, but which gave off both alcohol and gasoline from its false bottom, was seized by State and local police here to-day with its cargo of 1100 gallons of alcohol. Officers were investigating ownership of the truck, which was found in the rear of a tea house here on premises ostensibly leased to S. B. Picroni of Boston.

Pearline for easy washing—July 17, 1924.

### Tidal Force for Power

The possibility of using the tidal force of the Bay of Fundy for the generation of electric power has long been mooted, although it has hardly reached the experimental stage as yet. But in the Old Country, owing to the increasing cost of coal and the lack of big rivers and mountains to furnish waterpower, the Government is considering the possibility of utilizing tidal power as a means of generating electricity. The harnessing of the Severn, proposed by Sir Eric Geddes, is being investigated as to its practicability under Philip Snowden, the Chancellor of the Exchequer.

The Severn is the greatest tidal estuary in Great Britain. A barrage below Bristol, only 115 miles from London, would develop 600,000 horsepower, create a lock basin of twenty-seven square miles for shipping, save a fifty-mile detour for a heavy road traffic and permit the laying of valuable railroad tracks.

The Snowden committee will report only upon the geological formation which underlies the dam site. The cost of the project, even before the war, was guessed at as \$150,000,000. The Severn project is in vastness second only to the proposed power and ship development of the St. Lawrence River by Canada and the United States. The creation of a great hydro-electric development probably would encompass an industrial revolution in the British Isles.—Morning Chronicle.

### An Explanation of What Chiropractic Is

FOR THOSE WHO DO NOT UNDERSTAND ITS TRUE MEANING.

By WM. H. MACPHERSON.

A fall occurs in many ways. The fall is a small thing. It happens to thousands. A tumble down a stairway is a small thing, it happens to thousands. A slip on the icy roadway in winter is a small thing, it happens to thousands. A strain or wrench occurs in various ways. The strain or wrench is a small thing, it happens to thousands.

The fall or tumble, the slip, the strain or wrench produces a sub-luxation. The sub-luxation is a small thing. The sub-luxation produces a pressure on a nerve. The pressure cuts off the flow of mental impulses (life force). That is a small thing. That decreased flowing of the life force produces a diseased body and brain. That is a big thing to that man.

### WHAT WELL MEN MEAN.

Multiply that sick man by hundreds and you control the physical and mental welfare of a city. Multiply that man by thousands and you shape the physical and mental destiny of a country. Multiply that one vertebral (spinal) column by all of them in the world, and you can see the master key to the sane or insane thoughts and healthy or sick actions of the world.

Every man, woman and child living has a backbone. Every backbone has subluxations. Every subluxation is producing a disease, so the fall or tumble, the slip, the strain or wrench, the subluxation, pressure flow of mental impulses and disease is big enough to control thoughts and actions of a world.

Now comes a man—and any one man is a small thing. This man gives an adjustment, and the adjustment is a small thing. The adjustment replaces the subluxation, and that is a small way. The adjusted subluxation replaces pressure upon nerves, and that is a small thing. The released pressure restores health to a man, and that is a big thing to that man.

Multiply that well man by hundreds and you step up the physical and mental welfare of a city. Multiply that well man by thousands and you increase the efficiency of a country, and you have produced a healthy and better race for posterity. Multiply one Chiropractor by a sufficient number to adjust all the subluxations and you have made sane all the insane; made well all the sick.

### CRYING FOR ADJUSTMENTS.

Every disease is crying out for an adjustment. Every adjustment demands the Chiropractor. It makes no difference whether that subluxation occurs in, and the adjustment be given to a male or female, young or old, white or black, on the mountain top or in the valley, in the desert or on a ship, at the North Pole or the Equator.

The Chiropractic message is for the body what the God given message is for the soul. A gospel for the multitudes, for all people, for all colors, for all countries, for all conditions. It brings life easier, it makes life easier. It adds years to life and life to years.

### NEEDS OF CHIROPRACTIC.

Chiropractic needs followers who have the vision to see the rebuilding and reconstruction of the human race, the right of the sick to get well unrestricted and with the exercise of his own rights. The right of Chiropractic to be handed down throughout the generations in its purity for posterity, that the adjustment of a subluxated vertebra, multiplied means a far more efficient race.
