Conscious, Declares He Will Live to Get Revenge, But Dies.

Lake Charles, La., June 13. - Tied to a tree and practically cremated alive by his enemies was the fate of James Perkins, a wealthy planter, it developed today, shortly after he died. Perkins was found in the pine thicket near his home, a few miles from here, late last night, by a party of searchers. He was unconscious and apparently dead from horrible burns that had seared every inch of the surface flesh. He was removed to his home, and for an instant he revived. He refused to tell the names of the men who had burned him, declaring that he would live to avenge his treatment. He became wholly unconscious again, but just before he died he revived and attempted to tell the names

him. Some time ago Perkins had trouble with squatters. Parish officers hope to make arrests among them. Perkins had big land holdings and was wealthy.

NEW ELEMENTS

It was to the effect that Dr. von Welsbach had succeeded in separating terbium and thulium, previously believed to be elements, into two constituents each, and dysprosium and gadolinum, two other rare elementary substances, into three each. The number of elementary rare earths has thus been increased

from 16 to 22. It may be recalled that last vear Dr. von Welsbach simultaneously with the French scientist, Urbain, discovered that ytterbium, for 30 years believed to be an element, was divisible. Since 1878 the Viennese savant has added ten elements to those known to science, a record for any single inventor and an achievement on which the congress sent him a telegram of cogratulation.
