

## PLAYED DESPERADO FOR MANY YEARS

Slayer of Girl Confesses to Being the Masked Terror of Springfield, Mass.

Springfield, Mass., April 7.—Laying his crimes to love of excitement and a mania for stealing, caused by an injury to his head in boyhood, Bertram Gage Spencer, the young clerk arrested yesterday, today broke down under a 24-hours' merciless grilling, and confessed that he was the masked burglar who terrorized Springfield for two years, reaching the climax of his career by murdering Miss Martha B. Blackstone last Thursday evening.

In his confession Spencer makes it clear that, associated with his overpowering desire to steal, was an intense love of excitement and a high degree of personal vanity. This latter Spencer gratified by baffling the police and reading the news accounts of his exploits.

An element approaching the romantic also entered into his crimes. For, coupled with his other motive, was a desire to secure money to buy elaborate furnishings for his home in West Springfield, thus furnishing a handsome setting for his young and pretty wife, for whom he shows a strong and genuine affection.

While admitting the murder of Miss Blackstone, Spencer said that he had not intended to shoot, but had lost control of himself when she repeatedly screamed. Then, he asserted, he fired only to frighten her, and the three other women who confronted him in the Dow house.

Spencer was held without bail for further hearing on April 15.

Spencer told the police that he had experienced no qualms of conscience for his crimes. He revealed a career of almost lifelong crime. Following a blow on the head while he was a small boy in Lebanon, Conn., his native town, he said he began to steal at the age of 9, rifling the pockets of his schoolmates and robbing his parents of small sums.

Letter while still a youth, he held up young women on the highways and entered houses. He spent some time on a naval training ship, and then travelled about the country, his thefts covering a wide range of territory.

By engaging in legitimate occupations as day he always escaped detection.

Spencer was held without bail for further hearing on April 15.

## A SERIOUS CHARGE

A Harwich Township Man Accused of Incest.

[Special to The Advertiser.] Chatham, April 6.—Darden Bassett, a Harwich Township man, came up in the county police court today, charged with incest. The charge was preferred by his sister, Belle Bassett. He pleaded not guilty and elected to be tried by judge and jury. The preliminary hearing will be held on Monday.

Bassett is a young married man with one child. He is employed by Mr. R. P. Budd, a well-known farmer on the tenth concession of Harwich. His sister, the complainant, lives just a couple of miles from him. He claims to be entirely innocent of the charge made against him. He was let out on \$500 bail, supplied by his employer.

Among the Shriners who will attend the convocation at New Orleans are the following from Chatham: J. M. Pike, K. C., illustrious potentate of Mocha Shrine; G. W. Sulman, M. P. P. Richard Stein, and A. W. Green. The Chatham Shriners will be the guests of the Arab Patrol of Moslem Shrine, Detroit, during the trip.

The Chatham public library board is planning to purchase a new building. They propose to have the different factories supply the library with lists of the technical books they require for the further education of their employees along the lines of their particular work. These books will be stocked by the Government, supplying a hundred dollars for this work for every hundred dollars expended by the board. The report of the finance committee showed that the building to be a healthy condition. The new scheme of keeping the library open at noon and supper hours was not proving advantageous.

## ROOSEVELT DINED BY CITY OF ROME

Ex-President Honored by Big Ones of the Italian Capital.

Rome, April 6.—The series of events connected with the cancellation of Mr. Roosevelt's audience with the Pope and later his reputation of the day, culminated in a dinner given by the city of Rome to the ex-president. The dinner was given in the grand hall of the historic Caracalla Palace by the municipal authorities, over which Mayor Nathan presided.

No reference, however, either directly or indirectly, was made to this subject. The guests included Premier Luzzatti, Signor Forlani, under-secretary of the foreign office, Signor Ricciardi, grand master of the Free Mason Order, and Ambassador Lelshman.

The mayor in proposing the health of the ex-president referred to him as "one whose character and work had an effect upon the civil progress of humanity."

After mentioning Washington and Lincoln as a respectively the founder and consolidator of the republic, he characterized Mr. Roosevelt as a "purifier" saying that he had hunted fiercer beasts than during his recent trip to Africa.

"Men of his calibre," said the mayor, "are beyond the limits of a country. They belong by right to civilization."

He concluded with an apostrophe to Mr. Roosevelt as "a delicate philosopher" who is preaching the word of purity, goodness and duty to his people, and he compared the ex-president to Marcus Aurelius.

## BALLPLAYERS IN PERIL

Second Division of Boston Nationals on Train That Was Wrecked.

Louisville, Ky., April 8.—Again a railroad wreck, which more than once this spring has interfered with baseball training, overtook a major league team yesterday, the players in this case being the second division of the Boston Nationals.

Another "proof" of the lighter engine than the one at the central fire hall by the Western Fair for our exhibit, the only way we could reach the maximum capacity of the engine was by the introduction of a big tank between the engine and the hydrant, thus proving years ago that London hydrants were too small for a modern steam engine.

Question No. 5.—We have conclusive evidence that under all the existing conditions one steamer is enough for London. And when Mr. Beck gets through that one, he is relegated to the show case, and save the waste of money Mr. Shaw advocates in question No. 7.

Question No. 8.—Plumbing weakness is a lame argument. Plumbing that will not stand 150 pounds for the very short time a fire is on, and it is only at the time we require increased fire pressures, such plumbing is no good. I have plumbers that will stand 500 pounds if required.

I am not in the question at issue arguing high pressure. That will take care of itself. What I wish to prove is that until the Beck system is completed, no experiments with fire engines should be tried. If Mr. Beck lives up to his promises and East London is properly connected to the general trunk main, the people and Mr. Shaw will see the wisdom of that course.

When the Beck proposition is completed according to contract London will have quality of supply, and more than quality of power—Niagara, gas, steam and water, all four on tap.

Then the steam fire engine will be a good thing to show visitors at the fire hall, put in street processions or lend friendly aid to Pottersburg, the asylum or to reciprocate with Stratford or any of our suffering neighbors. Faithfully yours, JOHN M. PARSONS.

A FAST DESTROYER. Pensacola, Fla., April 7.—Maintaining a speed of 35 miles an hour for four hours, the torpedo-boat destroyer Reid, Lieut. Goddridge, established a new world's record for speed by a naval vessel today. The vessel was on her final speed test, and aboard was a board of naval officers from Washington.

By making the record, the Reid not only established a new record, but does so by over a mile an hour. The destroyer went out on the gulf at a time when weather conditions were very unfavorable, the gulf being heavy and rough, but with her powerful turbine going in good shape, she cut through the water like a greyhound, going down the coast for 60 miles and then turning without slackening speed and coming back to the starting line.

The Reid is one of the new type of naval vessels which were recently completed, and more than exceeded the Government's requirements.

CUT OUT MELONS. Western Union Will, Instead, Increase Wages of Its Employees. New York, April 6.—Improvements and increased wages for employees, rather than melons for stockholders, is to be the aim of the Western Union Telegraph Company hereafter. This resolution was adopted today at a meeting of the executive committee of the company in New York.

This committee recommends that no increase in the present rate of dividends be made until the plant of the company, wherever it may be found necessary, is placed in the highest possible condition, the working conditions of the employees improved and their salaries re-arranged, recognizing in this readjustment, merit, proficiency

and length of service modified by local conditions.

President Clowry, of the company, said, in explanation of the committee's action: "All earnings above the present dividend rate of three per cent per annum will be put into the highest standard of efficiency. The company has plans for improving the working conditions of its employees and re-arranging of salaries. There will be no horizontal increase. Our policy will be to treat employees individually as human beings and not in bulk as a mathematical problem, rewarding merit as it deserves in all cases."

HOWLING FOR WAR. Lima, Peru, April 8.—A detachment of Peruvian troops was despatched yesterday to the department of Piura, which adjoins the Ecuadorian frontier.

There is absolute tranquility both here and at Callao, but the people desire war and there is an eagerness to enlist in the country's service. In this city alone yesterday 15,000 volunteers were recruited. These include the young men of the best families.

## Had Weak Back.

Would Often Lie in Bed for Days Scarcely Able to Turn Herself.

Weak back comes from the kidneys, and when the kidneys are out of order the whole system becomes deranged. Those who have never been troubled with kidney trouble do not know of the suffering and misery which those afflicted undergo. Doan's Kidney Pills are a specific for all kidney troubles.

They begin by helping the kidneys to flush out all the acid and poisonous impurities which have collected, thus clearing out the kidneys, bladder and all the urinary passages and carrying away the uric acid, the chief cause of rheumatism, from the blood.

Mrs. Arch. Schuare, Black Point, N.B., writes:—"For years I was troubled with weak back. Oftentimes I have lain in bed for days, being scarcely able to turn myself, and I have also been a great sufferer while trying to perform my household duties. I had doctors attending me without avail and tried liniments and plasters, but nothing seemed to do me any good. I was about to give up in despair when my husband induced me to try Doan's Kidney Pills and after using two boxes I am now well and able to do my work. I am positive Doan's Kidney Pills are all that you claim for them, and I would advise all kidney sufferers to give them a fair trial."

Price, 50 cents per box, or 3 for \$1.25, at all dealers or The T. Milburn Co., Limited, Toronto, Ont.

In ordering specify "Doan's."

## CORRESPONDENCE.

East London Fire Protection.

To the Editor of The Advertiser: I am glad to see Mr. Shaw's continued interest and his answers to my queries. His answer to No. 1 proves: under hydraulic laws, that circles being to one another as the squares of their diameters, London proper or Old London, has a supply trunk main of 18 inches diameter. The square of 18 is 324, and the square of 10 is 100. This proves that London East fire risks, now as great as any in the city, are getting, to say nothing of the increased friction loss from greater distance, considerably less than one-third the supply rights it is entitled to, hence is crippled under the new conditions since inception.

In question 2, I had hoped that Mr. Shaw would show if there was more than one 10-inch or any other size connection with the city to assist this 10-inch connection. From his letter I assume there is only this one connection.

In No. 3, as an old fire fighter, I contend the conditions were such that the steamer was worse than useless. It was a case of all box buildings, and so spread out that two streams all the steamer could muster were too limited in their effort to burn direct and positive proof of our main contention, "that the trunk main must be increased"; also the size of the hydrants in the commercial parts of the city, including East London.

Question No. 4, is where Mr. Shaw and a number of others fall down. I, with others, saw a full head of steam, pop valve blowing off, and the steamer racing, and all she could get under the conditions was 50 pounds' water pressure. Some people call it sucking the hydrant dry. Better results would have been attained on that fire with smaller nozzles, and 100 or 125 pressure. But what I wish to prove is that had East London been served with an 18-inch main, and all the hydrants 8-inch with 4 openings, instead of 6-inch and 2 openings, there would have been abundance of water and ample pressure at the casket fire. The same hydraulic rule applies to the hydrants, the square of 6-inch is 36 and 8-inch 64, or just double the capacity. In other words the whole of commercial London has outgrown 6-inch hydrants.

Another "proof." When we were awarded a gold medal on a lighter engine than the one at the central fire hall by the Western Fair for our exhibit, the only way we could reach the maximum capacity of the engine was by the introduction of a big tank between the engine and the hydrant, thus proving years ago that London hydrants were too small for a modern steam engine. The conditions are now very much worse.

Question No. 5.—We have conclusive evidence that under all the existing conditions one steamer is enough for London. And when Mr. Beck gets through that one, he is relegated to the show case, and save the waste of money Mr. Shaw advocates in question No. 7.

Question No. 8.—Plumbing weakness is a lame argument. Plumbing that will not stand 150 pounds for the very short time a fire is on, and it is only at the time we require increased fire pressures, such plumbing is no good. I have plumbers that will stand 500 pounds if required.

I am not in the question at issue arguing high pressure. That will take care of itself. # IT'S A WIDE CHOICE

Don't think that the woollens that come from Scotland are confined to Tweed productions, for Scotland turns out nearly every line of goods required for the making of good clothes for men---The finest fabrics; and when it comes to patterns there is a wide range from the very-rich to the rich-quiet in coloring.

We never stop in our eternal endeavor to keep ahead of the "Times" in the matter of good clothing. When it comes to fit or finish we say that we will give you the best possible to be secured anywhere; and that if you are not satisfied we will cheerfully refund you the money you have paid to us. See the goods and satisfy yourself that they are all we claim for them.

## MADE TO ORDER SUIT OR OVERCOAT

Out-of-town men: Ordering with us by mail is as easy for you as if the measure were taken by our own cutter. The chart and the instructions positively insure that your measurement will be properly recorded. Write us for our new book of samples and for fashion plates.

Our new magazine: We have just Issued a number of our splendid magazine. It contains some very useful information on general subjects, besides giving some particular hints on how to dress for different occasions, and what is new thereon in Paris, London and New York. Drop us a postal, the magazine is free.

# The Scotland Woollen Mills Company, Ltd.

199 DUNDAS STREET LONDON, ONT.

BRANCHES: HAMILTON, TORONTO, WINNIPEG

## EDITORIAL

Wherever our branches have opened, we have always been confronted with a curious situation. It is this: Before our arrival the tailoring business of the town was generally conducted along the ancient lines of "study your customer and soak him if you can," but after we get busy we find every other establishment protesting that it is, and always has been, the only "one-price" outfit in the burg. Sometimes, as in London, a tailor calmly steals our entire registered sign. If you were in our boots you'd feel pretty hot around the collar, for we have worked some to back up that same sign with the goods.

Through the courts we have been able to stop this individual, but for the rest we cannot do more than to say that we take considerable pride in pausing on the thought that we have led the way, and others have attempted to follow. We maintain, however, that we are not only the pioneers, but the "land-owners" of THE MADE-TO-ORDER FIFTEEN-DOLLAR SUIT. Only by dealing direct between mill and man could we possibly make an honest suit of clothes for Fifteen Dollars.

G. MILLER, Canadian Manager.

## Sensational Experiences in Search of a Cure

\$50 FOR ONE SPECIALIST ALONE.

The varied and costly experiences of some people who suffer from skin disease and get into the hands of so-called "specialists" are rarely heard of. At most daily the proprietors of Zam-Buk are receiving letters of gratitude from persons who have been cured by Zam-Buk, and in many cases these letters tell a story of suffering in the search for cure which is truly pitiful.

Mr. Arthur Fairbank, of 147 Lansdowne avenue, Toronto, says: "Some time ago I had a bad eruption on my forehead, which I attribute to getting infected at the barber's. This eruption became very sore and spread over my scalp in the form of open sores. I went to a doctor, who treated me with a lot of ointment, but it did not cure me. Still the sores spread until almost the whole of my head was affected. As the doctor's treatment did me very little good I left it off and tried various home remedies. I also tried taking various aperient medicines to try and cure the outbreak through the blood. Still it was in vain."

"Then I tried blood mixtures, but not one of them did me any good. It was by that time in a shocking condition, and as a last resource I went to a skin specialist. He immediately sent for a period, and it cost me \$50, but the sores got no better. They would itch and burn at times until I was nearly mad."

"One day a friend asked me why I had not tried Zam-Buk, and gave me a little. I tried a little bit of Zam-Buk treatment. I had from doctors and specialists. I immediately sent for a period, and it cost me \$50, but the sores got no better. They would itch and burn at times until I was nearly mad."

"One day a friend asked me why I had not tried Zam-Buk, and gave me a little. I tried a little bit of Zam-Buk treatment. I had from doctors and specialists. I immediately sent for a period, and it cost me \$50, but the sores got no better. They would itch and burn at times until I was nearly mad."
