approaching the efficiency with which it is being carried on in Belgium. Faced with the appalling task of feeding a starving nation, the Belgian Relief Commission has done magnificent work. Scores of the ablest and highest salaried business men of the English speaking

world have given their time free, to perfect the organization and carry on the work. Operating expenses are phenomenally low. Business methods are applied to every feature of buying, shipping and distributing foodand accounting for every dollar.

The result is that millions of Belgians are being fed at an average cost of around \$2.50 per family per month! Compare that with your own meat bill and you will begin to realize what it means.

But even this provision is possible only through the generous and sustained contributions of thousands of people. Canada has been doing nobly, as she should. Many have been regularly giving enough to feed one—or several— Belgian Families. How many can you afford to support?
