**PREPARING FOR
FLU EPIDEMIC****St. John A. A. Makes Plans
To Meet Outbreak.****NOTHING SERIOUS YET****Federal Health Bureau Issues
Reassuring News.**

Canadian Press Dispatch.
Ottawa, Jan. 25.—The possibility of a recurrence in Canada of the "flu" epidemic has led to a call being sent out from the head office of the St. John Ambulance Association to all branches of the association in the Dominion. The V. A. D.'s of the association rendered splendid service in every province in the last epidemic and telegrams offering assistance have been sent to every provincial health officer in Canada.

The call, which is signed by Mr. Fred. Cook, president, and Dr. C. A. Hodge, honorary secretary, urges upon all home nursing graduates to immediately organize for volunteer service wherever they may be living. It is urged upon all those qualified, where there are sufficient numbers, to at once organize a brigade work, and to others to notify their local health authorities of their preparedness for voluntary service.

AT GUELPH.**Special to The Free Press.**

Guelph, Jan. 25.—There is considerable sickness in the city just now, and the doctors and nurses are busy. One of the wards at Speedwell Hospital has been converted into a flu ward entirely, all other patients having been moved to another part of the hospital. Ten O. A. C. students suffering from the flu in a mild form were this morning transferred from the college to Speedwell. Accommodation is being prepared for more cases at the military institution in case of a further outbreak.

AT DETROIT.**Special to The Free Press.**

Detroit, Jan. 25.—With 100 workers in the field, physicians, nurses and inspectors, the department of health knew no Sunday in its fight against influenza. Dr. Henry F. Vaughan, health commissioner, said tonight he expected the outbreak to reach its peak in a number of cases about Wednesday. He asserted that the situation was well in hand, presenting no cause for alarm.

The grand total of influenza cases reported up to Sunday night, the seventh day of the outbreak, was 3,119, with 100 cases of pneumonia.

Wayne County morgue is filled to its capacity with bodies continue coming in like they have in the last two days, extra arrangements for their care will have to be made.

HYPOZONE is a product of the Woolf Laboratories, discovered by Albert Edward Woolf, the same chemist who introduced Peroxide of Hydrogen.

**It Is
Non-Poisonous**

It leaves no lime deposit when used on floors or woodwork.

During the "Flu" epidemic in New York last winter not a theatre, nor a church nor a school was closed, because of the effective use of disinfectants. The Department of Public Health of that city states that Hypozone was the most effective disinfectant used.

When used in trains, street cars and theatres it removes the danger of contagious diseases.

**TWENTY DIE OF
FLU IN 24 HOURS****Number of New Cases at the
Border Placed at 2,000.****SPREADING AT CHATHAM****Brantford and Stratford Pre-
pare Emergency Hos-
pitals.**

Windsor, Feb. 1.—Twenty deaths, nearly all from influenza or pneumonia, have occurred along the border here within the past 24 hours. The number of new cases for the same period, while not reported officially, is estimated by physicians to be above 2,000.

Undertakers, doctors and nurses are working night and day to care for the victims, but the increasing number of cases is fast outpacing the efforts of the workers.

Mr. Daniel Hand, a customs officer, whose home is believed to be in Toronto, died at Hotel Dieu tonight from the disease. He had been taken ill only last Thursday.

Chatham doctors are expecting the epidemic to strike the Maple City any time now in its march westward. A few cases are already diagnosed as "flu" there. The town and neighborhood of Essex has an epidemic of scarlet fever along with a number of "flu" cases. Brantford is preparing to use the old postoffice building as an emergency hospital, and Stratford has an isolation hospital ready for influenza patients.

Prevent the Flu!

Use

WOOLF'S

HYPOZONE

The Ounce of Prevention

SILVERWOOD'S LIMITED have secured the privilege of distributing Hypozone in Canada. It has been placed at the disposal of every grocer and druggist in this city so that the widest distribution may be attained.

Don't wait until you get the Flu--protect yourself now. Hypozone, if properly used, is an absolute preventative.

Directions For Prevention and Treatment of Spanish Influenza

FOR THE NOSE

Use a mixture of one ounce of lukewarm water, to which has been added five drops of Hypozone. Incline the head backwards and discharge the contents of a medicine dropper filled with the dilution into each nostril. Continue the treatment for ten minutes night and morning, and at noon if convenient. Do not use atomizer.

FOR THE THROAT

Gargle the throat with a solution of half a teaspoonful of Hypozone in a glass of water. Continue ten minutes. After each gargling, a small quantity of the mixture should be swallowed to kill the germs in that part of the throat not reached by the gargle. The mixture should be made fresh before each application.

IN THE HOME

1. In pans in each room. Make a solution of one ounce of Hypozone to one gallon of water and place in pans in different rooms of the house. It purifies and leaves the atmosphere clean and wholesome.
2. In furnace pans or radiator pans. Put a couple of tablespoonfuls in the pan each morning. It purifies the air.
3. For scrubbing. Use one ounce of Hypozone to a pail of water for scrubbing floors.

4. For washing white clothes. Use a tablespoonful of Hypozone in a boiler of water. It disinfects, deodorizes and whitens the wash. Caution. Keep Hypozone from delicate-colored cotton and linen. It bleaches.
5. In the bath. Put two tablespoonfuls in the water before taking a bath. It cleanses and kills all germs.
6. For sinks, toilets, garbage cans, refrigerators.
7. Housecleaning. Use half an ounce to a gallon of water for washing woodwork, shelves, etc.

General Uses for Hypozone

1. Sores, wounds, cuts. One part of Hypozone in three parts of lukewarm water. Cleanse the sore thoroughly with the solution. It disinfects and heals.
2. In cellars. Sprinkle the cellar floor with a solution of two tablespoonfuls of Hypozone to a gallon of water. Keep an open pan of the solution in the cellar. It takes away the musty smell. It eats mildew and mold.
3. Cisterns. Use in proportion of one gallon of Hypozone to one hundred barrels of water. It purifies the water and destroys all odors.
4. Cesspools and drains, cuspidors, outdoor closets.
5. Poultry houses and stables. Spray it in poultry houses. It purifies and deodorizes.
6. For washing milk bottles, cream separators, etc.

**FLU EPIDEMIC IS
TO RETURN, PREDICT
TORONTO PHYSICIANS****Dr. Hastings Gives Advice As
To First Action To Be
Taken.****CHICAGO OPENS FIGHT****Disease in Western City Re-
ported To Be of Milder
Type.**

Toronto, Jan. 19.—A renewal of the dread epidemic of influenza in Toronto is predicted by the medical health authorities. It reports that Chicago is now nursing 1,200 cases are correct. Dr. C. J. Hastings, M. O. H., said this morning that since it is not a reportable disease an increase in the number of cases would not be known until deaths had occurred.

**QUARANTINE AGAINST
MICHIGAN WILL NOT
LIKELY BE ENFORCED**

Toronto, Jan. 20.—Dr. J. W. S. McCullough this morning, in answer to the question of whether, in view of the outbreak of influenza in Michigan, a quarantine would be established by the Province of Ontario, said influenza, under the act, was not quarantinable. He said it would be practically impossible to close the Michigan frontier. The whole life of the southwestern part of the province would be interrupted.

Report of Bacteriological Depart- ment of the Guelph Agricultural College

A solution was made of one ounce of Hypozone to five gallons of water. Six milk bottles were used, and before the test was made each bottle contained an average of one million bacteria. Three bottles were immersed in the solution for 2½ minutes, after which the highest count in any bottle was 50 bacteria. One bottle contained none at all.

The other three bottles were immersed for five minutes, after which the highest count was 20 bacteria. One bottle contained none at all.

Doctor Luney of the Public Health Department of this city is now conducting a series of tests with Hypozone. He made a solution of one part of Hypozone in 150 parts of water, and found that this solution would kill Typhoid germs in 2 minutes. Fuller reports of these tests will be announced later.

**INFLUENZA GROWING
IN CHICAGO, STATE
HEALTH OFFICIALS****Total of 1,350 Cases Reported
in Twenty-Four Hours.**

Chicago, Jan. 25.—Influenza and pneumonia cases and deaths are increasing, it was announced today by Health Commissioner Robertson. During the last 24 hours, Dr. Robertson said, 1,350 cases of influenza and 259 cases of pneumonia were reported. During the same period there were 39 deaths from influenza and 51 deaths from pneumonia.

HAMILTON HAS ONE.

Hamilton, Jan. 25.—The first influenza case reported in this city this winter was discovered on Saturday.

**MANY NEW CASES
LISTED IN NEW YORK**

New York, Jan. 25.—Despite the strenuous efforts being made by the health authorities to check the spread of influenza there were 2,555 new cases of the malady reported during the last 24 hours, Health Commissioner Copeland announced tonight. This was an increase of 494 over the number of cases reported the previous day. Deaths from the disease numbered 30, a decrease of three from yesterday, while 76 persons succumbed to pneumonia.

Since January 1 there have been a total of 8,793 influenza and 3,187 pneumonia cases reported.

In the same period there have been 159 influenza and 1,099 pneumonia deaths.

Dr. Copeland said that today's figures correspond with those of October 3, 1918, of the last epidemic, on which date there were 159 deaths from influenza and pneumonia.

FEW AT TORONTO.

Toronto, Jan. 25.—There is no epidemic of influenza in this city so far. Fifteen cases at the General Hospital and three suspected influenza cases at the Western Hospital comprise the total number reported up to midnight tonight.
