Mr. Crerar's Address. HON. T. A. CRERAR, leader of the Progressives in the House of Commons, has issued a speech from the throne all his own-or, in

other words, he has made it quite ain where he stands in the house matters of policy. He starts his program on very tenable grounds, viz.: That the Progressives are more concerned about the advancement of certain principles than they are for the success of any particular party. Mr. CRERAR has hitched his wagon to a star, and it is to be hoped he finds the driving good. Then, also he has stated a principle that no political leader would dare ignore, viz.: That the success of any party must be only of the most superficial sort if it does not carry with it the success and prosperity of the people of that country, regardless of their political affiliation. In other words, political success is a result and not a primary consideration. Mr. CRERAR, in his references to

the tariff, made it quite plain that he looked forward to the removal of duty on agricultural implements. It is not likely that it would be possible to get such a measure through the house. It is true that a clause to this effect was contained in the 1919 platform of the Liberal party, but since that time a very widespread movement among agriculturists has changed matters to some extent. The government in power at Ottawa today is not a free trade government. This point has been abundantly established. Neither is it a high tariff administration. It is true to Liberal principles of first ascertaining the known revenue needs of the country, way that will put the burden on those best able to bear it. Mr. FIELD-ING is of the tariff for revenue school, and it will be along this line that Liberal policies will in all likelihood be formed.

MR. CRERAB also intimates that he is in favor of public ownership, speaking particularly of the National Railways. There is hardly any other course open to the government at this time, and so it will be that the policy favoring a fair trial of public ownership will be subscribed to by men on both sides of the house who, were it not for the necessity of the case, would not be advocates of the policy of public ownership of railways. How. MACKENZIE KING, when he was appealing to the electors, declared that he was willing to give public operation of the National Railways a fair trial, and he carried that statement through his cam-There are competent men in charge of these roads, but consolidation is necessary to cut down the annual deficits, which are of such proportions that they cannot be carried indefinitely. So Mr. CRERAR will find that he can support an honest effort to see what can be done by public ownership to straighten out the railroad situation, which constitutes probably the most serious

moment. When he touched on immigration one could have wished that he might have gone farther in the offering of some definite lines along which he

we have at the

He states the case from a very secure premise. It is easy to account for a million more people than the last census showed as living in Canada. He asks where have they gone, and of what use is it to bring more people into Canada when those who to come are leaving and taking up their permanent residence elsewhere. Now, that question has been put by many people besides Mr. CRERAR, and it has never been answered satisfactorily. It may be that in future addresses Ms. CRERAR, with his knowledge of the West, will throw a new light on the question, for the country is certainly anxious for all he first-hand information it can get long this line.

The Progressive leader also touchd on the matter of taxation, which will find a response in the minds of many in Canada, regardless of politics. As things are at present it is ossible for a man to be paying city, provincial and federal taxes on the ame income, certainly a situation hat calls for a remedy.

On the whole, Mr. CRERAR's speech was reasonable, true to the wishes of the people who elected him, and ot unsympathetic toward the views nd aims of the government. Depite the very apparent attempts of IR. MEIGHEN to hammer a wedge n between Liberals and Progresives, and in this way hamper the arrying on of government business, he whole tone of Mr. CRERAR'S seech was such as to permit of the Interpretation that Mr. Mieghen's attempts had actually strengthened e understanding between the premier and Hon. Mr. CRERAH.

London's Tax Rate.

JNLESS SOME very drastic rered by "Public Schools."

ment. Were the same amount necessary this year as last the tax rate on the basis of the higher assessment would be about 34 mills.

On the basis of present visible estimates it will be about 39 mills on the new assessment.

Nor does this explain the whole amounts that citizens have to contribute. This year there is a sum of \$78,729 to be raised as the city share mean that citizens, as their share, will have to put up about \$200,000.

London went ahead and made a horizontal increase in its assessment. The plea all through has been that the increased assessment which to increase the tax levy to the ratepayer. Or, to put it another ever. way, in the mayor's words, the increased assessment shall be used to decrease the tax rate.

Such an aim and idea is fine, splenassessment and it is very easy to high assessment and a high rate. It is not fair to the ratepayers of

ROMAN MEAL

How It Differs From Other Cereals

FIRST—what is Roman Meal? A cereal made of whole wheat and whole rye cut into little granules, and blended with bran and flaxose-a balanced human food.

POINTS OF DIFFERENCE

- 1.-Color.-Rich nut brown.
- 2.-Flavor.-Distinctive, nut-like, delicious, instead of insipid.
- 3.-Nourishment.-Gives more because it retains brown parts of
- 4.—Price.—More economical, because more satisfying and sus-
- 5.-Food Balance.-Combining four grains, it gives exact nourishment needed for body, brain and nerves.
- 6.-Health Value.-Being granular-not crushed or rolled,it mixes easily with digestive fluids, aiding digestion and relieving constipation.
- 7.-Uses.-Makes delicious porridge, and can be used whereever white flour is called for. Recipes on each package.

Try Roman Meal as porridge for breakfast to-morrow
