S. FUGE, ESQ., 464 Dundas Street, London, Ont.

LONDON, ONT., Feb. 3rd, 1893.

Dear Sir,—Making reference to J. C. Taylor & Co.'s Boiler Composition which you supplied us a few months ago, beg to say that we have given it a thorough test, and find it to fully verify all your representations as to its excellence in being able to remove all scale from the tubes and inside of boiler, and we find in using it, that it takes even a less quantity than is represented to do the work of keeping the boiler clean. We have, in consequence of the use of it, set aside all other appliances which we had for removing and preventing scale accumulating in our boiler, and are so much pleased with it that we can cheerfully recommend it to all and every one who have steam boilers and wish to save money in fuel by keeping their boiler perfectly clean, and cannot recommend it too highly.

Very truly yours,

STEVENS & BURNS.
