

NEW YORK EXCHANGE.

STOCKS OPEN WITH A BLOW—
SUGAR SELLS AT 182, B. R. T. 110½,
MANHATTAN 110½—NEW YORK
CENTRAL ADVANCES.

New York, March 20.

The market for Americans in London is unusually active and quotations are from $\frac{1}{2}$ to $\frac{3}{4}$ better than our closing prices. The heaviest buying seems to be in the Pacifics and in Atchison. Orders in Union Pacific Pfd are said to originate on this side.

The discussion of recent extraordinary advance in Sugar continues, and the theories to account for it are innumerable. Nothing authentic has come out over Sunday, and although official denials continue to be plentiful, the Street still believes that there is more in the movement than a drive against the shorts.

The point which interests the Street more than any, is whether the Havemeyer interests still control the property, or whether their places have been taken by Standard Oil interests. It was said the stock sold at 180 on the curb in Boston, after the close Saturday.

In banking circles it is believed that the squeeze in money is pretty nearly at an end. There may possibly be flurries during this week and next, but it is not expected that rates' will go any higher than they did last week.

The tendency of speculation continues to run into some of the newer industrials rather than into the Grangers.

No extensive movement in the latter is looked for until the publication of the February statement which should come out toward the end of this week or first of next, or until some intelligent estimate has been made of the condition of the winter wheat crop. It is stated authoritatively that people representing Flower interests have acquired control of the Brooklyn Electric Railroad system. Large economies in operating expenses are expected to arise the single operation of the two systems and the Street is again beginning to talk about a dividend on Brooklyn Rapid Transit although insiders refuse to make any predictions.

Recent buying of Northern Pacific com. is called good and as is usual when the stock shows any strength stories are being circulated that a quarterly dividend of 1 p.c. may be expected in early spring.

The recent heaviness of American tobacco is said to be due to the possibility that Liggett & Meyers may organize an opposition company.

Sentiment on the street is --- ^{probably} mixed. Commission Houses inclined to advise purchases on modern declines while the operators believe further liquidation must take place before a healthy bull movement can be successfully inaugurated.

Bulls in the Street continue to amuse themselves with the rumors of Standard Oil purchase, but the only confirmation of this is in the aggressive and well maintained strength of the stock.

There were other rap'd advances on market, notably Brooklyn Rapid Transit on rumors Company obtained practical monopoly. Long Island transportation; also Union Pacific, New York Central and

Manhattan. The last named stock is stronger than it has been in many days and should the shorts there be given the treatment they had in Sugar, Manhattan would go to 120 easily. Advances in New York Central and Union Pacific revived the rumor of the deal which was current some weeks ago.

London showed advances in all American stocks, except the Readings, and Brooklyn Rapid Transit quite freely at the opening mostly Union Pacific.
