

and which had been secured by the Westinghouse Company. The announcement was to the effect that the St. Lawrence Construction Company of New York, had awarded to the Company a contract for fifteen 5,000 h. p. generators, which are to be erected at their plant at Massena, northern New York. This is the largest single order ever given for electrical apparatus and the amount directly involved is about three quarters of a million dollars.

This contract together with that recently given by the Cataract Construction Company, of New York, for five 5,000 h. p. generators for installation at Niagara Falls, N. Y., makes a total of twenty 5,000 h. p. generators, having a total capacity of 100,000 h. p. which have been ordered from the Westinghouse Electric and Manufacturing Company this year.

The five generators for Niagara Falls are well under construction, and the other fifteen required by the St. Lawrence Company will be immediately proceeded with and their construction will give employment to a large number of men.

These orders cover only the apparatus for generating electricity, and there will necessarily be required other apparatus of equal capacity for the utilization of the electrical energy produced by these great generators, and the Westinghouse officials expect that a large proportion of the additional apparatus will be ordered from their company by reason of their having already secured the contract for the principal apparatus.

The placing of these recent important contracts has undoubtedly resulted by reason of the great success of their three 5,000 h. p. generators already installed at Niagara Falls, coupled with the fact that the Westinghouse Electric and Manufacturing Company has ample facilities for turning out such large work promptly and satisfactorily.
