

streak is wanting in the specimen. The uniformly dark griseous primaries have the median lines alone visible; these are narrow, black, approximate, of the usual K-shape, fused by a black dash below median vein. A series of terminal narrow black streaks. Fringes long, silky gray. Hind wings almost uniformly fuscous with whitish fringes, beneath paler with traces of a transverse line and a discal dot. Fore wings fuscous, with an outer line. Thorax and head like fore wings in color. Expanse 30 m. m. *Hab.* Nevada, Mr. Hy. Edwards, No. 2745.

The statement of Mr. Morrison, in the May number of the CANADIAN ENTOMOLOGIST, that *Homohadena induta* was the same as his *H. retro-versa*, I read with surprise. From the description of the latter, after careful study, I had supposed it a redescription of *H. kappa*. Mr. Morrison says of *retroversa*: "coloration of *H. badistriga*." This is not true of *induta*, which wants the brown tinge entirely. He says the ordinary spots have "broad white annuli." This cannot be said of *induta*. Again, "the basal streak is obsolete," This is not true of *induta*, but of *kappa*. "The posterior wings are as in *badistriga*, etc.," he gives as another character, but it will not apply to *induta*. Mr. Morrison departs often from some more usual terms for color, which on that account renders it difficult at times to determine an insect from his descriptions. I feel that I have a sufficient excuse for my description of *induta*, while I am not prepared to admit the truth of Mr. Morrison's proposition that he has originally intended my species under the name of *retroversa*. I am not aware of *induta* occurring in Missouri, while Mr. Riley thought from a casual examination of *H. kappa* that he had taken that species in that State.

ENTOMOLOGICAL CLUB OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

We would invite the especial attention of all American Entomologists to the following paragraph, which appears in the circular recently issued by the Secretary of the A. A. A. S.:

"The attention of persons specially interested in Entomology is directed to the action taken by the Entomologists at the Hartford meeting, and to the fact that there will be a meeting of the Entomological
