Resolved—That for the reasons herein stated, the Council having been compelled to relinquish their plans, the Church of England Proprietary School is hereby given up accordingly.

MR. CHARLES RAIN: SURGEON DENTIST,

DEGS to acquaint his numerous friends, and the public generally, that he has just returned from New York, where he has been spending some time with Professor John Allen, of the College of Dental Surgeons, Cincinnati, from whom he has been acquiring a knowledge of the late great improvement in Dentistry, viz: that of uniting single teeth to each other and to the plate upon which they are set, by means of a fusible silicious cement, which is flowed in and around the base of the teeth upon the plate in such a manner, as to form a continuous artificial gum. By this method the cavities between the teeth, which are unavoidable in the old style, are completely filled up leaving no chance for secretions of any kind and giving a perfectly natural and life-like appearance to the gum and teeth. Specimens may be seen at his Office, on the corner of Bay and Melinda Streets. Office Hours from 9 a. m. to 6 p. m.

Terms—Cash—without exception.

This important improvement has been patented by Dr. Allen in the United States, and steps have been taken to procure Patents in England and France. Dr. A. has authorized Mr. Khan to give instructions in this beautiful art to educated gentlemen in the profession, on moderate terms.

N.B.—Mr. R. offers a friendly challenge to all the Dentists of British North America to compete with him at the approaching Provincial Exhibition, for a Gold Medal, value £12 10s. to be left to the judgment of the Professors of Toronto University, and of Trinity College.
