

SPECIAL . . .

TO THE

MEDICAL PROFESSION

OF all the many preparations of Cod Liver Oil, the latest and the best, the most easily assimilable and by far the least nauseating is

.FERROL.

an agreeable combination of Iron with Norwegian Cod Liver Oil. The Oil we use is a special brand imported direct and specially for us. It is combined with the Tartrate of Iron in the proportion of grs. vi. to the oz., and in the emulsifying process is so combined with Oil of Sassafras, Oil of Almond and Saccharine, as to render the whole as nearly tasteless as it is possible to make it.

WE GUARANTEE

that the hottest weather will have no deleterious effect upon the emulsion, and that it will always be of the same uniform strength. We ask the Medical Profession to give FERROL a trial, as we feel certain that the effect upon the patient will be such that it will be used in preference to any other preparation of a similar nature. This will, indeed, prove a most valuable remedy in cases where the oil is required as a remedial agent, and a boon to those who have in the past been unable to digest the preparations now on the market. Instruct your druggist to lay in a stock of it.

FERROL MANUFACTURING CO.,
