

AN EVENING AT "THE CASCADES"

(Grand Ballroom, The Biltmore, New York)

SO long as fashion decrees sleeveless gowns and sheer fabrics for sleeves, the woman of refinement requires Delatone to conform modestly to the revelation of arms and shoulders. Delatone is an old and well-known scientific preparation, in powder form, for the quick, safe and certain removal of hair. Beauty specialists recommend Delatone for the removal of hair from the face, neck and arms. After

application of Delatone, mixed with a little water, the skin is clear, smooth, of natural color, and hairless. Druggists sell Delatone, or an original one-ounce jar will be mailed to your address upon receipt of \$1.00 by the Sheffield Pharmacal Co., Dept. F. A., 339 South Wabash Avenue, Chicago, Ill. In the Dominion of Canada, orders and remittances should be sent to Lyman Bros. & Co., Ltd., Toronto, Ont.
