

Saves the Cost of Poles and Power

The No. 24 Fairbanks-Morse Gasoline Motor Car shown here is a self-contained power plant, as easily controlled as an electric car, and far more economical. It is designed for passenger service and has a seating capacity for 35 people. The body is divided into two compartments, the rear having reversible seats upholstered in rattan, and the forward compartment containing engine and having ample room for light baggage and express, or can be used as a smoking compartment, as it is arranged with side drop seats.

FAIRBANKS-MORSE GASOLINE MOTOR CARS

Are very economical and efficient equipment for branch lines, feeders, etc. They are now in successful operation on many parts of the Continent. The cars we have in use in Winnipeg are giving splendid satisfaction.

In sparsely settled districts, or for connecting adjacent towns, the gasoline motor car is the most logical solution of efficient and satisfactory service. Not only is the first cost of the equipment low, but these cars will

operate on a fraction of the expense of the steam train. As compared to the electric line they require no poles, wiring, power house, or other expense except when actually running.

These cars are regularly equipped with air brake and hot water heating system. Maximum speed about 30 miles per hour.

444 St. James St., Montreal

The Efficiency of Your Fire Department —

would be greatly improved if you had a modern fire alarm system.

¶ The importance of an efficient alarm system is recognized by the largest cities in the world, that have the best equipped and trained fire departments.

¶ If so much importance is placed on the signal system where the fire-fighting equipment is the best to be had, isn't it more important that a good call

system be installed where there is little or no equipment for fighting fires?

¶ Years of actual service have earned for our fire alarm equipment a reputation for reliability and efficiency.

¶ Ninety-nine per cent. of the municipal fire alarm systems installed throughout the country have been installed by us.
