

scrap iron and steel; 5667 - Canadian one cent bronze coins; 8001 - source (fertile) and fissionable materials; 8005 - deuterium; 8039 - tritium; 8050 - radio-active materials; 8136 - nuclear reactors; 10011 - serum albumin.

All goods originating in the United States that are to be re-exported from Canada require an export permit except any such goods that have been further processed or manufactured outside the United States, by combining them with other goods or otherwise so as to result in substantial change in value, form and use of the goods or in the production of new goods, unless the goods to be exported are listed in another Group in this List.

All goods originating outside Canada that are identified in the ECL require an export permit to be re-exported from Canada to any destination with the exception, in most cases, of the United States. Any such goods that are in transit in bond on a through journey and accompanied by a billing or other documentation which clearly indicates the ultimate destination are exempted from the requirements to have an export permit.

Section 7 of the Act provides that:

"The Minister may issue to any resident of Canada applying therefor a permit to export goods included in an Export Control List or to a country included in an Area Control List, in such quantity and of such quality, by such persons, to such places or persons and subject to such other terms and conditions as are described in the permit or in the regulations."

Authority is provided under section 12 of the Act for regulations prescribing the information and undertakings to
