

BRITAIN TO CLEAR TRADE ROUTES OF GERMAN CRUISERS

ENGAGEMENT WHICH BEGAN AT DAWN DEVELOPS INTO PROLONGED, TERRIFIC BATTLE

British and French Join Main Belgian Army Which Concentrated at Louvain - Battle Line Extends Over Two Hundred Miles - Germans Reported Losing.

Special Direct Copyright Cable to The Toronto World.
BRUSSELS, Aug. 12.—The engagement which began at Tongres at dawn this morning has grown into a fearful battle, according to all reports. The concentration of the big guns is heard at Maasricht, 14 miles away. The battle has been desolating Liege, swept around to the north and joined the forces which had been concentrating at Tongres. There they met the allied English and Belgian forces, which probably include the main division of the Belgian army which had been concentrated at Louvain under King Albert, and the allies reported to have left Namur in the direction of Liege yesterday.

BATTLE LINE EXTENSIVE.

PARIS, Aug. 12.—According to a statement by a foreign minister, the French, Belgians and English are engaged with the Germans along a battle line 200 miles long, extending along the frontier from Belgium to Tongres. A German attack at Givet, 80 miles from Sedan, was repulsed by the French.

GERMANS' TERRIFIC LOSS.

BASEL, Aug. 12.—The Germans are reported to have sustained terrific losses in the attempt to dislodge the French from their position back of the Maas. The 12th and 19th Regiments are reported to have been annihilated and several prominent officers also fell.

DESTROYER HOISTED BY HER OWN PETARD

German Ship Sunk by Mine Laid by German Warship.

Canadian Press Despatch.
LONDON, Aug. 12.—The Copenhagen correspondent of The Daily Mail says: "It is ascertained that the German torpedo boat which was reported to have been sunk by the explosion of one of her boilers off South Gedes on Aug. 5, really was destroyed by a mine laid by a German warship. The Danish and Swedish steamers, it is reported, ceased running as a result of information that the Germans had laid contact mines in the North Sea."

FRENCH SUCCESS ON GERMAN FRONT

In Engagement Near Verdun Paris Reports Sharp Fighting and Victory.

Canadian Press Despatch.
PARIS, Aug. 12.—The French war office issued an official announcement today, stating that the troops of the republic have been victorious in engagements with the Germans. It was further officially stated that all the German soldiers who penetrated France in the departments of the Meuse and Meurthe-et-Moselle have been driven back across the border. At Namur, northeast of Verdun, a sharp engagement took place, in which the French claim to have repulsed the Germans with heavy loss. Six guns, three heavy pieces of artillery and three rapid firing guns fell into the hands of the soldiers of the republic. The battery of German artillery was disabled. During the early stages of the battle the Germans fought with such ferocity and stubbornness that the French lines were on the point of wavering when reserves were thrown forward to support the French front. This turned the tide, according to the French war office despatches, and the French troops then began a counter attack.

FRANCE COMMANDEERS MONTREAL MOTOR CARS

Ordered in France and Ready for Shipment, When Seized.

Canadian Press Despatch.
MONTREAL, Aug. 12.—Ten La Haye motor trucks built for service in the Montreal road department, which were ready for shipment from the factory, have been commandeered by the French government for use in the army, according to information received today at the city hall. The trucks cost \$200 each, but as they are not yet paid for, the city will not be the loser.

ORANGEMEN OFFER THEIR SERVICES

Have Many Veterans Who Will Fight for the Empire.

On behalf of the Orange order, the following letter has been sent by W. Banks, sr., to Col. Sam Hughes: "Dear Sir: As all patriotic Canadians between eighteen and forty years of age are offering their services in defence of the empire, and as the government may yet find it necessary to accept all such offers, and this may be causing some anxiety to you as to how the canals, the railways, the elevators, the canals, and other public and private property may be safeguarded, it is in some measure, as far as we can, to allay this anxiety, that I am instructed to write to you. Bro. F. W. Egan, McLan, Bowmanville, deputy grand master of the R. W. Grand Orange Lodge of Ontario east; Bro. Dr. J. J. Williams, Woodstock, grand Orilla, and Bro. J. I. Hart, M.L.A., of Orilla, and Bro. T. B. Collins of Millbrook, chairman of the Joint Anglo-Canadian committee of the Orange Order in Canada, have under consideration authorized me to say to you that there are in this order a number of men over forty years of age who have served in His Majesty's regular or auxiliary forces and are well trained. A very large proportion of these men are hale and hearty and should the Dominion or empire need their services they are ready to respond to your call to go anywhere and perform any duties assigned them in the field or elsewhere. In making this offer they know they are voicing the sentiments of every patriotic Canadian, irrespective of race or creed."

GERMANS RESISTED BY BELGIANS AGAIN

Engagement Has Taken Place Between the Forces Beyond Liege.

PARIS, Aug. 12.—The war office in an official announcement issued 10 a.m. today, states that an important engagement has taken place between the German advance beyond Liege and the Belgian troops at Tilmont. Tilmont is an important town on the railroad to Louvain and only ten miles from the Belgian position at the latter point. The war office states that the Belgians valiantly resisted the German attack.

WHERE FIGHTING MIGHT TAKE PLACE

GERMANY WANTED SHIPS RETURNED

But British Government Was Kept in the Dark.

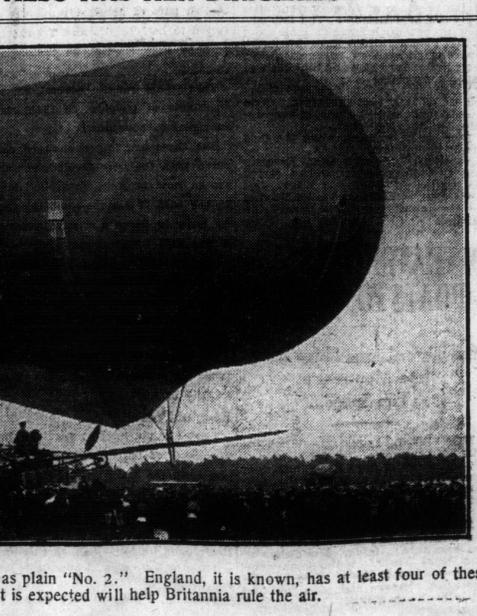

LONDON, Aug. 12.—The Gazette today publishes the details of the negotiations between England and Germany regarding the status of their merchant shipping in ports of the enemy. A despatch from Berlin, received here yesterday, said that the German and British governments had requested the American embassy in Berlin to intervene for the purpose of fixing the time in which the merchantmen of the two countries must quit the ports of the enemy. Mutual Liberation. From the matter published by The Gazette it appears that Germany on Aug. 4 proposed to the British Government the mutual liberation of inter-ported ships. A reply to the proposal within forty-eight hours was requested. Apparently no reply was made to the German communication, but the British Government, thru the United States ambassador, Walter Hines Page, made known to Germany the decision of this government regarding the treatment of enemy ships and asking whether this would meet the views of Germany. Has No Knowledge. The intermediary of the American ambassadors at Berlin and Stockholm, but no communication was received from Berlin, and the British Government has no knowledge of the treatment being accorded to British ships and cargoes in German ports.

KAISER BECOMES HUMANE FOR ONCE

Hearing of Heavy Loss at Liege, Orders Troops to Retire.

BERLIN, via Amsterdam, Aug. 12.—Kaiser Wilhelm himself interfered to prevent the carrying of the Liege forts by storm. When the news reached him that the German losses were heavy, consequent on the necessity of assaulting modern steel fortifications with infantry, he sent word to the front to change the tactics. He directed that the assaults in force be stopped and that the lines of communication be immediately restored so that the heavy siege artillery, which was still in the rear, could be brought up. The Kaiser took this step thru humane feeling.

ENGLAND ALSO HAS HER DIRIGIBLES

The British military dirigible, known as plain "No. 2." England, it is known, has at least four of these giant craft, that it is expected will help Britannia rule the air.

GERMANY WANTS CENSORSHIP TAKEN OFF WIRELESS STATIONS

Bryan Agrees to Submit Question to President Wilson in Instigation of German Charge - British Diplomat Says Such Permission Would Give Enemy Great Advantage Over Britain and France.

Special to The Toronto World.
WASHINGTON, August 12.—President Wilson will be asked to decide the wireless telegraph question, the issue between Germany and the United States, Secretary Bryan agreed today with Haniel von Halmhausen, charge of the German Embassy, to submit the whole wireless controversy to the president tomorrow. Germany has no cables between this country and Germany. She has wireless stations at Tuckerston, N.J., and Saville, Long Island, but the United States Government, under the Hague Convention, has prohibited the use of either of these stations. This leaves Germany without a means of communication, while Great Britain and France use cables. The state department contends that the German wireless stations at Tuckerston and Saville, having been constructed for military purposes, violate the neutrality laws. The German Embassy desires permission to send wireless code messages from Tuckerston to Berlin in order to help to get the Americans out of Germany. The German charge told Mr. Bryan today that his embassy does not want to use the wireless stations for military purposes, and believing that the use of them for any except military purposes is not in violation of the neutrality laws of the United States or the convention of the Hague. Wants Direct Cables. The German embassy has complained that the cable messages sent from this country to Berlin by London were delayed and censored, and asks for a direct means of communication. While the German embassy makes the claim that the wireless restrictions amount to a discrimination against Germany inasmuch as England and France have uninterrupted use of the cable, while it is impossible to send diplomatic messages to the German Government because of the censorship in England and France, England takes the position that unrestricted use of the wireless would be discriminating. Councillor Barclay of the British embassy gave out the following statement at noon today: "The request of Charge D'Affaires Von Halmhausen with regard to the use of the Tuckerston radio station to my home government, and will not be able to give Secretary Bryan an answer until I hear from London. "Speaking personally, I think the German use of the Tuckerston station would be a great advantage over England and France, who have to depend on the cable for transmitting messages to their home governments. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the messages to be intercepted. The possible use of the German wireless station for military purposes, and the Atlantic would mean that they, too, would receive any messages sent from the Tuckerston station, whereas in our case, using cables, there is no chance for the
